

Contents

List of Contributors — IX

- György Keglevich
- 1 Typical approaches for the preparation of phosphine oxides; a review on the synthetic methods applied in the last five years — 1**
- Nóra Zsuzsa Kiss and György Keglevich
- 2 Methods for the preparation of phosphinates and phosphonates with a focus on recent advances — 35**
- Ádám Tajti and György Keglevich
- 3 The importance of organophosphorus compounds as biologically active agents — 53**
- Péter Bagi and Réka Herbay
- 4 Resolution of phosphine oxides — 66**
- Zita Rádai, Nóra Zsuzsa Kiss and György Keglevich
- 5 Synthesis of α -hydroxyphosphonates, an important class of bioactive compounds — 91**
- Erika Bálint, Anna Tripolszky and Ádám Tajti
- 6 Synthesis of α -aminophosphonates by the Kabachnik–Fields reaction and by the Pudovik reaction — 108**
- Réka Henyecz, Mátyás Milen, Károly Kánai and György Keglevich
- 7 The use of the T3P® reagent in the synthesis of phosphinic and phosphonic derivatives — 148**
- Réka Henyecz and György Keglevich
- 8 P–C couplings by the Hirao reaction — 158**
- Tamara Kovács and György Keglevich
- 9 Deoxygenation of phosphine oxides — 179**
- Dávid Illés Nagy, Alajos Grün and György Keglevich
- 10 Dronic acid derivatives – An important group of phosphorus-containing drugs — 199**
