Preface — V

Introduction — VII

1	Riemannian geometry — 1
1.1	Riemannian manifolds — 1
1.1.1	Manifolds, maps and vector fields — 1
1.1.2	Riemannian metrics and isometries — 2
1.1.3	The Riemannian connection — 3
1.1.4	Geodesics and the exponential map — 5
1.1.5	Curvature — 6
1.1.6	Jacobi fields — 8
1.1.7	Killing vector fields — 9
1.2	Kähler manifolds — 10
1.2.1	Kähler structures — 10
1.2.2	Curvature — 11
1.2.3	Complex Euclidean spaces — 13
1.2.4	Complex projective spaces — 13
1.2.5	Complex hyperbolic spaces — 14
1.2.6	Complex space forms — 15
1.2.7	Quaternionic Kähler manifolds — 15
1.3	Riemannian symmetric spaces — 16
1.3.1	Riemannian locally symmetric spaces — 16
1.3.2	Cartan decomposition and Riemannian symmetric pairs — 17
1.3.3	Curvature, geodesics and Jacobi fields — 18
1.3.4	Semisimple Riemannian symmetric spaces, rank and duality — 20
1.3.5	Classification of Riemannian symmetric spaces — 21
1.4	Hermitian symmetric spaces — 23
1.4.1	Definition and classification — 23
1.4.2	Complex quadrics — 24
1.4.3	Complex hyperbolic quadrics — 27
1.4.4	Complex 2-plane Grassmannians — 31
1.4.5	Complex hyperbolic 2-plane Grassmannians — 34
2	Submanifolds of Riemannian manifolds — 37
2.1	Fundamental equations of submanifold theory — 37
2.2	Totally geodesic submanifolds — 39
2.3	Curvature-adapted submanifolds — 40
2.4	M -Jacobi fields — 40
2.5	Equidistant hypersurfaces and focal sets — 41

2.6	Tubes — 45
2.7	Homogeneous hypersurfaces — 48
3	Real hypersurfaces in Kähler manifolds — 53
3.1	Submanifolds — 53
3.2	Real hypersurfaces — 55
3.3	Hopf hypersurfaces — 59
3.4	Real hypersurfaces with isometric Reeb flow — 65
3.5	Contact hypersurfaces — 71
3.6	Real hypersurfaces in complex space forms — 84
4	Real hypersurfaces in complex 2-plane Grassmannians — 89
4.1	Basic equations for real hypersurfaces — 89
4.2	Totally geodesic submanifolds — 97
4.3	Homogeneous real hypersurfaces — 99
4.4	Hopf hypersurfaces — 105
4.5	Real hypersurfaces whose maximal quaternionic subbundle is invariant under the shape operator — 109
4.6	Real hypersurfaces with isometric Reeb flow — 122
4.7	Contact hypersurfaces — 129
4.8	The Ricci tensor of Hopf hypersurfaces — 132
4.9	The normal Jacobi operator of Hopf hypersurfaces — 143
4.10	The structure Jacobi operator of Hopf hypersurfaces — 148
5	Real hypersurfaces in complex hyperbolic 2-plane Grassmannians — 153
5.1	Basic equations for real hypersurfaces — 153
5.2	Totally geodesic submanifolds — 158
5.3	Homogeneous real hypersurfaces — 158
5.4	Horospheres — 163
5.5	Tubes around totally geodesic submanifolds — 171
5.6	Hopf hypersurfaces — 179
5.7	Real hypersurfaces whose maximal quaternionic subbundle is invariant under the shape operator — 183
5.8	Real hypersurfaces with isometric Reeb flow — 204
5.9	Contact hypersurfaces — 212
5.10	Pseudo-Einstein real hypersurfaces — 215
6	Real hypersurfaces in complex quadrics — 219
6.1	Basic equations for real hypersurfaces — 219
6.2	Totally geodesic submanifolds — 229
6.3	Homogeneous real hypersurfaces — 232
6.4	Hopf hypersurfaces — 240

6.5	Real hypersurfaces with isometric Reeb flow —	244
6.6	Contact hypersurfaces —	252
6.7	Real hypersurfaces with Reeb parallel shape operator —	259
6.8	The Ricci tensor of Hopf hypersurfaces —	265
7	Real hypersurfaces in complex hyperbolic quadrics —	281
7.1	Basic equations for real hypersurfaces —	281
7.2	Totally geodesic submanifolds —	286
7.3	Homogeneous real hypersurfaces —	287
7.4	Horospheres —	291
7.5	Tubes around totally geodesic submanifolds —	297
7.6	Hopf hypersurfaces —	305
7.7	Real hypersurfaces with isometric Reeb flow —	309
7.8	Contact hypersurfaces —	318
7.9	Further results —	326
8	Real hypersurfaces in Hermitian symmetric spaces —	331
8.1	Structure theory of compact Hermitian symmetric spaces —	331
8.2	Real hypersurfaces with isometric Reeb flow —	340
8.3	Contact hypersurfaces —	353

Bibliography — 363

Index — 369
