Defining and Measuring Digital Competence

1 Scientific Approaches to Identify and Measure Digital Competences	3
<i>Daniel Beimborn and Yannick Hildebrandt</i>	
1.1 Digital Competence Models and Measurement Approaches: Current State of Research ...	3
1.2 The Toolbox: Digital Competence, Competence Models, and the Measurement of Competences	4
1.2.1 Digital Competence and Its Levels	6
1.2.2 Competence Models	7
1.2.3 Competence Measurement	8
1.3 Using the Toolbox: Linking the Concepts	11
1.4 Exemplary Implementation and Evaluation of Competence Profiles	17
1.5 Challenges	21
1.6 Guide for Digital Competence Measurement	22
2 Multidimensional Digital Competence Self-Assessment: Results from the bidt-SZ-Digitalbarometer	25
<i>Roland A. Stürz and Dirk von Gehlen</i>	
2.1 Introduction	25
2.2 Key Findings	28
2.3 Discussion and Implications	39
2.4 Conclusion	41
3 Digital Competence Development from the Viewpoint of the German Association of Personnel Managers BPM Berlin	43
<i>Steffen Fischer</i>	
3.1 Introduction	43
3.2 Inventory Analysis at the Beginning of 2022: BPM Survey on the Question of How Companies Are Preparing for the Digital Future	44
3.2.1 Are there Already Established Digital Concepts or a Digital Strategy in the Companies in 2022?	45
3.2.2 How Does the Development of Digital Competencies Currently Take Place in Companies?	46
3.2.3 What Are the Primary Challenges in the Development of Digital Competencies in Companies?	49
3.2.4 What Are the Central Success Factors in the Development of Digital Competencies in Companies?	52

3.3	Implementation Examples	55
3.4	Change of View – Taking the Perspective of the Employees	57
3.5	Conclusion	57

Digital Competence in Interaction between Business and Institutions, Associations

1	Through Digitalization to a Further Education Country – Perspectives of Europe’s Leading Digital Association Bitkom	61
	<i>Daniel Breitingner</i>	
1.1	Vocational Training Republic of Germany? Taking of an Inventory	62
1.2	What Requirements Will Vocational Training Have in the Future?	63
1.2.1	New Work and Leadership Culture	64
1.2.2	Individualization Is Moving in	65
1.2.3	No Pure Knowledge but Competence Transfer	66
1.3	How Can Companies Overcome the Challenges?	66
1.4	How Can Politics Accompany this Transformation Process?	69
1.5	Summary	72
2	Science and Business in Dialogue – Impulses for Digital Education	73
	<i>Luise Orloff and Katharina Winkler</i>	
2.1	Initial Situation	73
2.2	The Teacher as Learning Attendant and Coach Instead of Knowledge Mediator	80
2.2.1	Pretesting the Concept Idea – Gaining Ideas for the Targeted Design of the Pilot ..	82
2.2.2	Competence Matrix for Teachers	85
2.3	Insights from Operational Practice – Ideas for Transfer	89
2.4	Outlook	92

Managing Digital Competences: Approaches and Projects from Corporate Practice

1	Digital Transformation for Organization and Employees: a Management Guide	97
	<i>Nils Stamm</i>	
1.1	Digital Transformation: Hype or Lived Reality?	97
1.2	Transformation Approaches and Phases	98
1.3	Transformation Levels	99
1.3.1	Digital Business	99
1.3.2	Digital Customer Interface	100
1.3.3	IT & System Architecture	101
1.3.4	Organization	101
1.3.5	Culture	103
1.4	Implementation	103
1.4.1	Vision	104
1.4.2	Targets and Figures	104
1.4.3	Strategy	105
1.4.4	Plan	105
1.4.5	Orchestration	106
1.4.6	Execution	106
1.4.7	Control	107
1.5	Dos and Don’ts of the Digital Transformation	108

