

Contents

I. Introducing the Eye

1. The Scope of Ophthalmology	3
Historical Background	4
2. The Human Eye	7
The Basic Structure of the Eye	7
How to Find Out What a Patient Can See	11
How to Start Examining an Eye	16
How to Use the Ophthalmoscope	19
Other Tests Available in an Eye Department	23

II. Primary Care Eye Problems

3. Long Sight, Short Sight	29
4. Common Diseases of the Eyelids	33
The Watering Eye	33
The Dry Eye	38
Deformities of the Eyelids	40
Lid Tumours	47
Lid Injuries	50
5. Common Diseases of the Conjunctiva and Cornea	51
Subconjunctival Haemorrhage	51
Conjunctivitis	52
Corneal Foreign Body	60
Corneal Ulceration	64
Corneal Degeneration	68
Corneal Oedema	70
Absent Corneal Sensation	71

6. The Red Eye	73
Red Eye Which Is Not Painful and Sees Normally	73
Red Painful Eye Which Cannot See	77
7. Failing Vision	81
Failing Vision in an Eye Which Looks Normal	81
Treatable Causes	83
Untreatable Causes	84
8. Headache	87
History	88
Classification	88
9. Contact Lenses	95
Types	95
Side-Effects	96
Indications	97

III. Problems of the Eye Surgeon

10. Cataract	101
The Lens	101
Aetiology	103
Symptoms	106
Signs	107
Management	109
11. Glaucoma	119
Normal Intraocular Pressure	119
Maintenance of Intraocular Pressure	119
Measurement of Intraocular Pressure	121
Clinical Types of Glaucoma	122
12. Retinal Detachment	137
Incidence	137
Pathogenesis	138
Classification	138
Signs and Symptoms	141
Management	143
Prognosis	145
13. Squint	147
Types of Squint	149

Squint in Childhood	149
Squint in Adults	156
14. Tumours of the Eye	163
The Globe	163
The Eyelids	164
The Orbit	168
Exophthalmos and Proptosis	168
15. Ocular Trauma	171
Injuries to the Globe	171
Injuries to the Eyelids	177
Injuries to the Orbit	178
Radiational Injuries	178
 IV. Problems of the Medical Ophthalmologist	
16. Testing Visual Acuity	183
Measuring for Spectacles	185
17. The Inflamed Eye	189
Anterior Uveitis	189
Posterior Uveitis	194
The Role of Autoimmunity in Uveitis	198
Endophthalmitis and Panophthalmitis	199
Episcleritis and Scleritis	199
18. The Ageing Eye	201
Changes in the Eyes with Age	201
Eye Disease in the Elderly	203
19. The Child's Eye	209
Examination	209
Congenital Eye Defects	211
Other Diseases in Childhood	216
20. Systemic Disease and the Eye	221
Diabetes	221
Thyrotoxicosis	227
Hypertension	230
Anaemia	234
The Leukaemias	234
Sickle Cell Anaemia	234
Other Blood Disorders	235

21. Neuro-ophthalmology	237
The Optic Disc	237
Multiple Sclerosis	243
Defects in the Visual Fields	245
Abnormalities of the Pupil	247
Double Vision	248
22. Genetics and the Eye	253
Genetic Mechanisms	253
23. Drugs and the Eye	259
Treatment of Infection	259
Drops Which Widen the Pupil	260
Drops Which Constrict the Pupil	260
Treatment of Glaucoma	261
Local Anaesthesia in Ophthalmology	261
Drugs and Contact Lenses	261
Artificial Tears	262
Steroids and the Eye	262
Damage to the Eyes by Drugs Administered Systemically ..	263
 V. Blindness	
24. Blindness	267
Definition	267
Standards of Vision for Various Occupations	268
Incidence and Causes	268
Aids for the Blind	269
Artificial Eyes	270
 Subject Index	273
