List of symbols	XIII
List of abbreviations	XVII
1 Introduction	1
2 Background	5
2.1 Aircraft fuselage components	5
2.2 Sound waves in 3D structures Ω_{s3} and 2D shells Ω_{s2}	10
2.3 Sound waves in 3D acoustic fluids Ω_a	16
2.4 Discretisation with finite elements	20
2.5 Solution of large sparse linear systems	25
2.6 Perception of sound	35
3 Related work	39
3.1 Experimental studies of aircraft cabin noise	40
3.2 Numerical analysis of aircraft cabin noise	42
3.3 Contribution of this thesis	47
4 Characterisation of aircraft components	49
4.1 Airframe	50
4.2 Insulation	66
4.3 Interior lining	85
4.4 Passenger cabin	100
4.5 Assembled aircraft model	111
5 Efficient solving approaches	117
5.1 Symmetry	117
5.2 Frequency-adaptive meshes	119
5.3 Weak coupling	122
5.4 Scalability and solver setting	124
5.5 Domain length	129
5.6 Conclusions and further ideas	132

6 Application	135
6.1 Jet excitation by two different engines	137
6.2 Turbulent boundary layer excitation	141
7 Summary and outlook	151
Bibliography	155
List of figures	iii
List of tables	ix
A Appendix	xi
