Preface — VII

1	Local polynomial approximation over convex domains in $\mathbb{R}^n$ — 1
1.1	Geometric properties of regular bounded domains — 1
1.2	Moduli of smoothness — 6
1.2.1	Definitions and basic properties — 6
1.2.2	K-functionals and moduli of smoothness — 8
1.2.3	Marchaud inequalities — 10
1.3	Algebraic polynomials over domains — 15
1.4	The Bramble–Hilbert lemma for convex domains — 17
1.5	The Whitney theorem for convex domains — 26
2	Anisotropic multilevel ellipsoid covers of $\mathbb{R}^n$ — 37
2.1	Spaces of homogeneous type — 37
2.2	Construction and properties of ellipsoid covers — 41
2.3	Quasi-distances induced by covers — 51
2.4	Equivalency of covers — 55
2.5	Spaces of homogeneous type induced by covers — 60
3	Anisotropic multiresolution analysis — 67
3.1	Multiresolution kernel operators — 67
3.2	A multilevel system of bases — 69
3.2.1	Coloring the ellipsoids in Θ — 69
3.2.2	Definition of single-level bases — 70
3.2.3	Local projectors onto polynomials — 75
3.3	Construction of the anisotropic multiresolution kernels — 78
4	Anisotropic wavelets and two-level splits — 85
4.1	Wavelet decomposition of spaces of homogeneous type — 85
4.2	Two-level splits — 89
4.3	Anisotropic wavelet operators — 92
4.4	Anisotropic discrete wavelet frames — 96
5	Anisotropic smoothness spaces — 103
5.1	Anisotropic moduli of smoothness — 104
5.1.1	Definition and properties — 104
5.1.2	The anisotropic Marchaud inequality — 107
5.1.3	The anisotropic Ul'yanov inequality — 109
5.2	Comparing the moduli $\omega_r(\cdot, \cdot)_p$ and $\omega_{\Theta, r}(\cdot, \cdot)_p$ — 113
5.3	Anisotropic Besov spaces — 114

X — Contents

5.3.1	Definitions and properties —	114
5.3.2	Examples of adaptive covers —	117
5.3.3	Equivalent seminorms —	123
5.4	Adaptive approximation using two-level splits —	127
5.5	Anisotropic Campanato spaces —	131
6	Anisotropic Hardy spaces —	135
6.1	Ellipsoid maximal functions —	135
6.2	Anisotropic Hardy spaces defined by maximal functions —	146
6.3	Anisotropic atomic spaces —	159
6.3.1	The inclusion $H_{q,l}^p(\Theta) \subseteq H^p(\Theta)$ —	160
6.3.2	The Calderón–Zygmund decomposition —	166
6.3.3	The inclusion $H^p(\Theta) \subseteq H_{q,l}^p(\Theta)$ —	181
6.4	The space $BMO(\Theta)$ —	189
6.5	Classification of anisotropic Hardy spaces —	192
6.6	Anisotropic molecules —	198
6.7	Finite atomic spaces —	203
6.8	The anisotropic dual Campanato spaces —	212
7	Anisotropic singular operators —	217
7.1	Anisotropic singular operators on $H^p(\Theta)$ —	222
7.2	Anisotropic singular operators on smooth molecules —	228

Bibliography — 233

Index — 237
