| <b>Summary.....</b>         | <b>1</b> |
| <b>Zusammenfassung.....</b> | <b>3</b> |

### Chapter I

|                                                                      |          |
|----------------------------------------------------------------------|----------|
| <b>General introduction .....</b>                                    | <b>5</b> |
| Oilseed rape and its pests.....                                      | 5        |
| Pyrethroid resistance .....                                          | 5        |
| Biology of the pollen beetle .....                                   | 6        |
| Factors influencing population development of the pollen beetle..... | 7        |
| Objectives of the study.....                                         | 10       |
| References .....                                                     | 12       |

### Chapter II

|                                                                                                                                                                                                        |           |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Effects of the neonicotinoid Biscaya and the pyrethroids Mavrik and Karate Zeon on overwintered pollen beetles (<i>Meligethes aeneus</i> (Fabricius)) and their offspring in oilseed rape .....</b> | <b>18</b> |
| Abstract .....                                                                                                                                                                                         | 18        |
| Introduction .....                                                                                                                                                                                     | 18        |
| Materials and Methods.....                                                                                                                                                                             | 20        |
| Results.....                                                                                                                                                                                           | 24        |
| Discussion .....                                                                                                                                                                                       | 31        |
| References .....                                                                                                                                                                                       | 35        |

### Chapter III

|                                                                                                                                                                            |           |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Impact of the insecticides Biscaya, Mavrik and Karate Zeon on infestation of buds with eggs and larvae of pollen beetle (<i>Meligethes aeneus</i> (Fabricius)).....</b> | <b>41</b> |
| Abstract .....                                                                                                                                                             | 41        |
| Introduction .....                                                                                                                                                         | 42        |
| Materials and Methods.....                                                                                                                                                 | 43        |
| Results.....                                                                                                                                                               | 47        |
| Discussion .....                                                                                                                                                           | 56        |
| References .....                                                                                                                                                           | 60        |

## **Chapter IV**

|                                                                                                                                                                                                  |           |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Effects of neonicotinoid and pyrethroid insecticide applications on the parasitism rates of pollen beetle larvae (<i>Meligethes aeneus</i> (Fabricius)) by tersilochine parasitoids .....</b> | <b>64</b> |
| Abstract .....                                                                                                                                                                                   | 64        |
| Introduction .....                                                                                                                                                                               | 64        |
| Materials and Methods .....                                                                                                                                                                      | 66        |
| Results .....                                                                                                                                                                                    | 68        |
| Discussion .....                                                                                                                                                                                 | 72        |
| References .....                                                                                                                                                                                 | 78        |

## **Chapter V**

|                                                                  |           |
|------------------------------------------------------------------|-----------|
| <b>General discussion .....</b>                                  | <b>81</b> |
| Effects on overwintered pollen beetles .....                     | 81        |
| Effects on bud infestation with eggs and larvae .....            | 82        |
| Effects on larval stages and new generation pollen beetles ..... | 83        |
| Effects on parasitism rates of pollen beetle larvae .....        | 85        |
| Alternative control strategies .....                             | 86        |
| Conclusion .....                                                 | 87        |
| References .....                                                 | 89        |
