

Table of contents

1	General Introduction	1
2	Mathematical Description.....	7
2.1	Liquid phase hydrodynamics	7
2.2	Chemical species	9
2.2.1	Chemical reaction modelling	10
2.2.2	Chemical time Scale.....	11
2.3	Bubble motion	12
2.3.1	Drag force	12
2.3.2	Lift force	13
2.3.3	Added mass force.....	15
2.3.4	Wall force	15
2.3.5	Basset force.....	15
2.3.6	Gravity and pressure force	16
2.3.7	SGS turbulent bubble transport	16
2.3.8	Bubble-wall interaction model	17
2.3.9	Bubble oscillation Model.....	17
2.3.10	Interphase mass transfer.....	19
2.3.11	Species Fluctuation seen by bubbles	21
2.3.12	Lagrangian dynamic time-step.....	21
2.4	Computational tracking algorithm	22
3	Hydrodynamics.....	25
3.1	Case 1 - Circular bubble column - Sommerfeld and Bröder Case	25
3.2	Case 2 - Circular bubble column - HZDR Bubble column.....	32
3.2.1	Numerical simulation set-up.....	33
3.2.2	Comparison of simulation results	34
3.2.3	Comparison of bubble induced turbulence models	35
	Liquid velocity.....	37
	Turbulent quantities.....	38
	Bubble motion.....	40
3.2.4	Bubble dynamics model comparison	42
	Liquid velocity.....	42
	Bubble velocity.....	43
	Turbulent kinetic energy.....	44
3.3	Conclusion of the chapter	45
4	Mass Transfer.....	47
4.1	Case 1 - Single bubbles.....	47
4.2	Case 2 - Bubble swarms	52
4.3	Case 3 - High liquid viscosity effect	57
4.4	Conclusions of the chapter.....	68
5	Chemical Reactions.....	71

5.1	Chemical reaction system 1 - Chemisorption of CO ₂ in alkaline solutions	72
5.1.1	Case 1 - Circular bubble column - Magdeburg University BCR	74
5.1.2	Case 2 - Circular bubble column - Magdeburg University BCR - High viscous case..	84
5.1.3	Case 3 - Rectangular bubble column - Darmana et al. (2007) case.....	86
5.1.4	Case 4 - Circular bubble column - HZDR bubble column	101
5.1.4.1	Simulation set-up	101
5.1.4.2	Comparison of simulation results and experimental measurements	103
	Radial profiles of gas volume fraction	103
	Bubble size distribution.....	104
	Consumption rate of OH ⁻	104
	pH-value evolution.....	105
5.1.4.3	Comparison of bubble induced turbulence models	107
	Liquid velocity.....	107
	Bubble motion	108
	Turbulent viscosity	110
	Turbulent kinetic energy.....	111
	Bubble size.....	112
5.1.4.4	Bubble dynamics model comparison.....	113
	Mean liquid velocity	113
	Bubble velocity	114
	Turbulent kinetic energy.....	115
	Bubble size.....	116
	OH ⁻ Consumption rate	117
5.2	Chemical reaction system 2 – Fe _(edta) -NO system	118
	Circular bubble column - HZDR bubble column.....	120
5.3	Conclusions of the chapter	123
6	<i>Final Conclusions and Outlook</i>	<i>125</i>
6.1	Summary and conclusions	125
6.2	Outlook	127
6.3	Acknowledgements	127
	<i>Nomenclature.....</i>	<i>128</i>
	<i>References</i>	<i>131</i>
