

Table of Contents

Preface	3
Information on Purchasing Other MEBAK® Volumes	5
Contributors	7
List of Abbreviations	11
1 Microbreweries	31
1.1 What is a Microbrewery?	31
1.1.1 Definition	31
1.1.2 The Significance of Microbreweries on the International Market	32
1.2 Planning a Microbrewery	35
1.2.1 Market Aspects	35
1.2.2 Business Aspects	36
1.2.2.1 Business Plan	36
1.2.2.1.1 Elements of a Business Plan	36
1.2.2.1.2 Meeting with the Bank	38
1.2.2.2 Sample Profitability Calculation for a Brewpub	40
1.2.2.2.1 Brewhouse Model: 10 hL Batch Size, 1,000 hL Annual Capacity	40
1.2.2.2.1.1 Situation at Start-up	40
1.2.2.2.1.2 Sales Projections	41
1.2.2.2.1.3 Cost Estimation	41
1.2.2.2.1.4 Profit and Loss Calculation for the Operation of a Brewpub (GmbH) for One Year	43
1.2.2.2.1.5 What is the Break-even Point for a Brewpub?	44
1.2.2.2.1.6 Final Review	45
1.3 Innovative Architecture for Brewpubs	47

1.4	Construction, Technology and Energy Management for Microbreweries.....	53
1.4.1	General Aspects	53
1.4.2	Emissions and Scent Marketing	57
1.4.3	Master Plan.....	58
1.4.3.1	Small Breweries up to 5,000 hL/a.....	58
1.4.3.2	Small Breweries over 5,000 hL/a.....	61
1.4.3.2.1	Brewery Planning.....	61
1.4.3.2.2	Building Regulations	63
1.4.3.2.3	Local Conditions	64
1.4.3.2.4	Building Design.....	64
1.4.3.2.5	Building Plan	66
1.4.4	Equipment.....	69
1.4.4.1	Milling.....	69
1.4.4.2	Wort Production	70
1.4.4.3	Automation.....	72
1.4.4.4	Fermentation and Lagering.....	73
1.4.4.5	Filtration	74
1.4.4.5.1	General Information	74
1.4.4.5.2	Pre-Coat Filtration.....	76
1.4.4.5.3	Sheet Filtration.....	78
1.4.5	Filling in a Brewpub or Microbrewery.....	80
1.4.5.1	Bottling	80
1.4.5.2	Kegging Systems	86
1.4.5.2.1	Filling Kegs	87
1.4.5.2.2	Filling Mini-Kegs.....	90
1.4.6	Service Units.....	91
1.4.6.1	Refrigeration	91
1.4.6.2	Heat Generation.....	91
1.4.6.3	Compressed Air	92
1.4.7	Energy Management	92
1.5	Legal Regulations.....	93

2	Legal and De Facto Aspects of the Term “Beer”	95
2.1	Classification of Beer	95
2.2	Types of Beer	96
2.3	Beer Styles and Classification in Germany	97
2.3.1	Beer Classification	97
2.3.2	Types of Beer	98
2.4	Legal Framework for Producing Beer	102
2.4.1	EU Legislation	102
2.4.2	Quality and Composition of Beer in the EU	104
2.4.3	Reinheitsgebot (German Purity Law for Beer)	106
2.4.3.1	The German Reinheitsgebot	106
2.4.3.2	The Bavarian Reinheitsgebot	108
2.4.3.3	The Munich Reinheitsgebot of 1487	109
2.4.4	Germany	110
2.4.4.1	Legal Foundation	111
2.4.4.2	Raw Materials for Brewing and Adjuncts	113
2.4.5	Italy	119
2.4.6	Austria	120
2.4.7	Switzerland	126
2.5	Protected Geographical Claims	128
2.6	The Taxation of Beer	128
2.7	Labeling Guidelines	129
2.7.1	Labeling Elements	130
2.7.2	List of Ingredients	131
2.7.2.1	Form of the List of Ingredients	132
2.7.2.2	List of Ingredients for Beer in Germany	132
2.7.2.3	Labeling of the Basic Ingredients	132
2.7.2.4	Additives	135
2.7.2.5	Ingredients Not Requiring Declaration on the Label	139
2.7.2.6	Ingredients Requiring Declaration on the Label	139
2.7.3	Labeling of Allergens	140
2.7.3.1	Allergens in Beer	140
2.7.3.2	Form of the Allergen Labeling	141

