Preface

v

Chapter 1

Some fundamentals of empirical research	1
1. Introduction.....	1
2. On the relevance of quantitative methods in linguistics	3
3. The design and the logic of quantitative studies	7
3.1 Scouting	8
3.2. Hypotheses and operationalization	10
3.2.1. Scientific hypotheses in text form	11
3.2.2. Operationalizing your variables.....	14
3.2.3. Scientific hypotheses in statistical/mathematical form.....	18
3.3. Data collection and storage.....	24
3.4. The decision.....	29
3.4.1. Overview: discrete probability distributions.....	33
3.4.2. Extension: continuous probability distributions	44
4. The design of an experiment: introduction	48
5. The design of an experiment: another example	54

Chapter 2

Fundamentals of R.....	58
1. Introduction and installation	58
2. Functions and arguments	62
3. Vectors.....	66
3.1. Generating vectors in R	66
3.2. Loading and saving vectors in R.....	71
3.3. Editing vectors in R	74
4. Factors	82
4.1. Generating factors in R.....	83
4.2. Loading and saving factors in R	83
4.3. Editing factors in R.....	84
5. Data frames.....	85
5.1. Generating data frames in R	85
5.2. Loading and saving data frames in R.....	88
5.3. Editing data frames in R	90

Chapter 3

Descriptive statistics	96
1. Univariate statistics.....	96
1.1. Frequency data.....	96
1.1.1. Scatterplots and line plots.....	98
1.1.2. Pie charts.....	102
1.1.3. Bar plots.....	102
1.1.4. Pareto-charts	104
1.1.5. Histograms.....	105
1.2. Measures of central tendency	106
1.2.1. The mode	106
1.2.2. The median	107
1.2.3. The arithmetic mean	107
1.2.4. The geometric mean	108
1.3. Measures of dispersion	111
1.3.1. Relative entropy.....	112
1.3.2. The range	113
1.3.3. Quantiles and quartiles	113
1.3.4. The average deviation.....	115
1.3.5. The standard deviation.....	116
1.3.6. The variation coefficient.....	117
1.3.7. Summary functions.....	118
1.3.8. The standard error.....	119
1.4. Centering and standardization (z -scores).....	121
1.5. Confidence intervals	123
1.5.1. Confidence intervals of arithmetic means	124
1.5.2. Confidence intervals of percentages	125
2. Bivariate statistics.....	127
2.1. Frequencies and crosstabulation	127
2.1.1. Bar plots and mosaic plots.....	129
2.1.2. Spineplots	130
2.1.3. Line plots	131
2.2. Means.....	132
2.2.1. Boxplots.....	133
2.2.2. Interaction plots	134
2.3. Coefficients of correlation and linear regression	138

Chapter 4

Analytical statistics

1.	Distributions and frequencies	148
1.1.	Distribution fitting	148
1.1.1.	One dep. variable (ratio-scaled).....	148
1.1.2.	One dep. variable (nominal/categorical).....	151
1.2.	Tests for differences/independence	158
1.2.1.	One dep. variable (ordinal/interval/ratio scaled) and one indep. variable (nominal) (indep. samples)	159
1.2.2.	One dep. variable (nominal/categorical) and one indep. variable (nominal/categorical) (indep. samples).....	165
1.2.3.	One dep. variable (nominal/categorical) (dep. samples)	180
2.	Dispersions	184
2.1.	Goodness-of-fit test for one dep. variable (ratio-scaled)	185
2.2.	One dep. variable (ratio-scaled) and one indep. variable (nominal).....	187
3.	Means.....	194
3.1.	Goodness-of-fit tests.....	195
3.1.1.	One dep. variable (ratio-scaled).....	195
3.1.2.	One dep. variable (ordinal)	199
3.2.	Tests for differences/independence	204
3.2.1.	One dep. variable (ratio-scaled) and one indep. variable (nominal) (indep. samples)	205
3.2.2.	One dep. variable (ratio-scaled) and one indep. variable (nominal) (dep. samples)	212
3.2.3.	One dep. variable (ordinal) and one indep. variable (nominal) (indep. samples)	218
3.2.4.	One dep. variable (ordinal) and one indep. variable (nominal) (dep. samples)	226
4.	Coefficients of correlation and linear regression.....	230
4.1.	The significance of the product-moment correlation.....	231
4.2.	The significance of Kendall's Tau.....	234
4.3.	Correlation and causality	236

Chapter 5

Selected multifactorial methods		238
1.	The multifactorial analysis of frequency data.....	240
1.1.	Configural frequency analysis	240
1.2.	Hierarchical configural frequency analysis	248
2.	Multiple regression analysis	252
3.	ANOVA (analysis of variance).....	274

3.1.	Monofactorial ANOVA	275
3.2.	Two-/multifactorial ANOVA	284
4.	Binary logistic regression	291
5.	Hierarchical agglomerative cluster analysis	306

Chapter 6

Epilog.....	320
-------------	-----

References	323
------------------	-----

Function index	329
----------------	-----
