
Table of Contents

Preface.....	xiii
1. Getting Started: Compiling, Running, and Debugging.....	1
1.1. Compiling and Running Java: JDK	2
1.2. Editing and Compiling with a Syntax-Highlighting Editor	3
1.3. Compiling, Running, and Testing with an IDE	4
1.4. Using CLASSPATH Effectively	14
1.5. Downloading and Using the Code Examples	17
1.6. Automating Compilation with Apache Ant	22
1.7. Automating Dependencies, Compilation, Testing, and Deployment with Apache Maven	25
1.8. Automating Dependencies, Compilation, Testing, and Deployment with Gradle	29
1.9. Dealing with Deprecation Warnings	31
1.10. Conditional Debugging Without #ifdef	33
1.11. Maintaining Program Correctness with Assertions	35
1.12. Debugging with JDB	36
1.13. Avoiding the Need for Debuggers with Unit Testing	38
1.14. Maintaining Your Code with Continuous Integration	41
1.15. Getting Readable Tracebacks	45
1.16. Finding More Java Source Code: Programs, Frameworks, Libraries	46
2. Interacting with the Environment.....	51
2.1. Getting Environment Variables	51
2.2. Getting Information from System Properties	52
2.3. Learning About the Current JDK Release	54
2.4. Dealing with Operating System–Dependent Variations	55
2.5. Using Extensions or Other Packaged APIs	58

2.6. Parsing Command-Line Arguments	59
3. Strings and Things.....	67
3.1. Taking Strings Apart with Substrings	69
3.2. Breaking Strings Into Words	70
3.3. Putting Strings Together with StringBuilder	74
3.4. Processing a String One Character at a Time	76
3.5. Aligning Strings	78
3.6. Converting Between Unicode Characters and Strings	81
3.7. Reversing a String by Word or by Character	83
3.8. Expanding and Compressing Tabs	84
3.9. Controlling Case	89
3.10. Indenting Text Documents	90
3.11. Entering Nonprintable Characters	91
3.12. Trimming Blanks from the End of a String	92
3.13. Parsing Comma-Separated Data	93
3.14. Program: A Simple Text Formatter	98
3.15. Program: Soundex Name Comparisons	100
4. Pattern Matching with Regular Expressions.....	105
4.1. Regular Expression Syntax	107
4.2. Using regexes in Java: Test for a Pattern	114
4.3. Finding the Matching Text	117
4.4. Replacing the Matched Text	120
4.5. Printing All Occurrences of a Pattern	121
4.6. Printing Lines Containing a Pattern	123
4.7. Controlling Case in Regular Expressions	125
4.8. Matching “Accented” or Composite Characters	126
4.9. Matching Newlines in Text	127
4.10. Program: Apache Logfile Parsing	129
4.11. Program: Data Mining	131
4.12. Program: Full Grep	133
5. Numbers.....	139
5.1. Checking Whether a String Is a Valid Number	141
5.2. Storing a Larger Number in a Smaller Number	143
5.3. Converting Numbers to Objects and Vice Versa	144
5.4. Taking a Fraction of an Integer Without Using Floating Point	146
5.5. Ensuring the Accuracy of Floating-Point Numbers	147
5.6. Comparing Floating-Point Numbers	149
5.7. Rounding Floating-Point Numbers	151
5.8. Formatting Numbers	152