2	Digital Mindset Revolution as a Basis for Future-Oriented Competence Development at Coca-Cola Europacific Partners	109
	<i>Caroline Heide and Anna Simon</i>	
2.1	Introduction	109
2.2	Future Skills	110
2.2.1	Monitor Changing Job Requirements and Competencies	110
2.2.2	Competencies in a Digital Environment	111
2.3	Future-Oriented Competence Development within the Supply Chain	113
2.3.1	Changed Learning Requirements and Special Learning Requirements of the Supply Chain	113
2.3.2	Reorientation of the Strategic Competence Management and Our Learning Formats	117
2.3.3	Internal Knowledge Transfer: Learning from Each Other	119
2.4	Change, Trust and Communication	122
2.4.1	Trust as the Basis for Digital Competence	122
2.4.2	New Change & Communication Approaches from Practice	124
2.4.3	Implement the Future Mindset	125
3	Digital Transformation Is 10% Tech and 90% Human – Practical Example Mitsubishi Electric CNC	129
	<i>Roman Gaida</i>	
3.1	Mitsubishi Electric Europe Mechatronics CNC	129
3.2	Leadership in a VUCA World	130
3.3	Mitsubishi Electric Europe CNC – Values	135
4	Digital Competence as a Bridge to the AIoT World	139
	<i>Herbert Prickarz and Alexander Röck</i>	
4.1	Digital Transformation as a Driver of the Need for Action	139
4.2	Expanding the Term “Digital Competence”	141
4.3	What Stays the Same – and What Changes	142
4.4	Understanding and Dealing with Constant Change	143
4.5	Connectedness to Learning Actors in Systems	145
4.6	Challenges for Associates	145
4.6.1	Change of Attitude as a Result of Digitalization	145
4.6.2	Leadership – and Leaders as Multipliers	146
4.7	Challenges for the Organization	148
4.7.1	Vision and Strategy	148
4.7.2	Dynamics and Learning Ability	148
4.7.3	Organizational Culture and Organizational Climate	150
4.8	Emergence and Steering	151
4.9	Concrete Implementation of Digital Competence Development	152
4.9.1	Build-Up of a Competence Model for the Digital Transformation	152
4.9.2	Digital Competence Development per Function	154
4.9.3	Analysis of the Training Landscape Internally and Externally	155
4.9.4	Online Training, Virtual Learning Spaces and Video Platforms	155
4.9.5	eUniversities and External Learning Portals	156
4.9.6	Central Internal Learning Portal	157
4.9.7	Internal Events	158
4.9.8	Development of Digital Cultural Elements	159
4.10	As a Conclusion	160
5	Digital Competence in Pharma Marketing & Sales – Our Learning Journey at AstraZeneca	163
	<i>Jana Sonntag and Milaid Stephan</i>	
5.1	Executive Summary	163
5.2	Regulatory Environment and Context for Change	164
5.2.1	The German Healthcare System	164
5.2.2	Digitalization in Healthcare	164
5.2.3	COVID-19 as Catalyst for Digital Transformation	164

5.3	The “New Normal” in Pharma Marketing and Sales	165
5.3.1	The Sales Rep as Orchestrator of Omnichannel	165
5.3.2	Marketing as Omnichannel Strategist	168
5.3.3	Medical as the Kingmaker	169
5.4	Capabilities for the New Way of Working	171
5.4.1	Love Change – Digital Is Natural	171
5.4.2	Collaboration & Project Management – Agile to Work Effectively across Siloes ...	172
5.4.3	Data Is King – Know How to Transform Data into Insights into Actions	173
5.4.4	IT is Queen – Know Why and How to Use IT Tools and Systems	175
5.4.5	Learning Management Is Key to Success – from Product Training to Capability Building	176
5.5	Conclusion	177
6	One Prime Operations: Digital Competence Development in the Production Ecosystem of Airbus Defence and Space	179
	<i>Elvire Meier-Comte</i>	
6.1	Introduction: The Digital Transformation at Airbus	179
6.2	Digitalization and Competence Development at Airbus Defence and Space (DS)	182
6.2.1	Values and Cultural Foundation at Airbus DS	182
6.2.1.1	The Value Journey and Business Purpose	182
6.2.1.2	The Human-Centric Business Ecosystem at the Core of the Digitalization of Operations	186
6.2.2	Airbus Learning Framework for the Development of Digital Competences	187
6.2.2.1	Airbus Competence Strategy Framework	188
6.2.2.2	Community of Practice and Ecosystem Learning	191
6.3	Industry 4.0 Activities and Competence Development	193
6.3.1	ERP Standardization and End to End Approach of DDMS	194
6.3.1.1	DDMS Use Case	194
6.3.1.2	DDMS Competence Development	195
6.3.2	Production and Manufacturing	196
6.3.2.1	Use Case: Electrical Manufacturing Troubleshooting Assistant (AI)	197
6.3.2.2	AI Troubleshooting Competence Development	199
6.3.2.3	Use Case: the Human Factory – Operators’ Health and Safety Monitoring Tools (IIoT, Cyber Security, Data Analytics)	201
6.3.2.4	Human Factory Competence Development	202
6.3.3	Procurement	204
6.3.3.1	Use Case: Data Lake as Foundation for Data Analytics in Supply Chain and Quality Operations	204
6.3.3.2	Procurement Analytics Competence Development	205
6.3.4	Quality	207
6.3.4.1	Use Cases: Quality Analytics	208
6.3.4.2	Quality Analytics and Competence Development	210
6.4	Conclusion	212
7	Introduction of Competence-Oriented Learning and Development in Operations of Infineon Technologies AG – a Field Report	215
	<i>Andrea Stich</i>	
7.1	Objectives, Target Groups and Implementing Organization in Operations	216
7.1.1	Target Group – Which Target Group Was Prioritized and Why?	219
7.2	Framework Process	221
7.2.1	Competence Model	221
7.2.2	Competence Profiles	223
7.2.3	Competence-Oriented Curricula – “Curricula”	226
7.2.4	Training Needs Analysis and Continuing Education Offerings Following Infineon’s Learning Philosophy	227

