

Contents

Preface — V

Acknowledgments — VII

Nitin Uniyal, Sangeeta Pant, Anuj Kumar, Prashant Pant
Nature-inspired metaheuristic algorithms for optimization — 1

Sina Asherlou, Aref Yelghi, Erhan Burak Pancar, Şeref Oruç
An optimization approach for highway alignment using metaheuristic algorithms — 11

Sukhveer Singh, Sandeep Singh
A method for solving bi-objective transportation problem under fuzzy environment — 37

Subhendu Ruidas, Mijanur Rahaman Seikh, Prasun Kumar Nayak
Application of particle swarm optimization technique in an interval-valued EPQ model — 51

Nagendra Singh, Yogendra Kumar
Optimization techniques used for designing economic electrical power distribution — 79

Bidyut B. Gogoi, Anita Kumari, S. Nirmala, A. Kartik
Meta-heuristic optimization techniques in navigation constellation design — 93

Ch. Swetha Devi, V. Ranga Rao, Pushpalatha Sarla
Correlation and heuristic analysis of polymer-modified concrete subjected to alternate wetting and drying — 107

Kamal Kumar, Amit Sharma
 q -Rung orthopair fuzzy entropy measure and its application in multi-attribute decision-making — 117

Soumendra Goala, Palash Dutta, Bornali Saikia
A fuzzy multi-criteria decision-making approach for crime linkage utilizing resemblance function under hesitant fuzzy environment — 129

X — Contents

Kumar Anupam, Pankaj Kumar Goley, Anil Yadav

Integrating novel-modified TOPSIS with central composite design to model and optimize O₂ delignification process in pulp and paper industry — 145

T. K. Priyanka, Manoj K. Singh, Anuj Kumar

Deep learning for satellite-based data analysis — 173

Editors' Biography — 189

Index — 191