5.9. Converting Between Binary, Octal, Decimal, and Hexadecimal	154
5.10. Operating on a Series of Integers	155
5.11. Working with Roman Numerals	157
5.12. Formatting with Correct Plurals	161
5.13. Generating Random Numbers	163
5.14. Calculating Trigonometric Functions	165
5.15. Taking Logarithms	166
5.16. Multiplying Matrices	167
5.17. Using Complex Numbers	169
5.18. Handling Very Large Numbers	171
5.19. Program: TempConverter	174
5.20. Program: Number Palindromes	175
6. Dates and Times—New API.....	179
6.1. Finding Today's Date	182
6.2. Formatting Dates and Times	183
6.3. Converting Among Dates/Times, YMDHMS, and Epoch Seconds	185
6.4. Parsing Strings into Dates	186
6.5. Difference Between Two Dates	187
6.6. Adding to or Subtracting from a Date or Calendar	188
6.7. Interfacing with Legacy Date and Calendar Classes	189
7. Structuring Data with Java.....	191
7.1. Using Arrays for Data Structuring	192
7.2. Resizing an Array	193
7.3. The Collections Framework	195
7.4. Like an Array, but More Dynamic	196
7.5. Using Generic Collections	199
7.6. Avoid Casting by Using Generics	200
7.7. How Shall I Iterate Thee? Let Me Enumerate the Ways	204
7.8. Eschewing Duplicates with a Set	206
7.9. Using Iterators or Enumerations for Data-Independent Access	207
7.10. Structuring Data in a Linked List	208
7.11. Mapping with Hashtable and HashMap	212
7.12. Storing Strings in Properties and Preferences	214
7.13. Sorting a Collection	218
7.14. Avoiding the Urge to Sort	222
7.15. Finding an Object in a Collection	224
7.16. Converting a Collection to an Array	226
7.17. Rolling Your Own Iterator	227
7.18. Stack	230
7.19. Multidimensional Structures	234

7.20. Program: Timing Comparisons	236
8. Object-Oriented Techniques.....	239
8.1. Formatting Objects for Printing with toString()	241
8.2. Overriding the equals() and hashCode() Methods	243
8.3. Using Shutdown Hooks for Application Cleanup	248
8.4. Using Inner Classes	250
8.5. Providing Callbacks via Interfaces	251
8.6. Polymorphism/Abstract Methods	255
8.7. Passing Values	256
8.8. Using Typesafe Enumerations	259
8.9. Enforcing the Singleton Pattern	263
8.10. Roll Your Own Exceptions	266
8.11. Using Dependency Injection	267
8.12. Program: Plotter	270
9. Functional Programming Techniques: Functional Interfaces, Streams, Parallel Collections.....	275
9.1. Using Lambdas/Closures Instead of Inner Classes	278
9.2. Using Lambda Predefined Interfaces Instead of Your Own	282
9.3. Simplifying Processing with Streams	283
9.4. Improving Throughput with Parallel Streams and Collections	285
9.5. Creating Your Own Functional Interfaces	286
9.6. Using Existing Code as Functional with Method References	289
9.7. Java Mixins: Mixing in Methods	293
10. Input and Output.....	295
10.1. Reading Standard Input	298
10.2. Reading from the Console or Controlling Terminal; Reading Passwords Without Echoing	300
10.3. Writing Standard Output or Standard Error	302
10.4. Printing with Formatter and printf	304
10.5. Scanning Input with StreamTokenizer	308
10.6. Scanning Input with the Scanner Class	312
10.7. Scanning Input with Grammatical Structure	316
10.8. Opening a File by Name	317
10.9. Copying a File	318
10.10. Reading a File into a String	325
10.11. Reassigning the Standard Streams	325
10.12. Duplicating a Stream as It Is Written	326
10.13. Reading/Writing a Different Character Set	329
10.14. Those Pesky End-of-Line Characters	330

