List of contributing authors — XI

Mark Benvenuto and Heinz Plaumann

- 1 Introduction – we’ve come a long way ... and have a long way to go — 1**
References — 3

Susan Krumdieck

- 2 Survival is the driver for adaptation: safety engineering changed the future, security engineering prevented disasters and transition engineering navigates the pathway to the climate-safe future — 5**
 - 2.1 Introduction — 5
 - 2.2 Insight: transition engineering is the work of sustainability safety — 8
 - 2.3 Theory: survival means not failing at safety, security or sustainability — 9
 - 2.4 Definition of sustainability — 10
 - 2.5 Role of engineering in survival — 11
 - 2.6 History of safety engineering — 12
 - 2.7 Transition engineering — 14
 - 2.8 Discussion — 16
 - References — 18

Md Mosleh Uddin and Mark Mba Wright

- 3 Anaerobic digestion fundamentals, challenges, and technological advances — 19**
 - 3.1 Introduction — 19
 - 3.2 Anaerobic digestion — 20
 - 3.3 Feedstock — 20
 - 3.4 Anaerobic digestion chemistry — 21
 - 3.5 AD process parameters — 24
 - 3.5.1 Temperature — 24
 - 3.5.2 Hydraulic Retention Time (HRT) — 25
 - 3.5.3 Carbon/nitrogen (C/N) ratio — 26
 - 3.5.4 pH — 26
 - 3.6 Anaerobic digestion technologies — 26
 - 3.6.1 Wet versus dry — 27
 - 3.6.2 Batch versus continuous — 27
 - 3.6.3 No-mixing versus complete mixing — 28
 - 3.7 Common digester designs — 28
 - 3.7.1 Covered lagoon — 29

3.7.2	Complete mix —	29
3.7.3	Plug flow —	30
3.7.4	Fixed film digesters —	30
3.8	Challenges with the AD process —	31
3.9	Conventional processes for overcoming challenges —	32
3.10	Applications of anaerobic digestion —	33
3.11	Advanced anaerobic digestion technologies —	34
3.12	Conclusions —	36
	References —	36

Simona E. Hunyadi Murph and Melissa A. Murph

4	Nuclear fusion: the promise of endless energy —	39
4.1	Introduction —	39
4.2	Current and future energy resources —	40
4.3	The history of fusion —	45
4.4	A deep dive into the fusion energy —	48
4.4.1	Why fusion? —	48
4.4.2	The fuel – hydrogen —	49
4.4.3	Plasma —	52
4.4.4	Materials and fusion —	56
4.5	Conclusions and outlook —	58
	References —	60

Parisa Bashiri and Gholamabbas Nazri

5	Solid state lithium ion conductors for lithium batteries —	63
5.1	Introduction —	63
5.2	Polymer electrolytes —	63
5.2.1	Ionic conduction mechanism in polymer electrolytes —	65
5.3	Inorganic solid electrolytes —	66
5.3.1	Perovskite —	66
5.3.2	LISICON —	66
5.3.3	LIPON —	67
5.3.4	Garnet —	67
5.3.5	Li-rich garnet like structure: $\text{Li}_7\text{La}_3\text{Zr}_2\text{O}_{12}$ (LLZO) —	67
5.3.6	Ionic conduction in solids —	68
5.3.7	Ionic conduction in glasses —	69
	References —	71

Rhys Hakstol

6	A holistic environmental investigation of complementary energy in Alberta — 75
6.1	Introduction — 75
6.2	The history of complementary energy in Alberta — 77
6.3	Socioeconomic drivers — 78
6.4	Environmental impacts — 80
6.4.1	Impacts of solar energy — 80
6.4.2	Impacts of wind energy — 80
6.4.3	Impacts of geothermal power — 81
6.5	Remediation — 81
6.5.1	Remediating solar energy — 82
6.5.2	Remediating wind energy — 82
6.5.3	Remediating geothermal energy — 83
6.6	Recommendations and best practices — 83
	References — 85

David Consiglio

7	The story of nitrogen — 89
----------	-----------------------------------

Michael Barnard

8	Small modular nuclear reactors are mostly bad policy — 93
8.1	Most of the attention and funding is misguided at best, and actively hostile to climate action at worst — 93
8.2	Claims About SMRs Don't Withstand Scrutiny — 95
8.3	Are There Other Problems with SMRs? — 97
8.4	So who is advocating for SMRs and Why? — 98

Martin Wolfersdorff and Heinz Plaumann

9	Repurposing tires – alternate energy source? — 101
9.1	Introduction — 101
9.2	Tire fabrication — 101
9.3	The tire challenge — 103
9.3.1	Reduce — 103
9.3.2	Reuse — 103
9.3.3	Recycle — 104
9.4	Path forward – outlook — 106
	References — 107

Joji Watanabe

10	Finance for Green Chemistry through Currency Mix — 109
10.1	Green Chemistry requires finance — 109
10.2	Questions raised on currency and economy management — 110
10.2.1	Currency matters, but ... — 110
10.2.2	A big question after “Abenomics” in Japan — 112
10.3	Management of national economies — 113
10.3.1	Three groups of vessels A, B, and C in each economy — 113
10.3.2	Understanding MMT in view of chemical process — 114
10.3.3	Misperceptions in economy management — 116
10.3.4	No worry after development with good supply capacities — 116
10.4	Cases of debt trap; Japan, Sri Lanka, and Mongolia — 118
10.4.1	Japan; low economic growth in the recent 30 years, yet contributing to China — 118
10.4.2	Sri Lanka; controlled by China — 119
10.4.3	Mongolia; constrained sound economic growth — 120
10.5	Mistakes by IMF in Ireland and Greece — 121
10.6	New technologies supported by currency mix can solve most economic problems — 125
	References — 126