7.3	The 6 STEPs of the Competency Management Process Developed for Operations	228
7.3.1	Roles and Responsibilities	230
7.3.1.1	Procedure	230
7.3.1.2	Practical Examples from the Pilot Project	230
7.3.2	Assignment of Detailed Tasks to Job Roles	234
7.3.2.1	Procedure	234
7.3.2.2	Practical Examples from the Pilot Project	234
7.3.3	Derivation and Definition of Competencies Required to Perform Tasks	235
7.3.3.1	Procedure	236
7.3.3.2	Practical Results from the Field of Industrial Engineering (IE)	236
7.3.4	Definition of Competence Profiles and Their Target Characteristics	238
7.3.4.1	Procedure	238
7.3.4.2	Practical Examples from the Pilot Project	238
7.3.5	Assignment of Employees to the Corresponding Competence Profiles and Individual Assessment	241
7.3.5.1	Procedure	241
7.3.5.2	Practical Examples from the Pilot Project	241
7.3.6	Assignment of Appropriate Learning and Development Plans	243
7.3.6.1	Procedure	243
7.3.6.2	Practical Examples from the Pilot Project	243
7.4	Rollout to the Pilot Area and Other Areas in Operations	245
7.5	Lessons Learned	246
7.5.1	What Went Well?	246
7.5.2	What Have We Learned?	247
7.6	Conclusion	248
8	Digitalization in Vocational Education and Training: towards the Operationalization of Knowledge and Skills	251
	<i>Jürgen Hollatz and Barbara Ofstad</i>	
8.1	Introduction	251
8.2	Development of Strategy in Vocational Education and Training	252
8.2.1	Digitalization Project	252
8.2.2	Future Competencies	253
8.2.3	Digitalization Roadmap and Culture Change	254
8.3	Learning in Vocational Education and Training (VET)	256
8.3.1	Training Concept for Learners	256
8.3.2	Role of the Trainer	258
8.3.3	Competency Evaluation	259
8.4	Shaping the Future	261
8.4.1	Product Lifecycle Management (PLM) Process in Vocational Education and Training	261
8.4.2	Learning in an Ecosystem	263
8.4.3	Upskilling/Reskilling	263
8.5	International Aspects	264
8.6	Summary and Outlook	264

IV Managing Further Education and Learning: Approaches and Projects from Corporate Practice

1	The Story of the Dream of the Audi Learning Valley to the Reality of Audi Virtual Trainings (AVT) ..	269
	<i>Heiko Schmidt and Christiane Nicolai</i>	
1.1	The Dream	269
1.2	The First Steps into Reality	270
1.3	Dealing with the "Others"	271

