List of Figures	xv
1. Introduction	1
2. Beliefs	5
Decisions about Beliefs	6
Origins of Beliefs: I	7
Persistence of Beliefs	8
Other People Have Weird Beliefs	8
Examples of False Belief Perseverance	9
Reasons for Belief Perseverance	10
Group Differences in Belief Perseverance	14
Origins of Beliefs: II	22
3. Philosophy	25
Radical Skepticism	26
The Burden of Proof	28
Several Assumptions Underlie Almost All Claims to Knowledge	29
4. Certainty, Likelihood, and Probability	33

5. The Four Supposed Pillars of Knowledge	39
6. Pillar 1: A Priori Knowledge	41
The Case for Innate Knowledge	41
All the Above Is Irrelevant	43
7. Pillar 2: Religious Faith	45
The Origins of Religious Faith	46
Why Are There So Many Religions?	47
Religious Faith Is Beneficial	49
Faith (of Others) Is Very Beneficial to Some	51
Religious Leaders Have God's Cell Phone Number	52
Maybe They Had a Bad Connection	54
Other People Also Get Messages from God	55
So, Maybe Not So Beneficial	56
The Persistence of Religious Faith	58
Points to Ponder	60
Faith Is Antithetical to Truth	62
8. Leavitt Lied	65
9. Pillar 3: Reasoning	67
Human Reasoning Is Imperfect	67
Evolution and Reasoning: I	70
Evolution and Reasoning: II	71
Culture Influences Reasoning Style	73
Metaphors Influence Reasoning	74
Examples of (Considerably) Less than Optimal Reasoning	75
Inductive Arguments	79
Counter-Induction	82
Inductive Inferences Are Ambiguous	83
Formal Logic—Deductive Arguments	83
Conclusions Often Come First	87
We'll Never Know If Our Tools of Reasoning Lead to Valid Conclusions	88
Anything Can be Proved	89
Quantum Logic	89
Reason Doesn't Tell About the World	90
Recap	90
10. Reason and Science in Opposition	95
The Rules of Logic Are Empirical and Fallible	99

11. Pillar 4: Empiricism	101
Imperfect Processing	101
Research on Perception	102
Empiricists Fight Back—Unsuccessfully	106
Our Low Fidelity Memories	107
Deception	111
Motives to Deceive	112
Means	113
Opportunity	114
Drugs	114
Electrical Stimulation of the Brain	114
Natural Selection	115
FakeApps	117
Secret Experiments	118
“Knowledge” That Comes From Other Sources	118
Individuals	118
Corporate	122
Governmental and Political	125
The Media	128
The Internet	130
Historical	131
Censorship	134
Self-Deception	135
How Honest Are You With Yourself?	136
Science	137
Scientists May Unconsciously Bias Results or Commit Deliberate Fraud	137
Not Just Fraud	141
Honest Science	143
The Basic Observations May Be Wrong	143
Miniscule Changes in Initial Conditions May Produce Huge	
Changes in Ultimate Observations	143
The Data May Have Been Analyzed Incorrectly	146
The Data May Not Be Replicable	148
Observations Reported in Scientific Publications May Differ	
Considerably From Observations Over the Same Material That	
Go Unpublished	150
Inferences: Part I	152
Hard Sciences	153
Quantum Mechanics	153
The Single- and Double-Slit Experiment	156
Unstable Elements and Watched Pots	156

Pigeonholes and Pigeons	157
Quantum Eraser	157
Delayed-Choice	157
Interpretations	158
The Most Profound Discovery in the History of Science	161
Many Worlds	161
Beyond Quantum Mechanics	163
12. Reason and Science in Almost One Voice	173
13. Inferences Part II	175
Mathematics, Science, and Everyday Life	175
14. Recapitulation	179
15. Reasons for Resistance	183
Resistance Is Futile	186
A Priorists	188
Non-deductivists	188
Pragmatists	189
Transcendentalists	189
Vindicationists	189
Conjecturalists	190
16. Conclusions	193
Solipsism	193
There Is No God—Maybe	195
Afterlife—Not Out of the Question	196
On the Positive Side	201
Question You'll Probably Never be Able to Answer: Are Things	
Pretty Much What They Seem?	201
Worldviews of Prominent Physicists and Philosophers	202
Convincing Travelogue	202
How Should I Conduct My Life?	202
Keep on Trucking	203
17. Epilogue	205
Appendix 1: Beliefs About the Future by Experts	207
Appendix 2: History Myths	209
Appendix 3: Scientific Facts and Theories That Were Once	
Believed but Are Now Considered False	211
Index	213