2.7.4	Quantitative Indication of Ingredients	142
2.7.4.1	Necessity of the Quantitative Indication of Ingredients.....	142
2.7.4.2	Implementation of the Quantitative Indication of Ingredients	143
2.7.5	Net Fill Volume.....	144
2.7.5.1	Declaration of Net Fill Volume	144
2.7.5.2	Permissible Variations	145
2.7.5.3	The e-Mark.....	146
2.7.6	Best-Before Date (BBD)	147
2.7.6.1	Definition and Requirement	147
2.7.6.2	Application of the BBD	148
2.7.7	Storage Instructions	148
2.7.8	Address of the Food Industry Operator	149
2.7.9	Country of Origin or Provenance	149
2.7.10	Instructions for Use	150
2.7.11	Alcohol Content.....	150
2.7.12	Nutrition Declaration	151
2.7.12.1	Definition of Nutrition Claims and Nutrition Declarations.....	151
2.7.12.2	Form of the Nutrition Declaration.....	152
3	Wort and Beer Production in a Microbrewery	157
3.1	Allocation and Storage of Raw Materials	161
3.2	Brewing Equipment and Operations	162
3.2.1	Milling	163
3.2.2	Mashing Procedures	163
3.2.3	Lautering	165
3.2.4	Acidification with Lactic Acid Produced by Natural Fermentation	166
3.2.5	Wort Boiling.....	167
3.2.6	Hot Wort Handling.....	167
3.2.7	Chilling the Wort and Pitching the Yeast	168
3.3	Fermentation, Maturation, Lagering and Yeast Handling	169
3.3.1	Fermentation, Maturation, Lagering	169
3.3.2	Brewing Yeast and Yeast Handling	172
3.3.2.1	Types of Brewing Yeast.....	174

3.3.2.2	A Short Description of Two Selected Yeast Strains	175
3.3.2.3	Wort and Yeast Specifications for a Consistent Performance in Yeast Reproduction and Fermentation	179
3.3.2.4	Pure Yeast Cultures and Dry Yeast.....	181
3.3.2.5	Harvested Yeast	183
3.4	Creative Process Engineering in Brewing	185
3.4.1	Spontaneous Fermentation	185
3.4.1.1	General Information on Spontaneous Fermentation	187
3.4.1.2	Unintentional Spontaneous Fermentation	188
3.4.1.3	Intentional Spontaneous Fermentation.....	189
3.4.1.4	Combination of Spontaneous Fermentation and Starter Cultures.....	192
3.4.1.5	Outlook for the Future.....	193
3.4.2	Special Hopping Methods.....	196
3.4.2.1	Hop Addition: During Mashing, at Mash-Out or use of Steeped Hops	197
3.4.2.2	Cold Side Hopping and Dry Hopping.....	197
3.4.2.2.1	Explanation of the Term Dry Hopping	198
3.4.2.2.2	Reasons for Dry Hopping	199
3.4.2.2.3	Wet Hopping with Fresh Hops	199
3.4.2.2.4	Conventional Dry Hopping.....	201
3.4.2.2.4.1	Hop Addition Techniques on the Cold Side of Production	202
3.4.2.2.4.2	Hop Varieties	212
3.4.2.2.4.3	Quantity.....	216
3.4.2.2.4.4	Transfer Rates for Hop Compounds.....	218
3.4.2.2.4.5	Stability of the Hop Aroma	219
3.4.2.2.4.6	Considerations in Dry Hopping	219
3.4.2.2.4.7	Sensory Analysis of Dry-Hopped Beers	220
3.4.3	Maturation of Beer on Wood.....	223
3.4.3.1	Basic Information in the Selection of Wooden Barrels	223
3.4.3.2	The Pitching of Beer Barrels.....	231
3.4.3.3	The Microbiology of Wooden Barrels	232
3.4.3.4	Barrel Aging Beer	232
3.4.3.4.1	The Methodology, Technology and Logistics of Barrel Aging	233
3.4.3.4.1.1	Design and Construction of a Cellar for Barrel Aging.....	233
3.4.3.4.1.2	Equipping a Cellar for Barrel Maturation	235
3.4.3.4.1.3	Location as an Important Quality Criterion	235
3.4.3.4.1.4	Selecting Wooden Barrels	236
3.4.3.4.1.5	Preparation for Wooden Barrels for Barrel Aging Beer	237
3.4.3.4.1.6	Filling Barrels	238