1.4	Step by Step towards Reality or the Real World Powered by Game Technology	272
1.5	From the Construction to the Model	274
1.5.1	From the Maya Model to the Real-Time Model with Texture	274
1.5.2	The Architecture	275
1.6	Learning Content with Gamification	277
1.7	Motivation through Gamification	280
1.8	Further Development: from Audi Virtual Training Emerges Audi Learning Valley	281
1.9	The Dialog Editor	284
1.10	Qualification Paths with Audi Virtual Training	286
1.11	AVT Management Portal	287
1.12	To Sum It Up	287
2	Shaping Tomorrow with You – Successfully Designing Educational Pathways in the Digital Transformation	289
	<i>Felicitas Birkner</i>	
2.1	Summary	289
2.2	Fujitsu – a DX Company on the Road to a Digital Future	290
2.3	Variety Paves the Way into the Digital Future	302
2.4	Developing Creative Learning Experiences	317
2.5	Making Becomes a Success Factor in the Transformation	321
3	Digital Competence Enhancement at Continental – E-Learning as a Basis and Overview of the Transformational Qualification	325
	<i>Andrea Schindler and Sebastian Borchers</i>	
3.1	The Design of Transformation at Continental – Initial Situation and Approach	325
3.2	Implementation of Industry 4.0 – Future Learning as a Framework for Uniform and Broad Qualification in Digital Basic Competencies	326
3.3	Emergence and Creation of Target Group-Oriented Learning Modules for the Development of Digital Competencies	330
3.4	Implementation in the Group – Reaching Employees Is Crucial	336
3.5	Outlook	339
4	IBM “Your Learning” – How New Rules Transform Learning	341
	<i>Lutz Marten</i>	
4.1	Summary	341
4.2	The Principles of IBM Your Learning	344
4.3	The Approach	345
4.4	Experiences and Lessons Learned from the “Your Learning” Project	349
4.4.1	Marketing	349
4.4.2	Continuous Learning	350
4.4.3	Curiosity as a Driving Force for Learning	351
4.5	The Future	354
5	A Learning Organization as Business Enabler – We Invite You to Our Journey	359
	<i>Ann-Kathrin Heinemann-Becker and Nina Rauwald</i>	
5.1	Atlas Copco – an Industrial Company that Innovates Constantly	359
5.1.1	Company Culture Enables Continuous Learning	361
5.1.2	Behaviors that Enable Learning Organizations	362
5.1.3	Summary	363
5.2	A Learning Organization	364
5.2.1	Learning Vision & Mission	364
5.2.2	Learning Infrastructure	365
5.2.3	Key Learning Perimeters for Success: People Management Strategy	367
5.2.3.1	Key Figures and KPI's	368
5.2.3.2	Proud and Transparent Learning Communication	368
5.2.4	Groupwide Initiatives and Initial Successes to Celebrate	369
5.2.4.1	Learning Culture Award	369
5.2.4.2	Learning Week 2021 – Learning Festival 2022	369
5.2.5	Summary and Outlook	370

V

Digital Competences: Perspectives from SMEs

1	Competence Management in Medium-Sized Companies – Success Factor and Challenge	375
	<i>Rahild Neuburger</i>	
1.1	Starting Point	375
1.2	Holistic Competence Management – an Introduction	376
1.3	Success Factor Competence Management in Medium-Sized Companies	377
1.4	Challenge of Competence Management in Medium-Sized Companies	379
1.5	Steps and Levers of Competence Management	381
1.5.1	Strategic Competence Analysis	381
1.5.2	Actual Competence Analysis	384
1.5.3	Concepts of Competence Development	385
1.5.4	Adjusting Lever	388
1.6	Goal: Future-Oriented Further Development	390
2	Digital Learning for Shop Floor Employees in Medium-Sized Companies	393
	<i>Wolfgang Gallenberger</i>	
2.1	Initial Situation in the Example Company	393
2.2	Employees without System Access vs. System-Side Requirements for the Distribution of E-Learnings	395
2.3	Alternatives for Production Employees	395
2.3.1	Alliances (Extend the Use Case)	396
2.3.2	On-Site Learning with Internal Hosting	396
2.3.3	External Hosting for Production Employees	397
2.3.4	The Chosen Compromise in the iN4.ORM Project	398
2.4	Problems with the Place of Learning	400
2.4.1	Production-Related Learning Stations – Is it Worth Setting Up?	400
2.4.2	Blue-Collar Workers Learning at Home?	400
2.5	Cyber Security	401
2.5.1	You Must Walk Over Seven Bridges (Our Case Study – Setting It Up on Your Own Device)	401
2.5.2	Another Obstacle: Acceptance of Personal Access to the Company Network	403
2.6	Management Involvement and iN4.ORM Live Events	403

