Selenium 1.0 Testing Tools

Beginner's Guide

Test your web applications with multiple browsers using the Selenium Framework to ensure the quality of web applications

Preface 1

Chapter 1: Getting Started with Selenium IDE 7

Important preliminary points 8
What is Selenium IDE 8
Time for action – installing Selenium IDE 8
Selenium IDE 9
Selenium IDE icons 10
Important note 12
Time for action – recording your first test with Selenium IDE 13
Updating a test to assert items are on the page 15
Time for action – updating a test to verify items on the page 15
Comments 18
Time for action – adding Selenium IDE comments 18
Multiple windows 20
Time for action – working with multiple windows 20
Time for action – switching between multiple windows 22
Selenium tests against AJAX applications 23
Time for action – working on pages with AJAX 23
Time for action – working with AJAX applications 25
Storing information from the page in the test 26
Time for action – storing elements from the page 27
Debugging tests 28
Time for action – debugging tests 28
Test suites 28
Time for action – creating test suites 29
Saving tests 30
What you cannot record 30
Summary 31

Chapter 2: Locators 33
Important preliminary points 34
Locating elements by ID 35
Time for action – finding IDs of elements on the page with Firebug 35
Time for action – finding elements by ID 36
Moving elements on the page 37
Time for action – finding elements by name 38
Adding filters to the name 39
Time for action – finding elements by link text 39
Time for action – finding elements by accessing the DOM through JavaScript 40
Time for action – finding elements by XPath 41
Using direct XPath in your test 42
Using XPath to find the nth element of a type 43
Using element attributes in XPath queries 44
Doing a partial match on attribute content 45
Finding an element by the text it contains 45
Using XPath axis to find elements 46
CSS selectors 48
Time for action – finding elements by CSS 48
Using child nodes to find the element 50
Using sibling nodes to find the element 50
Using CSS class attributes in CSS selectors 51
Using element IDs in CSS selectors 51
Finding elements by their attributes 52
Partial matches on attributes 52
Finding the nth element with CSS 53
Finding an element by its inner text 54
Summary 55
Chapter 3: Pattern Matching 57
Verifying exact text 57
Time for action – verifying text 58
Time for action – using exact: on links 59
Using globs in our tests 60
Time for action – using globs in tests 60
Time for action – using * to find a basic pattern 62
Time for action – using ? in a glob pattern 63
Time for action – using character classes in globbing 64
Using regular expressions 65
Time for action – using basic regular expressions to check the date 65
Time for action – using regular expression wildcards 67
Summary 68

Chapter 4: Using JavaScript 69
Using JavaScript as our test language 69
Time for action – using JavaScript to enter text into a field 70
Time for action – using multiple statements in your JavaScript 71
Time for action – storing the result of JavaScript in a variable 71
Using Selenium variables with JavaScript 73
Time for action – using Selenium variables with JavaScript 73
Time for action – JavaScript within a verify or assert 74
Accessing the browser with JavaScript 76
Time for action – accessing the page with browserbot 76
Time for action – verifying a JavaScript evaluation with browserbot 78
Time for action – using waitForCondition 79
Firing events 80
Time for action – firing a mouseOver event 80
Time for action – firing an onBlur event in Selenium 81
Summary 83
Chapter 5: User Extensions and Add-ons 85
Important preliminary points 85
User extensions 86
Time for action – installing a user extension 86
Time for action – using Selenium variables in extensions 89
Time for action – using locators in extensions 91
Time for action – using browserbot from within an extension 92
Time for action – creating new commands to verify or assert 94
Add-ons 96
Time for action – creating a basic add-on 97
Summary 101
Chapter 6: First Steps with Selenium RC 103
Important preliminary points 103
What is Selenium Remote Control 104
Setting up Selenium Remote Control 105
Time for action – setting up Selenium Remote Control 105
Running Selenium IDE tests with Selenium Remote Control 107
Time for action – running Selenium IDE tests with Selenium Remote Control 107
Running your Selenium IDE tests in Internet Explorer 109
Time for action – running our tests in Internet Explorer 109
Running your Selenium IDE tests in Google Chrome 110
Time for action – running Selenium IDE tests within Google Chrome 111
Running your Selenium IDE tests with the User Extensions 112

Time for action – running Selenium IDE tests with User Extensions 112
Selenium Remote Control arguments 113
Summary 114