3.4.3.4.1.7	The Maturation Phase	239
3.4.3.4.1.8	Emptying Barrels.....	240
3.4.3.4.1.9	Blending	240
3.4.3.4.1.10	Handling Wooden Barrels	241
3.4.3.4.1.11	Single Batches or Consistently Reproducible Products	241
3.4.3.4.2	Packaging Barrel-Aged Beers under Special Consideration of Microbiological Aspects	242
4	Hygiene in a Microbrewery	243
4.1	Water Treatment.....	243
4.2	Cleaning/Disinfection	247
4.2.1	Cleaning the Inner Surfaces of Brewhouse Equipment.....	250
4.2.2	Wort Piping/Wort Chiller	250
4.2.3	Open Fermentation Vessels	251
4.2.4	Closed Fermentation/Maturation Vessels.....	253
4.2.5	Cleaning and Disinfection of Hoses.....	254
4.3	Miscellaneous	255
4.3.1	Work Clothing	255
4.3.2	Cleaning the Exterior of Vessels, Equipment and Glass Surfaces.....	255
4.3.3	Water Supply Network	256
4.3.4	Water Hoses	256
4.3.5	Care and Treatment of Fittings	257
4.3.6	Gas Lines.....	258
4.3.7	Floor Treatment/Drains	258
4.3.8	Cleaning Growlers	259
4.3.9	Cleaning Techniques for Dispensing Systems	260
4.3.9.1	Dispensing Beer.....	260
4.3.9.2	Cleaning Beverage Dispensing Systems	260
4.3.9.3	The Fundamentals of Cleaning and Disinfection.....	261
4.3.9.3.1	What is Soiling?	261
4.3.9.3.2	The Dynamic Nature of Soiling	262
4.3.9.3.3	The Microbiological Situation.....	264
4.3.9.4	Cleaning Mechanisms	265
4.3.9.4.1	The Effects of Mechanical Cleaning	265
4.3.9.4.2	The Effects of Chemical Cleaning	266

4.3.9.4.3	Components of Cleaning Agents.....	266
4.3.9.4.4	Cleaning Process.....	267
4.3.9.4.5	Cleaning Procedures	267
4.3.9.5	Cleaning Procedures in Practice	268
4.3.9.5.1	Comprehensive Cleaning for Dispensing Systems	268
4.3.9.5.2	Regularly Cleaning a Dispensing System	269
4.3.9.5.3	Cleaning the Tapping Tubes	269
5	Demands and Requirements	271
5.1	Reasons for Minimum Requirements in Quality Assurance for Microbreweries.....	271
5.2	General Requirements for Microbreweries (Credibility and Crisis Management)	271
5.3	Demands on Raw Materials	272
5.4	Requirements for Wort and Beer Production	276
5.4.1	Wort Production	276
5.4.2	Beer Production	277
5.4.2.1	Bottom-Fermented Beers	277
5.4.2.2	Top-Fermented Beers.....	277
5.4.2.3	Filtration and Stabilization.....	278
5.4.3	Filling.....	278
5.5	Requirements for Cleaning Vessels and Lines	278
5.6	Requirements for Dispensing Systems.....	278
5.6.1	General	278
5.6.2	Legal Requirements.....	280
5.6.3	Design Requirements	281
5.6.4	Safety Requirements	286
5.6.5	Hygiene Requirements	287
5.6.6	Requirements for Staff Training.....	287
5.6.7	Other Requirements	288
5.7	Requirements Pertaining to the Quality and Composition of Beer	288