VI

Selected Application and Partial Areas of Digital Competence

1	Hands-On Cobots in Practice: Potentials, Applications and Further Training Requirements from the Universal Robots Perspective	407
	<i>Andrea Alboni and Sven Krüger</i>	
1.1	Automation for Everyone: How Cobots Revolutionized Industrial Robotics	407
1.2	Don't Be Afraid of Collaborative Robotics: Automation as a Response to Demographic Change and Labor Shortages	409
1.3	Cobots in Practice: How Companies Are Automating Their Production with Collaborative Robots	411
1.3.1	From Production Assistant to Cobot Expert	411
1.3.2	Partnership instead of Competition	412
1.4	Fit for New Working Worlds: Robotics as a Necessary Learning Content in Education and Training	413
1.5	Innovative Learning Concepts for Competence Transfer	416
1.5.1	The UR Academy	416
1.5.2	The UR Education Concept	418
1.6	Cobots in the Classroom: Practical Examples from Germany, the Czech Republic and Denmark	421

2	Data Competence as a Central Building Block of a Data Strategy: from Vision to Roadmap	425
	<i>Katharina Schüller</i>	
2.1	Summary	425
2.2	Importance and Classification of the Data Strategy	426
2.2.1	Importance of the Data Strategy	426
2.2.2	Classification of the Data Strategy	427
2.2.2.1	Relevant Trends in Technology and Market as Drivers	427
2.2.2.2	Integration into the Corporate Strategy	427
2.3	Success Factors of a Sustainable Data Strategy	429
2.3.1	Data Competence as a Cluster of Effective Modes of Action in the Value Creation Process	430
2.3.2	Process Focus in the Workshops	431
2.4	The Data Strategy in Detail	432
2.4.1	Vision and Mission/Activity Fields of the Data Strategy	432
2.4.2	Task Areas and Building Blocks of the Data Strategy according to the STAT-UP Data Strategy Reference Model	433
2.4.3	Tasks of the Data Strategy	433
2.4.3.1	Data Governance	434
2.4.3.2	Quality and Risk Management	435
2.4.3.3	Data and Information Management	436
2.4.3.4	Change Management	437
2.4.3.5	Target Image	438
2.4.4	Building Blocks of the Data Strategy	439
2.4.4.1	Structures	440
2.4.4.2	Rules	441
2.4.4.3	Processes	441
2.4.4.4	Roles	442
2.4.4.5	Competences	443
2.4.4.6	Reference to the Data Value Creation Process	445
2.5	Use Cases and their Contribution to the Data Strategy	446
2.5.1	Classification of Use Cases in the Data Value Creation Process	446
2.5.2	Roadmap of Use Cases	447
2.5.3	Implementation of the Use Cases in Data Labs	450
2.5.4	Roadmap of Measures to Increase Data Literacy	451
2.6	Outlook	453
3	Artificial Intelligence in Business and Industry – Identifying and Imparting Competencies for Different Target Groups	457
	<i>Ute Schmid and Sebastian Kiefer</i>	
3.1	Motivation	457
3.2	The Research Field of Artificial Intelligence	458
3.3	Machine Learning Methods	460
3.4	Challenges: Data Quality and Comprehensibility	463
3.5	Case Study: Convolutional Neural Networks (CNNs) for Quality Control in Industrial Production	466
3.6	Case Study: Natural Language Processing	467
3.7	Target-Group-Specific AI Competencies	469
4	Guide: Systematic Competence Development in the Smart Factory Environment	475
	<i>Nils Luft and Angela Luft</i>	
4.1	Introduction	475
4.2	Vision and Reality – a Not-so-brief Comparison	476
4.2.1	The Vision of the Smart Factory	477
4.2.2	Today's Factory – the Status Quo	478
4.3	The Delta and Some of Its Causes	480
4.4	Competencies for the Factory of the Future	483
4.4.1	Basic Competencies	484
4.4.1.1	Lean Management and Shopfloor Management	484

4.4.1.2	Data Literacy	487
4.4.1.3	Change-Management and Transformation	488
4.4.1.4	Digital Business Model Development	490
4.4.2	Technology Competencies	491
4.4.2.1	Embedded Systems, Sensors and Actuators (CPS)	491
4.4.2.2	Collaborative Robotics and Autonomous Systems	492
4.4.2.3	Additive Manufacturing	492
4.4.2.4	Advanced Assistance Systems	493
4.4.2.5	Artificial Intelligence	494
4.4.3	Development Competencies	495
4.4.4	Conclusions	499
4.5	Summary	501
4.6	Outlook	502

