

Contents

List of abbreviations — XI

Prologue — 1

References — 12

Chapter 1

Introduction — 15

- 1.1 Implant versus transplant — 15
- 1.2 Types of implants — 17
 - 1.2.1 Medical implant — 17
 - 1.2.2 Dental implant — 18
- 1.3 FDA regulations and safety issues — 23
- References — 26

Chapter 2

Biofunctionality and biomaterials — 28

- 2.1 Biofunctionality — 28
 - 2.1.1 Biostructural materials — 29
 - 2.1.2 Biofunctional materials — 29
- 2.2 Biomaterials — 29
 - 2.2.1 Classification of biomaterials — 31
 - 2.2.2 Metals and alloys — 33
 - 2.2.3 Polymeric materials — 34
 - 2.2.4 Ceramic materials — 35
 - 2.2.5 Composite materials — 36
 - 2.2.6 Hybrid materials — 38
- References — 39

Chapter 3

Interfacial reaction — 45

- 3.1 Surface and interface — 45
- 3.2 Environmental chemistry and its corrosiveness — 46
 - 3.2.1 Saliva — 48
 - 3.2.2 Body fluid — 49
 - 3.2.3 Blood — 51
 - 3.2.4 Microbiologically induced corrosion — 52
- 3.3 Corrosion and oxidation — 54
 - 3.3.1 Corrosion — 54
 - 3.3.2 Oxidation — 55

3.4	Biotribology — 55
3.4.1	Biotribology — 55
3.4.2	Wear debris toxicity — 56
3.4.3	Tribocorrosion — 59
	References — 62

Chapter 4

Implantability and compatibility — 68

4.1	Miniaturization and implantability — 68
4.2	Compatibility — 70
4.2.1	Biological compatibility (or biocompatibility) — 72
4.2.2	Biomechanical compatibility — 76
4.2.3	Morphological compatibility — 80
4.2.4	Hemocompatibility — 84
4.2.5	Cytocompatibility — 89
4.2.6	MRI compatibility — 93
	References — 97

Chapter 5

Surface modification for implantable materials — 106

5.1	Nature of surface — 107
5.2	Mechanical modification — 108
5.3	Chemical and electrochemical modifications — 114
5.4	Physical modification — 118
5.4.1	Hydrophilicity and hydrophobicity — 118
5.4.2	Surface modification — 120
5.5	Thermal modification — 123
5.6	Combined technology — 125
5.7	Coating biomaterials — 129
5.7.1	Metallic materials — 129
5.7.2	Polymeric materials — 132
5.7.3	Ceramics – metallic oxides, nitrides, and carbides — 132
5.7.4	Ceramics – nonmetallic compounds — 137
5.7.5	Composites, hybrids, and biomimetic materials — 141
5.8	Sterilization — 145
	References — 153

Chapter 6

Advanced fabrication technologies for implantable device — 178

6.1	In general — 178
6.2	Application of laser technologies — 181

6.2.1	Laser surface alloying (LSA) —	181
6.2.2	Laser deposition —	182
6.2.3	Laser nitriding and oxidation —	184
6.2.4	Selective laser melting (SLM) —	184
6.2.5	Selective laser sintering (SLS) —	187
6.2.6	3D printing (3DP) —	188
6.3	Metal injection molding (MIM) —	192
6.4	Foam structure —	195
6.5	Gradient functional material (GFM) —	199
6.6	Nanotechnology —	202
6.6.1	Nanomedicine —	205
6.6.2	Nanodentistry —	212
	References —	218

Chapter 7

Medical implants — 229

7.1	Introduction —	229
7.2	HRQoL evaluations for medical implants —	231
	TSA —	231
	THA —	232
	TKA —	234
	Scoliosis —	235
	Hemodialysis —	236
7.3	Un-load-bearing implants —	237
7.3.1	Nerve system —	238
7.3.2	Head area —	240
7.3.3	Pharynx area —	245
7.3.4	Cardiovascular system —	250
7.3.5	Digestive organs —	260
7.3.6	Urinary organs —	265
7.3.7	Others —	266
7.3.8	Future of artificial organs —	268
7.3.9	Apheresis —	269
7.4	Load-bearing orthopedic implants —	270
7.4.1	In general —	270
7.4.2	Artificial limbs —	271
7.4.3	Joints —	271
7.4.4	Total shoulder replacement (TSR) and reverse TSR (rTSR) —	274
7.4.5	Total hip replacement (THR) —	279
7.4.6	Total knee replacement (TKR) —	282
	References —	288