6	Quality Control	290
6.1	Basic Laboratory Equipment.....	290
6.1.1	Chemical-technical Laboratory	290
6.1.2	Microbiological Laboratory	290
6.2	Quality Control – Recommended Minimum Scope of Testing	291
6.2.1	Chemical-technical Analysis	291
6.2.2	Sensory and Visual Quality Control of Beer	292
6.3	Visual Quality Control at the Brewery	294
6.4	Microbiological Analysis.....	294
7	Raw Material Specifications – Recommendations	295
7.1	Water	295
7.2	Grain.....	295
7.3	Malt	296
7.4	Alternative Raw Materials Containing Starch	305
7.5	Specifications for Hops and Hop Products	306
7.6	Yeast	310
8	Example of a Complete Quality Control Program for a Mid-sized Brewery	312

Analysis Methods	321
Chemical-technical Analysis	321
Water	321
Sample Collection	321
Odor and Taste	323
Color	326
Determination of Color – Visual Method	326
Clarity (Turbidity)	327
Method Using a Transparent Cylinder	327
Method Using a Secchi Disk	328
pH Value	328
Conductivity	330
Hardness	332
Definition	332
Total Hardness	335
Carbonate Hardness	338
Acid Consumption (Alkalinity, p and m Values)	339
Acid Capacity up to pH 8.2 or 4.3	339
Malt	341
Barley Malt	341
Sample Collection	341
Visual Inspection	343
Physical and Physiological Tests for Barley Malt	345
Endosperm Character	345
Glassy Kernels	345
Color	345
Determination of Friability with a Friabilimeter (EBC)	346
Acrospire Development	349
Sieving Test	351
Physico-chemical Analysis	353
Moisture Content (EBC)	353
Extract (EBC)	355
Odor of the Mash (EBC)	360
Iodine Test/Saccharification Rate (EBC)	360
Filtration (EBC)	361
Appearance	361
pH Value (EBC)	362
Wort Color, Visual Determination (EBC)	364
Nitrogenous Substances	366

Total Nitrogen, KJELDAHL Method (EBC)	366
Soluble Nitrogen, KJELDAHL Method (EBC)	370
Specialty Malts	372
Moisture Content (EBC).....	372
Extract in Roasted and Caramel Malt (EBC)	373
Color of Roasted and Caramel Malt (EBC).....	375
Color of Liquid Malt Coloring Agent.....	376
Visual Method	377
Spectrophotometric Method.....	378
Acidulated Malt	379
pH	379
Titration Acidity	379
L-Lactic Acid/D-Lactic Acid (EBC)	381
Wheat Malt	386
Adjuncts	386
Sample Collection	387
Moisture (EBC)	387
Extract	390
Extract, De Clerck Method (EBC).....	390
Extract, ASBC Method (EBC).....	393
Extract, Enzymatic Method for Corn (EBC)	396
Extract, ASBC Method for Liquid Adjuncts (EBC)	398
Total Nitrogen/Protein	399
Fat Content (Free Crude Fat) (EBC)	400
Color (EBC)	402
Gelatinization Temperature.....	404
Whole Hops and Pellets	408
Sample Collection	408
Manual Evaluation of Whole Hops.....	409
Wort and Beer	414
Sample Collection	414
Odor and Flavor of Wort	415
Visual Iodine Test	415
Degree of Attenuation	416
Limit of Attenuation in Wort (Fermentation Tube Method).....	416
Limit of Attenuation in Wort and Beer – Reference Method (EBC)	419
Limit of Attenuation in Wort and Beer – Rapid Method (EBC).....	421
Attenuation of Maturing and Finished Beer	422