10.15. Beware Platform-Dependent File Code	331
10.16. Reading “Continued” Lines	332
10.17. Reading/Writing Binary Data	336
10.18. Seeking to a Position within a File	337
10.19. Writing Data Streams from C	338
10.20. Saving and Restoring Java Objects	340
10.21. Preventing ClassCastExceptions with SerialVersionUID	344
10.22. Reading and Writing JAR or ZIP Archives	346
10.23. Finding Files in a Filesystem-Neutral Way with getResource() and getResourceAsStream()	349
10.24. Reading and Writing Compressed Files	351
10.25. Learning about the Communications API for Serial and Parallel Ports	352
10.26. Save User Data to Disk	357
10.27. Program: Text to PostScript	360
11. Directory and Filesystem Operations.....	365
11.1. Getting File Information	365
11.2. Creating a File	368
11.3. Renaming a File	369
11.4. Deleting a File	370
11.5. Creating a Transient File	372
11.6. Changing File Attributes	373
11.7. Listing a Directory	375
11.8. Getting the Directory Roots	377
11.9. Creating New Directories	378
11.10. Using Path instead of File	379
11.11. Using the FileWatcher Service to Get Notified about File Changes	380
11.12. Program: Find	382
12. Media: Graphics, Audio, Video.....	387
12.1. Painting with a Graphics Object	388
12.2. Showing Graphical Components Without Writing Main	389
12.3. Drawing Text	390
12.4. Drawing Centered Text in a Component	391
12.5. Drawing a Drop Shadow	393
12.6. Drawing Text with 2D	395
12.7. Drawing Text with an Application Font	397
12.8. Drawing an Image	400
12.9. Reading and Writing Images with javax.imageio	404
12.10. Playing an Audio/Sound File	405
12.11. Playing a Video File	406
12.12. Printing in Java	411

12.13. Program: PlotterAWT	415
12.14. Program: Grapher	417
13. Network Clients.....	421
13.1. Contacting a Server	423
13.2. Finding and Reporting Network Addresses	424
13.3. Handling Network Errors	426
13.4. Reading and Writing Textual Data	427
13.5. Reading and Writing Binary Data	430
13.6. Reading and Writing Serialized Data	432
13.7. UDP Datagrams	433
13.8. Program: TFTP UDP Client	436
13.9. URI, URL, or URN?	441
13.10. REST Web Service Client	442
13.11. SOAP Web Service Client	444
13.12. Program: Telnet Client	448
13.13. Program: Chat Client	450
13.14. Program: Simple HTTP Link Checker	454
14. Graphical User Interfaces.....	457
14.1. Displaying GUI Components	458
14.2. Run Your GUI on the Event Dispatching Thread	460
14.3. Designing a Window Layout	462
14.4. A Tabbed View of Life	464
14.5. Action Handling: Making Buttons Work	465
14.6. Action Handling Using Anonymous Inner Classes	467
14.7. Action Handling Using Lambdas	469
14.8. Terminating a Program with “Window Close”	470
14.9. Dialogs: When Later Just Won’t Do	475
14.10. Catching and Formatting GUI Exceptions	477
14.11. Getting Program Output into a Window	480
14.12. Choosing a Value with JSpinner	486
14.13. Choosing a File with JFileChooser	487
14.14. Choosing a Color	489
14.15. Formatting JComponents with HTML	492
14.16. Centering a Main Window	493
14.17. Changing a Swing Program’s Look and Feel	496
14.18. Enhancing Your Swing GUI for Mac OS X	500
14.19. Building Your GUI Application with JavaFX	503
14.20. Program: Custom Font Chooser	505

14.21. Program: Custom AWT/Swing Layout Manager	510
15. Internationalization and Localization.....	517
15.1. Creating a Button with I18N Resources	518
15.2. Listing Available Locales	520
15.3. Creating a Menu with I18N Resources	521
15.4. Writing Internationalization Convenience Routines	521
15.5. Creating a Dialog with I18N Resources	523
15.6. Creating a Resource Bundle	525
15.7. Extracting Strings from Your Code	526
15.8. Using a Particular Locale	527
15.9. Setting the Default Locale	528
15.10. Formatting Messages with MessageFormat	529
15.11. Program: MenuIntl	531
15.12. Program: BusCard	533
16. Server-Side Java.....	539
16.1. Opening a Server Socket for Business	540
16.2. Returning a Response (String or Binary)	542
16.3. Returning Object Information Across a Network Connection	546
16.4. Handling Multiple Clients	547
16.5. Serving the HTTP Protocol	552
16.6. Securing a Web Server with SSL and JSSE	554
16.7. Network Logging	557
16.8. Network Logging with SLF4J	558
16.9. Network Logging with log4j	561
16.10. Network Logging with java.util.logging	563
16.11. Finding Network Interfaces	565
16.12. Program: A Java Chat Server	567
17. Java and Electronic Mail.....	573
17.1. Sending Email: Browser Version	574
17.2. Sending Email: For Real	578
17.3. Mail-Enabling a Server Program	581
17.4. Sending MIME Mail	586
17.5. Providing Mail Settings	589
17.6. Reading Email	590
17.7. Program: MailReaderBean	595
17.8. Program: MailClient	599
18. Database Access.....	609
18.1. Easy Database Access with JPA and/or Hibernate	611

