1	Introduction	1
1.1	Motivation	1
1.2	Background	3
1.3	Outline	3
1.4	Notation	5
1.5	Problem Formulation	6
2	Event-Triggered Gradient-Based DMPC	13
2.1	Background	13
2.2	Distributed Fast Gradient Method	14
2.3	Event-Based Distributed Fast Gradient Method	15
2.3.1	Primal Error Calculation	16
2.3.2	Dual Error Calculation	18
2.4	Event-Based Distributed Algorithm	19
2.4.1	Selection of the Threshold	19
2.4.2	Convergence	20
2.4.3	Stopping Condition	22
2.5	Computational Study	22
2.6	Conclusions and Future Work	23
3	Dual ADMM for DMPC	25
3.1	Background	25
3.2	Consensus Form of ADMM	26
3.3	Dual ADMM	28
3.3.1	Dual Problem	29
3.3.2	Augmented Connection Graph	29
3.3.3	Dual ADMM Algorithm	31
3.4	Computational Study	33
3.5	Conclusions and Future Work	34
4	Stabilizing DMPC with Suboptimality Guarantee	37
4.1	Background	37
4.2	Stability in DMPC without Terminal Cost and Constraint	38
4.3	Determination of the Tightening Parameter	43
4.3.1	Suboptimality Bound	43

4.3.2	Selection of the Slater's Vector	45
4.3.3	Modified Stabilizing Algorithm	47
4.4	Computational Study	49
4.5	Conclusions and Future Work	51
5	Stabilizing DMPC with Relaxed Suboptimality	53
5.1	Background	53
5.2	Gradient-Based Stabilizing DMPC	54
5.2.1	Initialization and Infeasibility Detection	55
5.2.2	Convergence	57
5.2.3	Distributed Implementation	60
5.2.4	Closed-Loop Behavior	63
5.3	ADMM-Based Stabilizing DMPC	64
5.4	Computational Study	68
5.5	Conclusions and Future Work	70
6	Determination of the Admissible Set	73
6.1	Background	73
6.2	Non-Convexity of the Admissible Set	73
6.3	Calculation of a Convex Subset for the Admissible Set	75
6.4	Reformulation of the Bilevel Problem as an MILP	77
6.4.1	Infinity Norm	77
6.4.2	Complementarity Constraints	78
6.5	Relationship between the Admissible Set and the Region of Attraction . .	79
6.6	Computational Study	80
6.7	Conclusions and Future Work	81
7	Summary and Evaluation	83
7.1	Summary	83
7.2	Evaluation and Implementation	84
A	Fundamentals	87
A.1	Convex Optimization	87
A.1.1	Convex Functions	87
A.1.2	Convex Optimization Problems	87
A.1.3	First-order Optimality Condition	88
A.1.4	Lipschitz Continuity	88
A.1.5	Gradient Methods	88
A.2	Duality	89
A.2.1	The Lagrangian	89
A.2.2	Dual Function	89
A.2.3	The Lagrange Dual Problem	90
A.2.4	Slater's Constraint Qualification	90
A.2.5	KKT Conditions	90

A.3	Decomposition Methods	91
A.3.1	Primal Decomposition	91
A.3.2	Dual Decomposition	91
A.4	Alternating Direction Method of Multipliers	92
A.5	Model Predictive Control	93
B	Benchmark Systems	95
B.1	Benchmark System 1	95
B.2	Benchmark System 2	96
B.3	Benchmark System 3	98
	Bibliography	100
	Curriculum Vitae	110
