Preface	III
1 Introduction	1
1.1 State-of-the-Art and Motivation	1
1.2 Thesis Origin and Main Focus	3
1.3 Main Contributions	3
1.4 Thesis Structure	5
1.5 Conventions and Nomenclature	7
2 Fundamentals and Preliminaries	9
2.1 Overview	9
2.1.1 Main Contribution of this Chapter	9
2.1.2 Chapter Structure	9
2.2 Machine Type Communication	10
2.2.1 Background	10
2.2.2 Characteristics of mMTC	10
2.2.3 Direct Random Access	12
2.3 System Configurations and Assumptions	14
2.3.1 MAC Layer Configuration	15
2.3.2 Downlink Transmission	16
2.3.3 Uplink Transmission	17
2.4 Compressed Sensing Multi-User Detection	22
2.4.1 Basic Principle	23
2.4.2 Reconstruction Algorithms	23
2.5 Chapter Summary	25
3 Analysis of CS-MUD towards mMTC Characteristics	27
3.1 Overview	27
3.1.1 Main Contribution of this Chapter	27
3.1.2 Chapter Structure	29

3.2	Investigation of Traffic Models	29
3.2.1	Problem Formulation	30
3.2.2	Sparsity Aware Sphere Detector	34
3.2.3	Numerical Evaluation	44
3.3	Coping with Imperfect CSI	49
3.3.1	Baseline Scenario	52
3.3.2	Joint Estimation with Successive IC	53
3.3.3	Numerical Evaluation	56
3.4	Physical Layer Performance Approximation of CS based MUD	59
3.4.1	Physical Layer System Description	59
3.4.2	Problem Description	61
3.4.3	Replica Symmetric Decoupling with Finite Alphabet	62
3.4.4	Tuning for non-Gaussian Matrix $\mathbf{T}$	64
3.4.5	Activity & Data Estimation	65
3.4.6	Numerical Evaluation	66
3.5	Chapter Summary	72
4	Joint Analysis of CS-MUD and Coded Slotted ALOHA	73
4.1	Overview	73
4.1.1	Main Contribution of this Chapter	73
4.1.2	Chapter Structure	74
4.2	Extended System Model	75
4.3	Capture Effect in Joint CS-MUD based PHY and Coded SA based MAC	76
4.3.1	Capture Effect of CS-MUD based PHY Layer	76
4.3.2	And-Or Evaluation of Coded SA with CS-MUD based Capture Effect	82
4.3.3	Numerical Evaluation	88
4.4	Link Level Verification of CS-MUD based PHY Layer with Coded SA	89
4.4.1	Transmission and Reception	91
4.4.2	Numerical Evaluation	95
4.4.3	Performance Results	103
4.5	Chapter Summary	107
5	Performance Evaluation of CS-MUD with One-Stage Access	109
5.1	Overview	109
5.1.1	Relevant Publications and Contributions	110
5.1.2	Chapter Structure	110
5.2	System Configuration	110
5.2.1	Extended System Model	111

5.2.2	Parameterizations	111
5.3	Combining CS-MUD with One-Stage Access Protocol	113
5.3.1	Slotted ALOHA based One-Stage Access with CS-MUD	115
5.4	Numerical Evaluation	116
5.4.1	Key Performance Metrics	116
5.4.2	Methodology	117
5.4.3	Performance Results	119
5.5	Chapter Summary	124
6	Summary	125
A	Basics of Related Topics	129
A.1	Multi-User Detection	129
A.1.1	Maximum A Posteriori	129
A.1.2	Linear Detectors	131
A.1.3	Nonlinear Detector	132
A.2	Compressed Sensing	136
A.2.1	Sparse Signals	136
A.2.2	Basic Principle	136
A.2.3	Sparse Signal Recovery	137
A.3	Coded Slotted ALOHA	140
A.4	Replica Analysis under Large System Limit	141
A.4.1	Replica Analysis of MAP Estimation	143
	Acronyms	149
	List of Symbols	153
	Bibliography	158
	Index	167
