Abstract.....	1
Zusammenfassung.....	3
1. Introduction.....	6
1.1. Psyllids.....	6
General.....	6
Life history.....	6
Phloem feeding.....	6
<i>Cacopsylla pruni</i>	7
1.2. Phytoplasma.....	8
General.....	8
'Ca. <i>P. prunorum</i> ' and European stone fruit yellows.....	9
Protection measurements - current situation.....	10
1.3. Chemical communication.....	11
General.....	11
Host finding and acceptance by herbivores.....	11
Plant defense.....	12
2. Summary of publications.....	15
2.1. Collection, Identification, and Statistical Analysis of Volatile Organic Compound Patterns emitted by Phytoplasma Infected Plants.....	15
2.2. Host Plant Preferences and Detection of Host Plant Volatiles of the Migrating Psyllid Species <i>Cacopsylla pruni</i> , the Vector of European Stone Fruit Yellows.....	16
2.3. Unraveling the Host Plant Alternation of <i>Cacopsylla pruni</i> – Adults but Not Nymphs Can Survive on Conifers Due to Phloem/Xylem Composition.....	18
2.4. Phloem Metabolites of <i>Prunus</i> sp. rather than Infection with 'Candidatus Phytoplasma prunorum' Influence Feeding Behavior of <i>Cacopsylla pruni</i> Nymphs.....	19
3. Discussion.....	21
4. References.....	26
5. Publications.....	34
5.1. Publication 1.....	34
5.2. Publication 2.....	49
5.3. Publication 3.....	74
5.4. Publication 4.....	87
6. Appendix.....	106
Ehrenwörtliche Erklärung.....	106
Danksagung.....	107
Curriculum Vitae.....	109