Chapter 8

Biomechanics and implant failure — 301

- 8.1 In general — **301**
- 8.2 Biomechanics in orthopedic implant systems — **302**
- 8.3 Stress shielding in orthopedic implant systems — **308**
- 8.4 Biomechanics in dental implant systems — **312**
- 8.5 Biomechanics in orthodontics — **321**
- References — **323**

Chapter 9

Dental implants — 327

- 9.1 Introduction — **327**
- 9.2 OHRQoL evaluations for dental implants — **330**
- 9.3 Three different strategies — **336**
- 9.4 Materials, types, and designs of dental implant system — **337**
 - 9.4.1 Superstructure — **337**
 - 9.4.2 Abutment — **338**
 - 9.4.3 Fixture — **342**
- 9.5 Treatment planning — **354**
 - 9.5.1 Bone quantity and quality — **354**
 - 9.5.2 Decision for one-stage or two-stage implantation — **360**
 - 9.5.3 Full mouth reconstruction — **365**
 - 9.5.4 Tissue-level implant versus bone-level implant — **370**
- 9.6 Main surgical procedures — **372**
 - 9.6.1 Tooth extraction — **373**
 - 9.6.2 Site preparation — **374**
- 9.7 Additional surgical procedures — **381**
 - 9.7.1 Hard tissue reconstruction – sinus floor elevation — **382**
 - 9.7.2 Hard tissue reconstruction – bone augmentation — **384**
 - 9.7.3 Soft tissue reconstruction — **388**
- 9.8 Impression taking — **392**
- References — **394**

Chapter 10

Success rate, fixation, osseointegration, and longevity — 411

- 10.1 Success rate and survival rate — **411**
 - 10.1.1 Orthopedic implants — **412**
 - 10.1.2 Dental implants — **415**
- 10.2 Fixation — **416**
 - 10.2.1 Fixation of orthopedic implants — **417**
 - 10.2.2 Retention of dental implants — **426**

- 10.3 Union bone healing — 431
- 10.4 Nonunion bone healing — 432
- 10.4.1 Bone–implant interface — 434
- 10.4.2 Effects of surface condition on biological events — 443
- 10.4.3 Bone grafting — 448
- 10.5 Osseointegration and stability — 451
- 10.5.1 Osseointegration — 451
- 10.5.2 Stability — 459
- 10.5.3 Evaluation — 461
- 10.5.4 Loading protocol — 467
- References — 469

Chapter 11

Indications and contraindications — 492

- 11.1 Absolute indication versus relative indication — 492
 - Indication — 492
 - Contraindication — 493
- 11.2 Indications and contraindications for orthopedic implants — 494
- 11.3 Indications and contraindications for dental implants — 494
 - References — 498

Chapter 12

Implant complications — 500

- 12.1 Introduction — 500
- 12.2 Implant loosening — 501
- 12.3 Orthopedic implant complications — 503
 - Total shoulder arthroplasty — 504
 - Total hip arthroplasty — 505
 - Total knee arthroplasty — 508
- 12.4 Dental implant complications — 512
 - 12.4.1 Common intraoperation and short-term postoperation complications — 514
 - 12.4.2 Less common intraoperation and short-term postoperation complications — 516
 - 12.4.3 Long-term postoperation complications — 518
 - References — 522

Chapter 13

Implantology in AI era — 530

- 13.1 AI and orthopedic implants — 530
- 13.2 AI and dental implants — 533
- 13.3 Telemedicine — 536

X — Contents

13.4 Teledentistry — **537**
 References — **540**

Epilogue — 543
 References — **546**

Acknowledgments — 547

Index — 549
