

Content

Preface	5
Content	7
Circular Economy Empowered by Data	11
Johannes Jacoby, Christian Korsten, Felix Flemming	
Relevance and challenges of plant control in the pre-processing stage for enhanced sorting performance	17
Bastian Küppers, Sabine Schlögl, Nils Kroell, Verena Radkohl	
Assessment of sensor-based sorting performance for light-weight packaging waste through sensor-based material flow monitoring: Concept and preliminary results	35
Nils Kroell, Tobias Dietl, Abtin Maghmoumi, Xiaozheng Chen, Bastian Küppers, Alexander Feil, Kathrin Greiff	
Quantifying the Delabelling Performance using Sensor-based Material Flow Monitoring	55
Sabine Schlögl, Bastian Küppers	
Challenges faced during a near-infrared-based material flow characterization study of commercial and industrial waste	71
Kerstin Kleinhans, Bastian Küppers, Juan Carlos Hernández Parrodi, Kim Ragaert, Jo Dewulf, Steven De Meester	
Increase throughput and sorting quality with flow control	85
Stefan Heinrichs, Raphael Stein, Andreas Roper Yearwood, Nico Schmalbein	
Sensor-based sorting and the Circular Economy	99
Mathilde Robben, Daniel Swaab, Jens-Michael Bergmann	
Sorting of Construction and Demolition Waste for coarse fractions	105
Sebastian Müller, Anette Müller, Ines Döring, Ulrich Palzer	

Systematic Determination of the Influence of Factors Relevant to Operating Costs of Sensor-based Sorting Systems 113
Jan Ludwig, Merle Flitter, Georg Maier, Albert Bauer, Marcel Reith-Braun,
Robin Gruna, Harald Kruggel-Emden, Thomas Längle, Jürgen Beyerer

SenSoRe: A sensor-based testbed for sorting and innovative recycling 133
Louise Hagesjö, Méline Gilbert Gatty, David Malmström, Jonas Petersson

Latency evaluation of an FPGA-based sorting system 143
Simon Wezstein, Michael Stetzel, Michael Heizmann

Material Value Estimation for Recycling of Waste Printed Circuit Boards (WPCBs) by a Deep-Learning-assisted Approach on X-Ray Images 161
Markus Firsching, Steffen Rüger, Wladislaw Benner, Malte Vogelgesang, Alexander Ennen

Artificial Intelligence-based Particle Size Prediction for Solid Waste Particles. 179
Lisa Kandlbauer, Karim Khodier, Renato Sarc

INSTAnT
Innovative sensor technology for optimised material recovery from bottom ash treatment. 187
Liesbeth Horckmans, Roeland Geurts, Wenzhi Liao, Kris Broos, Karen De Boeck,
Auriane De Coster, Peter Segers, Denis Van Loo, Kay Johnen, Alexander Feil,
Lisa Höflechner

Deep-Learning-based Aluminum Sorting on Dual Energy X-Ray Transmission Data 199
Steffen Rüger, Jann Goschenhofer, Ayush Nath, Markus Firsching, Alexander Ennen, Bernd Bischl

Rapid GEOSCAN fully penetrative analysis enabling bulk diversion 219
Luke Balzan, Henry Kurth

The impact of mixing and scale on the bulk ore sorting potential of a panel cave mine 235
Mahir Can Cetin, Bern Klein, Stefan Nadolski

Mineral process sampling and analysis using X-ray computed tomography – a feasibility test results on cassiterite ore. . . . 237

Christopher Robben, Pedro Condori, Gerhard Zacher, Andreas Staude,
Aysa Moslemiyekan, Kim Esbensen

New Protocols for Pre-Concentration Sampling and Testing 253

Bob McCarthy, Adrian Dance

Laser sensors enable robotic sorting for tool alloys recycling. . . . 273

Cord Fricke-Begemann, Frederik Schreckenberger, Martin Geisler,
Michaela Lindemann

Importance of Sensor Based Sorting to Sound Metals Recycling . 281

Shuji Owada

Sorting of post-consumer aluminium scrap using Laser-Induced Breakdown Spectroscopy (LIBS) and machine learning 291

Simon Van den Eynde, Dillam Jossue Diaz-Romero, Bart Engelen,
Alexander Eckert, Luc Waignein, Jörn Vandewalle, Isiah Zaplana, Jef Peeters
