

Table of Contents

Chapter 1:	
Introduction to the Updated SAC Classification	1
<i>A. DAWSON, W. MARTIN, W. D. POLIDO</i>	
1.1 Introduction	2
1.2 Historical Background	2
1.3 The Review Team	3
1.4 Potential Roles for the SAC Classification	3
1.5 Using this Book	4
Chapter 2:	
The Rationale Behind the Updated SAC Classification . .	5
<i>A. DAWSON, C. STILWELL</i>	
2.1 Definitions	6
2.2 Assumptions	7
2.3 Is the Clinician a Risk Factor?	7
2.3.1 Factors impacting the clinician as a risk factor . . .	7
2.3.1.1 Experience	7
2.3.1.2 Training	8
2.3.1.3 Self-assessment of ability	8
2.3.1.4 Shared learning	9
2.3.1.5 Short training courses	9
2.3.1.6 Structured education and training	9
2.3.2 Reducing clinician-related risk	9
2.3.2.1 Recognizing “human factor” risks	9
2.3.2.2 Stress as a risk factor	9
2.3.2.3 Mitigating the human factor issues	9
2.3.2.4 Clinician risk factor in relation to other sources of risks	10
2.4 Classification Rationale	10
Chapter 3:	
Risks in Implant Dentistry	11
<i>A. DAWSON, W. MARTIN, W. D. POLIDO</i>	
3.1 Principles of Risk Management	12
3.2 The SAC Classification as a Risk Management Tool	12
3.3 General Risks	13
<i>A. DAWSON, J. KLEINHEINZ, A. MURAT KÖKAT, D. WISMEIJER</i>	
3.3.1 Patient medical factors	13
3.3.1.1 Medical fitness	13
3.3.1.2 Medications	14
3.3.1.3 Radiation	14
3.3.1.4 Growth status	14
3.3.2 Patient attitudes/behaviors	15
3.3.2.1 Smoking habit	15
3.3.2.2 Compliance	15
3.3.2.3 Oral hygiene	15
3.3.2.4 Patient expectations	15
3.3.3 Site-related factors	16
3.3.3.1 Periodontal status	16
3.3.3.2 Access	16
3.3.3.3 Previous surgeries in the planned implant site . .	16
3.3.3.4 Nearby pathology	17
3.4 Esthetic Risk	17
<i>W. MARTIN, V. CHAPPUIS, D. MORTON, D. BUSER</i>	
3.4.1 Medical status and smoking habit	17
3.4.2 Gingival display at full smile	17
3.4.3 Width of the edentulous space	18
3.4.4 Shapes of tooth crowns	19
3.4.5 Restorative status of adjacent teeth	19
3.4.6 Gingival phenotype	20
3.4.7 Volume of surrounding tissues	20
3.4.8 Patient’s esthetic expectations	20
3.5 Edentulous Esthetic Risk Assessment (EERA) . . .	21
<i>L. GONZAGA, W. MARTIN, D. MORTON</i>	
3.5.1 Facial support	23
3.5.2 Labial support	23
3.5.3 Upper lip length	24
3.5.4 Buccal corridor	24
3.5.5 Smile line	25
3.5.6 Maxillomandibular relationship	26
3.6 Surgical Risks	26
<i>W. D. POLIDO</i>	
3.6.1 Anatomy	26
3.6.1.1 Bone volume – Horizontal	27
3.6.1.2 Bone volume – Vertical	28
3.6.1.3 Presence of keratinized tissue	29
3.6.1.4 Quality of soft tissues	29
3.6.1.5 Proximity to vital anatomical structures	30

5.8	Implants for Restoration of Long Edentulous Spaces: Areas of High Esthetic Risk	108	5.11	Implants for Restoration of the Full Arch: Fixed	131
5.8.1	Maxillary lateral and central incisors.....	108	5.11.1	Edentulous mandible: Fixed dental prosthesis.....	131
	<i>A. TREVIÑO SANTOS</i>			<i>P. CASENTINI</i>	
5.9	Implants for Restoration of Long Edentulous Spaces: Removable Prostheses	113	5.11.2	Edentulous maxilla and mandible: Implant-supported all-ceramic fixed complete dentures	140
5.9.1	Maxilla.....	113		<i>D. MORTON, WS. LIN, W. D. POLIDO</i>	
	<i>C. STILWELL</i>		Chapter 6:		
5.10	Implants for Restoration of the Full Arch: Removable.....	117	Conclusion	151	
5.10.1	Edentulous maxilla: Bar-supported overdenture:	117		<i>A. DAWSON, W. MARTIN, W. D. POLIDO</i>	
	<i>WS. LIN, D. MORTON</i>		Chapter 7:		
5.10.2	Edentulous maxilla: Zygomatic implant bar-supported overdenture.....	123	References.....	153	
	<i>W. D. POLIDO, WS. LIN</i>