Chapter 7: Creating Selenium Remote Control Tests 115
Important preliminary points 116
Converting Selenium IDE tests to a programming language 116
Time for action – converting Selenium IDE tests to a language 116
Writing Selenium tests from scratch 121
Time for action – creating a Selenium instance with JUnit 3 121
Time for action – creating a Selenium instance with SeleneseTestCase setUp() 123
Time for action – creating a Selenium instance with JUnit 4 124
Time for action – creating a Selenium instance with TestNG 126
Time for action – creating a test from scratch 127
Selenium Remote Control best practises 128
Time for action – setting up the test 128
Time for action – moving Selenium steps into Private methods to make tests maintainable 129
Time for action – using the Page Object Pattern to design tests 132
Setting our tests up in a Continuous Integration server 134
Time for action – creating an Ant file 135
Summary 137

Chapter 8: Advanced Selenium Techniques 139
Important preliminary points 139
Cookie handling 140
Time for action – getting a cookie off the page 140
Getting all cookies 141
Time for action – getting all cookies on the page 141
Deleting cookies 142
Time for action – deleting a cookie 142
Adding a new location strategy 144
Time for action – adding a new location strategy 144
Capturing network traffic 145
Time for action – capturing network traffic 145
Capturing screenshots 147
captureScreenshot call 147
Time for action – capturing screenshots 148
Time for action – capturing a screenshot to string 149
Capturing the entire page 150

Time for action – capturing the entire page as a screenshot **150**
Time for action – capture entire page as a screenshot changing background colour **151**
Time for action – capturing the entire page screenshot to a string **152**
Capturing video **153**
Time for action – setting up the environment to capture video **153**
Time for action – recording a video in a test **154**
Summary **155**

Chapter 9: Getting Started with Selenium Grid **157**
Important preliminary points **157**
Understanding Selenium Grid **158**
Checking that we have the necessary items for Selenium Grid **159**
Time for action – doing a sanity check on Selenium Grid **160**
Selenium Grid Hub **160**
Time for action – launching the hub **161**
Adding instances to the hub **163**
Time for action – adding a remote control with the defaults **163**
Adding Selenium Remote Controls for different machines 164
Time for action – adding Selenium Remote Controls for different machines **165**
Adding Selenium Remote Control for different browsers 166
Time for action – setting the Environment when starting Selenium Remote Control **166**
Updating the Selenium Grid Configuration 167
Time for action – adding new items to the Grid Configuration **167**
Running tests against the Grid **169**
Time for action – writing tests against the grid **169**
Summary **170**

Chapter 10: Running Selenium Tests in Parallel **171**
Important preliminary points **172**
Setting up TestNG **172**
Time for action – starting to create the test suite **173**
Parameters in the configuration file 173
Time for action – creating a test node in the TestNG configuration **173**
Getting our tests to use parameters 175
Time for action – adding the parameters to our tests **175**
Parallel testing 177
Time for action – getting our tests running in parallel **177**

Tips and tricks for running tests in parallel **178**
Independent tests 178
Cleaning up tests 178
Username and password 178
Firefox profiles 179
Summary **179**

Chapter 11: Getting Started with Selenium 2 **181**
Important preliminary points **182**
Why Selenium and WebDriver are being merged **182**
So what if a new browser is released? 183
How will the browser interaction change? **183**
Converting Selenium 1 tests to Selenium 2 **184**
Time for action – converting tests to Selenium 2 using WebDriverBackedSelenium **185**
Starting a Selenium 2 browser instance **187**
Time for action – instantiating new browsers and closing them **188**
Accessing elements on the page and interacting with them **189**
Time for action – finding a link and clicking it **190**
Finding elements with XPath 191
Time for action – finding an element with XPath **191**
Finding multiple elements 192
Time for action – finding multiple elements on the page **192**
Typing into input fields 193
Time for action – typing into a text box **193**
Real-life interaction 194
Time for action – working with hidden elements throws errors **194**
Working with JavaScript in Selenium 2 **195**
Time for action – using JavaScript in Selenium 2 **195**
Returning something from your JavaScript to your test 196
Time for action – returning from executing JavaScript **196**
Summary **198**

Pop Quiz Answers **201**
Chapter 1 – Getting Started with Selenium IDE **201**
Chapter 2 – Locators **202**
Chapter 3 – Pattern Matching **202**
Chapter 4 – Using JavaScript **203**
Chapter 5 – User Extensions and Add-ons **203**
Chapter 6 – First Steps with Selenium RC **204**
Chapter 7 – Creating Selenium Remote Control Tests **205**

Chapter 8 – Advanced Selenium Techniques 206
Chapter 9 – Getting Started with Selenium Grid 207
Chapter 10 – Running Selenium Tests in Parallel 207
Chapter 11 – Getting started with Selenium 2 208
Index 237
