Abstract	iii
Acknowledgements	vii
List of Abbreviations	xiii
List of Figures	xv
List of Tables	xxiii

I Introduction **1**

1 Motivation	3
1.1 The rise of Wearables and Big Data in sports	3
1.2 Endurance running - the early adopter of wearables	5
1.3 Objectives of the thesis	6
1.4 Contributions	7
1.5 Overview of the thesis	10

II Fundamentals & state of the art **11**

2 Fundamentals in sports science	13
2.1 Spatio-temporal parameters and foot kinematics in endurance running	13
2.1.1 Stride phases and stride events	14
2.1.2 Stride length, stride time and velocity	15
2.1.3 Foot joint angles	16
2.1.4 Laboratory measurements	20
2.2 Physiology of endurance running	21
2.2.1 Basics of exercise physiology	21
2.2.2 Laboratory measurements	24
3 State of the art	27
3.1 Wearables in endurance running	27
3.1.1 Sensor systems	27
3.1.2 Applications of IMUs in endurance running	29

3.1.3	Data processing for spatio-temporal and kinematic parameters using foot-mounted IMU	33
3.2	Big Data analysis using data of wearables	47
3.2.1	Overview of Big Data process	47
3.2.2	Databases	51
3.2.3	Applications with data of wearables from fitness platforms	53

III Contributions 55

4	Evaluation of algorithms for IMU data processing	57
4.1	Introduction	58
4.1.1	Literature Review	58
4.1.2	Contribution	60
4.2	Methods	61
4.2.1	Data Collection	61
4.2.2	Algorithms	64
4.2.3	Evaluation	75
4.3	Results	75
4.3.1	Lab Study	75
4.3.2	Field Study	77
4.4	Discussion	80
4.4.1	Comparison to Existing Literature	80
4.4.2	Lab Study	81
4.4.3	Field Study	87
4.5	Conclusions and Future Work	88
4.6	Author contributions	89
5	Evaluation of IMU sensor position	91
5.1	Introduction	92
5.2	Methods	94
5.2.1	Definition of spatio-temporal parameters	94
5.2.2	Data set	95
5.2.3	Algorithm	100
5.2.4	Evaluation	109
5.3	Results	111
5.3.1	Results of raw data similarity	111
5.3.2	Results of spatio-temporal parameters	113
5.4	Discussion	115
5.4.1	Differences in raw data	115

5.4.2	Temporal parameters	116
5.4.3	Spatial parameters	117
5.4.4	General aspects	120
5.5	Conclusion	121
5.6	Author contributions	122
6	Big Data Analysis on Fitness platform data	123
6.1	Introduction	124
6.2	Methods	126
6.2.1	Data set	126
6.2.2	Data processing	126
6.2.3	Evaluation	133
6.3	Results	134
6.3.1	Plausibility of the data set	134
6.3.2	Evaluation of response groups	134
6.3.3	Evaluation of training characteristics	134
6.4	Discussion	138
6.4.1	Plausibility of the data set	138
6.4.2	Evaluation of response groups	141
6.4.3	Evaluation of training characteristics	142
6.4.4	Limitations	143
6.5	Conclusion	143
6.6	Author Contributions	144
IV	Perspectives	145
7	Discussion	147
7.1	IMU analysis in endurance running	147
7.2	Big Data analysis in endurance running	150
8	Conclusion & Outlook	153
	Bibliography	155
