Preface — V

1	Graphics in Mathematica® — 1
1.1	Built-in functions — 1
1.2	Example 1: Roots of unity — 38
1.3	Example 2: The complex exponential map — 41
1.4	Example 3: Creation of a torus by rotating a circle — 46
2	Regions in Mathematica® — 49
3	Differential equations — 71
3.1	Differentiation in Mathematica® revisited — 71
3.2	Built-in functions to solve differential equations and systems — 73
4	Differential geometry of curves and surfaces in Mathematica® — 89
4.1	The Wolfram Knowledgebase — 89
4.2	Vectors in Mathematica® — 99
4.3	Curves — 101
4.3.1	A physical interpretation of a curve in $\mathbb{R}^n$ — 101
4.3.2	Implicitly defined curves — 107
4.3.3	Parametric plots of curves in 2D and 3D — 111
4.3.4	Length of parametric curves and the function ArcLength — 117
4.3.5	Unit (arclength) parametrization — 119
4.3.6	Curvature of a curve in $\mathbb{R}^n$ — 124
4.3.7	Signed curvature of a plane curve — 127
4.3.8	Evolutes and involutes for plane curves — 129
4.3.9	Curvature of implicitly defined plane curves — 137
4.3.10	Drawing plane curves with assigned curvature — 146
4.3.11	Envelopes — 147
4.3.12	Curves in $\mathbb{R}^3$ — 152
4.4	Surfaces — 161
4.4.1	Drawing surfaces using curves — 162
4.4.2	A tangent space and a normal to a smooth surface — 170
4.4.3	Metrics on a surface: The first and second fundamental forms — 172
4.4.4	Curves and frames on a torus — 183
4.4.5	Geodesics — 187
4.4.6	The tangent cone — 191
5	Elements of the theory of special functions — 197
5.1	Linear special functions — 197

5.2	The Gauss hypergeometric function —	201
5.3	Legendre polynomials —	203
5.4	Example: Discrete orthogonal polynomials —	206
5.5	Nonlinear special functions and Painlevé transcendents —	208
6	Elliptic functions —	215
6.1	The generalized sine function —	215
6.2	Algebraic addition theorems —	229
6.3	The Weierstrass elliptic function —	231
6.4	Example: Addition formulas for the Weierstrass elliptic function —	239
7	Elements of complex analysis —	241
7.1	Complex numbers and functions —	241
7.2	Example 1: Möbius transformation —	243
7.3	Example 2: The conformal mapping $w = z^2$ —	243
7.4	Example 3: The Cauchy residue theorem —	260
Bibliography — 263		
Index — 265