VII Change Processes in the Context of Digital Competence

1	Management – The Bottleneck in Digital Transformation?	507
	<i>Philipp Ramin</i>	
1.1	An Error in the Formula?	507
1.2	Digitalization on the Backburner	508
1.3	Long Live Benchmarks	510
1.4	Back to School	511
1.5	Digital Transformation Needs Learning Organizations and Companies	517
1.6	Enough of Trends – Just Do It	519
2	Can You Teach an Old Analog Dog New Digital Tricks?	521
	<i>Martin Dowling and Michael Dowling</i>	
2.1	Introduction	521
2.2	Overview of Disruption Theory	523
2.3	Competences and Disruption	525
2.4	Competence from a Psychological Perspective	527
2.5	Conclusions and Recommendations	532
3	Resistance and Acceptance Behavior in Digital Competence Development	535
	<i>Kim Leonardo Böhm and Erich Renz</i>	
3.1	Introduction Learning vs. Applying	535
3.2	Resistance and Acceptance in the Digital Transformation	536
3.3	Acceptance and Resistance Behavior When Changing from the Old to the New Working Environment	537
3.4	Acceptance and Resistance Behavior in the Process of Competence Acquisition	539
3.4.1	Personal Factors	540
3.4.2	Organizational Factors	543
3.5	Acceptance and Resistance Behavior in the Process of Competence Application	545
3.5.1	Personal Factors	545
3.5.2	Organizational Factors	548
3.6	Conclusion	549
4	The Impact of Change Management to Accelerate Digital Competences	555
	<i>Robert Neumann and Beate Kreiner</i>	
4.1	Digitalization – New Answers to Familiar Questions or Reason to Ask Anew?	555
4.2	The “Corporate Maturity & Alignment Navigator (CAN) [®] ” for Route Planning of Digital Competence Development	559
4.3	Digitalization as a Process of Organizational Development and How Change Management Can Be Supportive	562

4.4	Principles and Guidelines for Successful Realization of Digital Competence Development	570
4.5	Effective Routing through the Digitalization Landscape Needs Leadership Maturity	574

VIII Transformation of the Finance Sector: Analysis and Solution Approaches from Different Competence Perspectives

1	Working in the Financial Sector 4.0	579
	<i>Laura Stiller</i>	
1.1	Introduction	579
1.2	Technology	580
1.2.1	Platforms	580
1.2.2	Artificial Intelligence	584
1.2.2.1	Chatbots and Virtual Assistants	585
1.2.2.2	Recommendation Systems	585
1.2.2.3	Robo-Advice	586
1.2.2.4	Fraud and Risk Assessment	586
1.2.3	Blockchain	588
1.3	Personnel Development of Digital Competencies	589
1.3.1	Commerzbank, Goldman Sachs & JP Morgan	589
1.3.2	HSBC	590
1.3.3	Bank of America	590
2	Digital Competences in Corporate Banking	595
	<i>Silvio Andrae</i>	
2.1	Introduction	595
2.2	Digital Capabilities in Corporate Banking	596
2.2.1	Business Model of Corporate Banking	596
2.2.2	Customer Relations	597
2.2.3	Operating Model	599
2.3	Technologies in Corporate Banking	599
2.3.1	Ecosystem Establishment	601
2.3.2	Integration of Physical and Digital Processes	602
2.3.3	Realignment of Transaction Flows	603
2.3.4	Reinterpretation of Core Functions	604
2.4	Digital Competencies	605
2.4.1	Competence Framework	606
2.4.2	Application in Corporate Banking	610
2.5	Acquisition of Competencies	612
2.5.1	Multifaceted Qualifications	613
2.5.2	On-Demand Staffing Work	615
2.5.3	Automation and the Role of the Machine	617
2.5.4	Lessons Learned	618
2.6	Conclusion	620
3	Digital Competence in Public Service – Challenges and Role of Continuing Education and Training: The Example of Deutsche Bundesbank	623
	<i>Annika Müller de Vries</i>	
3.1	Introduction	623
3.2	Digital Transformation: Challenges for the Bundesbank and Its Training Section	625
3.2.1	Why Does Digital Competence Go from Important to even more Important in the Bundesbank?	625