Original Gravity and Alcohol	424
Degassing a Sample.....	425
Density Measurement.....	426
Hydrometer	426
Oscillating U-tube Density Measurement (EBC)	427
Apparent Extract (EBC)	428
Distillation Analysis – Reference Method (EBC)	430
Refractometric Analysis	433
Multifunctional Devices	436
Oscillating U-tube Density and NIR Measurements	437
Thermal Analysis Method – FermentoStar	439
Color – Visual Determination by Comparison.....	440
pH	442
Turbidity	445
Visual Method	445
Optical Method	446
Bitter Substances	448
Bittering Units (EBC).....	448
<i>iso</i> - α -Acids and α -Acids (Spectrophotometry).....	451
Foam	454
Foam Stability – Visual Method	454
Foam Stability, NIBEM.....	455
Foam Stability, Lg-Foam Tester	460
Foam Stability, Steinfurth Foam Stability Tester	462
Carbon Dioxide – Manometric Methods	463
Measuring Device for Carbon Dioxide in Tanks or Lines, Haffmans.....	464
Rapid Determination of Carbon Dioxide in Bottled Beer, STADLER and ZELLER.....	465
CO ₂ Measuring Device, Steinfurth System.....	467
Carbon Dioxide in Bottled Beer, ZAHM and NAGEL	468
Carbon Dioxide in Packaged Beverages or At-line with CarboQC, Anton Paar	469
Sensory Analysis	472
Raw Materials	472
Processing Aids, Operating Supplies and Additives.....	472
Filter Aids and Stabilizing Agents	472
Aroma	472
Flavor	473
Lactic Acid (Food-Grade Lactic Acid)	474
Activated Charcoal	475

Intermediate Products	475
Wort	476
Lactic Acid Produced by Natural Fermentation	478
Green Beer	481
Final Products – Evaluation of Individual Beer Samples	483
DLG Quality Assessment for Beer	483
Doemens Score Sheet	487
Labor Veritas Score Sheet	488
Tasting Scheme for Wheat Beers According to HERRMANN and SACHER	489

Microbiological Analysis	491
Brewery Microbiology, Standard Values, Basic Equipment and Principles ..	492
Microbreweries – General Information on Microbiology	492
Reference Values and Critical Values – Definitions	492
Reference Values, Limit Values and Standard Values for Beer	493
Method Matrices for Determination of Reference Values, Limit Values and Standard Values for Beer	498
Basic Microbiology Equipment and Procedures	501
General Microbiological Methods	503
Dilution Series	503
Pour Plate Technique	504
Spread Plate Technique (Spread Plates with Spatula)	505
Weighted Arithmetic Mean	506
Microbiological Methods for Detecting and Identifying Certain Groups of Microbes in the Brewery for Comparison to Standard, Reference and Critical Values	507
Total Cell Count, Mesophiles at 28 °C	507
<i>Enterobacteriaceae</i>	509
Coliforms – Method A	510
Coliforms – Method B (according to AGES)	512
<i>Escherichia coli</i>	514
Yeast and Molds	515
Beer-spoiling Bacteria	517
Methylene Blue Staining of Bacteria and Yeast	519
Determining Cell Count with a Counting Chamber	521
Methods, Types of Samples and Sample Collection Schedule for Routine Microbiological Quality Control	522
General Aspects/Sample Collection	522
Comprehensive Microbiological Quality Control according to JACOB	523
Simplified Microbiological Quality System (MQS)	523

List of Tables	547
List of Figures	551
List of Advertisers	555