18.2. JDBC Setup and Connection	617
18.3. Connecting to a JDBC Database	619
18.4. Sending a JDBC Query and Getting Results	622
18.5. Using JDBC Prepared Statements	625
18.6. Using Stored Procedures with JDBC	629
18.7. Changing Data Using a ResultSet	630
18.8. Storing Results in a RowSet	631
18.9. Changing Data Using SQL	633
18.10. Finding JDBC Metadata	635
18.11. Program: SQLRunner	639
19. Processing JSON Data.....	653
19.1. Generating JSON Directly	655
19.2. Parsing and Writing JSON with Jackson	656
19.3. Parsing and Writing JSON with org.json	657
20. Processing XML.....	661
20.1. Converting Between Objects and XML with JAXB	664
20.2. Converting Between Objects and XML with Serializers	667
20.3. Transforming XML with XSLT	668
20.4. Parsing XML with SAX	671
20.5. Parsing XML with DOM	673
20.6. Finding XML Elements with XPath	677
20.7. Verifying Structure with Schema or DTD	678
20.8. Generating Your Own XML with DOM and the XML Transformer	681
20.9. Program: xml2mif	683
21. Packages and Packaging.....	687
21.1. Creating a Package	688
21.2. Documenting Classes with Javadoc	689
21.3. Beyond Javadoc: Annotations/Metadata	693
21.4. Archiving with jar	695
21.5. Running a Program from a JAR	696
21.6. Preparing a Class as a JavaBean	699
21.7. Pickling Your Bean into a JAR	702
21.8. Packaging a Servlet into a WAR File	704
21.9. “Write Once, Install Anywhere”	705
21.10. “Write Once, Install on Mac OS X”	705
21.11. Java Web Start	707
21.12. Signing Your JAR File	714
22. Threaded Java.....	717

22.1. Running Code in a Different Thread	719
22.2. Displaying a Moving Image with Animation	724
22.3. Stopping a Thread	728
22.4. Rendezvous and Timeouts	731
22.5. Synchronizing Threads with the synchronized Keyword	732
22.6. Simplifying Synchronization with Locks	738
22.7. Synchronizing Threads the Hard Way with wait() and notifyAll()	742
22.8. Simplifying Producer/Consumer with the Queue Interface	748
22.9. Optimizing Parallel Processing with Fork/Join	750
22.10. Background Saving in an Editor	754
22.11. Program: Threaded Network Server	755
22.12. Simplifying Servers Using the Concurrency Utilities	762
23. Reflection, or “A Class Named Class”	765
23.1. Getting a Class Descriptor	766
23.2. Finding and Using Methods and Fields	767
23.3. Accessing Private Methods and Fields via Reflection	771
23.4. Loading and Instantiating a Class Dynamically	772
23.5. Constructing a Class from Scratch with a ClassLoader	774
23.6. Performance Timing	776
23.7. Printing Class Information	780
23.8. Listing Classes in a Package	782
23.9. Using and Defining Annotations	784
23.10. Finding Plug-in-like Classes via Annotations	789
23.11. Program: CrossRef	791
23.12. Program: AppletViewer	794
24. Using Java with Other Languages	801
24.1. Running an External Program from Java	802
24.2. Running a Program and Capturing Its Output	806
24.3. Calling Other Languages via javax.script	810
24.4. Roll Your Own Scripting Engine	811
24.5. Marrying Java and Perl	815
24.6. Calling Other Languages via Native Code	818
24.7. Calling Java from Native Code	824
Afterword	827
A. Java Then and Now	829
Index	847
