| → GEOSTOP G – The volcanic rocks . . . . .                                    | 63     |
| → GEOSTOP H – Onion-skin weathering . . . . .                                 | 65     |

|                                                          |    |
|----------------------------------------------------------|----|
| <b>Stage 5: from Ortisei/St. Ulrich to the Puez Hut.</b> | 68 |
|----------------------------------------------------------|----|

### **The Dolomites arise**

|                               |    |
|-------------------------------|----|
| → GEOSTOP I – Faults          | 76 |
| → GEOSTOP K – Geological lift | 79 |

|                                                   |    |
|---------------------------------------------------|----|
| <b>Stage 6: from the Puez Hut to Armentarola.</b> | 82 |
|---------------------------------------------------|----|

### **Diving into deep sea basins**

|                                                      |    |
|------------------------------------------------------|----|
| → GEOSTOP L – Megalodonts – fossilised sea creatures | 89 |
| → GEOSTOP M – The deep sea basin                     | 91 |

|                                             |    |
|---------------------------------------------|----|
| <b>Stage 7: from Armentarola to Pederü.</b> | 96 |
|---------------------------------------------|----|

### **From layers come folds**

|                                         |     |
|-----------------------------------------|-----|
| → GEOSTOP N – Curved rocks.             | 102 |
| → GEOSTOP O – The natural rollercoaster | 104 |

|                                               |     |
|-----------------------------------------------|-----|
| <b>Stage 8: from Pederü to the Plätzwiese</b> | 106 |
|-----------------------------------------------|-----|

### **The Dolomites take on their present-day form**

|                                         |     |
|-----------------------------------------|-----|
| → GEOSTOP P – Engravings in the rock.   | 114 |
| → GEOSTOP Q – A giant with feet of clay | 117 |

|                                                           |     |
|-----------------------------------------------------------|-----|
| <b>Stage 9: from the Plätzwiese to the Dreizinnen Hut</b> | 120 |
|-----------------------------------------------------------|-----|

### **Rebirth of the reefs**

|                                           |     |
|-------------------------------------------|-----|
| → GEOSTOP R – Biogenic reefs as a habitat | 126 |
| → GEOSTOP S – The basis of a reef.        | 128 |

|                                                          |     |
|----------------------------------------------------------|-----|
| <b>Stage 10: from the Dreizinnen Hut to Sesto/Sexten</b> | 132 |
|----------------------------------------------------------|-----|

### **The end of the archipelago**

|                                            |     |
|--------------------------------------------|-----|
| → GEOSTOP T – The symbol of the Dolomites. | 139 |
|--------------------------------------------|-----|
