Part I Fundamentals of Energy Management 1

1 Introduction 2

1.1 Energy Transition 2

1.2 Digitization in the Energy Industry 5

1.3 Data Economics in the Energy Industry..... 7

2 The Value Chain of the Energy Industry12

2.1 Production.....13

2.1.1 Fossil Fuels14

2.1.1.1 Oil.....14

2.1.1.2 Natural Gas18

2.1.1.3 Coal.....20

2.1.1.4 Hydrogen.....23

2.1.2 Nuclear Fuels24

2.1.3 Renewable Energy Sources25

2.1.3.1 Wind Power26

2.1.3.2 Biomass27

2.1.3.3 Solar Energy27

2.1.3.4 Water Power28

2.1.3.5 Geothermal28

2.2 Generation.....29

2.2.1 Conventional Energy Plants31

2.2.1.1 Gas Turbine Power Plants and Gas and Steam Turbine Power Plants.....32

2.2.1.2 Lignite-fired Power Plants.....35

2.2.1.3 Hard Coal-fired Power Plants36

2.2.1.4 Stationary Fuel Cell Systems.....38

2.2.1.5 Nuclear Power Plants40

2.2.2 Regenerative Energy Systems41

2.2.2.1 Wind Turbines43

2.2.2.2 Biogas Plants44

2.2.2.3 Photovoltaic Systems45

2.2.2.4 Solar Thermal Power Plants46

2.2.2.5	Hydroelectric Power Plants.....	49
2.2.2.6	Geothermal Power Plants.....	51
2.3	Trading	53
2.3.1	Electricity.....	54
2.3.2	Gas	65
2.4	Transport.....	75
2.4.1	Electricity.....	76
2.4.2	Gas	91
2.4.3	Hydrogen	96
2.5	Distribution.....	97
2.5.1	Electricity.....	97
2.5.2	Gas	99
2.5.3	Hydrogen	101
2.6	Customers, Sales and Service	103
2.6.1	Electricity.....	104
2.6.1.1	Customers.....	104
2.6.1.2	Sales	106
2.6.1.3	Service	108
2.6.2	Gas	115
2.6.2.1	Customers.....	115
2.6.2.2	Sales	117
3	Asset Lifecycle Management of Energy Industry Assets	119
3.1	DIN ISO Standards in Asset Management.....	119
3.2	Organization, Tasks and Stakeholders.....	120
3.3	Planning and Construction	121
3.3.1	Energy Plants.....	122
3.3.2	Renewable Energy Installations	124
3.3.3	Network Expansion and Network Planning in the Smart Grid	130
3.4	Building Information Modeling	134
3.4.1	Model und Modeling	134
3.4.2	Maturity Model.....	136
3.4.3	Implementation.....	137
3.5	Operation and Maintenance	139
3.5.1	Standards and Laws.....	139

3.5.2	Maintenance Strategies of Plants and Machines	142
3.5.3	Maintenance Strategies for Operating Resources	143
3.6	Decommissioning, Dismantling, Conversion and Disposal.....	146
3.6.1	Oil Platforms.....	146
3.6.2	Coal- and Gas-fired Power Plants	148
3.6.3	Nuclear Power Plants.....	150
3.6.4	Wind Turbines.....	152
3.6.5	Electricity Grids	154
3.6.6	Gas Pipelines	154
3.7	Data and Application Systems in Asset Management.....	154
3.7.1	Enterprise Resource Planning Systems	155
3.7.2	Geoinformation Systems	159
3.7.3	Asset Strategy Planning Systems.....	161
3.7.4	Investment Prioritization Systems.....	162
3.7.5	Mobile Workforce Systems.....	163
3.7.6	Network Planning and Network Management Systems	163
3.7.7	Manufacturing Execution Systems	165
4	Stakeholder.....	168
4.1	Producers	169
4.1.1	Oil	169
4.1.2	Natural Gas	170
4.1.3	Lignite	170
4.2	Operator Power Plants	171
4.3	Operator Storage Facilities	175
4.3.1	Oil	175
4.3.2	Natural Gas and Hydrogen.....	176
4.3.3	Electricity.....	177
4.4	Energy Traders.....	178
4.4.1	Actors.....	178
4.4.2	OTC Market.....	179
4.4.3	European Energy Exchanges	180
4.4.4	Pricing Procedure.....	181
4.4.5	Trade Products.....	181
4.4.5.1	Forwards and Futures	182
4.4.5.2	Options.....	182
4.4.5.3	Swaps	183

4.4.5.4	Liquidity	184
4.5	Network Operators	185
4.5.1	Electricity.....	185
4.5.1.1	Transmission System Operators Electricity	185
4.5.1.2	Distribution System Operators Electricity.....	186
4.5.1.3	System Services of the TSOs and DSOs.....	187
4.5.2	Gas	190
4.5.2.1	Transmission System Operators Gas	190
4.5.2.2	Distribution System Operators Gas	191
4.5.2.3	Hydrogen Network Operators	191
4.6	Suppliers	192
4.6.1	Electricity.....	192
4.6.2	Gas	194
4.7	Metering Point Operator	195
4.7.1	Electricity.....	195
4.7.2	Gas	199
4.8	Customers	201
5	Business Processes.....	203
5.1	Production.....	204
5.1.1	Fossil Fuels.....	205
5.1.1.1	Oil.....	205
5.1.1.2	Natural Gas	208
5.1.1.3	Coal.....	211
5.1.1.4	Hydrogen.....	215
5.1.2	Nuclear fuels	219
5.1.3	Renewable Energy Sources	220
5.1.3.1	Wind Energy.....	221
5.1.3.2	Biomass	221
5.1.3.3	Solar Energy	222
5.1.3.4	Hydropower.....	223
5.1.3.5	Geothermal Energy	224
5.2	Generation.....	225
5.2.1	Conventional Energy Plants	226
5.2.2	Regenerative Energy Systems	231
5.3	Trading	241

5.4	Transport.....	245
5.4.1	Electricity.....	245
5.4.2	Gas	249
5.4.3	Hydrogen	251
5.5	Distribution.....	254
5.5.1	Electricity.....	254
5.5.2	Gas	256
5.5.3	Hydrogen	258
5.6	Customer Relationship Management	258
5.6.1	Customer Relations.....	259
5.6.2	Marketing and Sales.....	261
5.6.3	Service.....	263
6	Critical Infrastructure and Services in the Energy Sector	265
6.1	Production.....	267
6.1.1	Oil	267
6.1.2	Natural Gas.....	269
6.1.3	Coal	271
6.2	Generation.....	273
6.3	Trading	277
6.3.1	Electricity.....	277
6.3.2	Gas	279
6.4	Transport.....	280
6.4.1	Electricity.....	280
6.4.2	Gas	282
6.5	Distribution.....	284
6.5.1	Electricity.....	284
6.5.2	Gas	286
6.6	Customer Relationship Management	288
7	Application Systems	290
7.1	Production.....	292
7.1.1	Oil	292
7.1.2	Natural Gas.....	293
7.1.3	Lignite	294
7.2	Generation.....	300

7.2.1	Conventional Energy Plants	300
7.2.2	Regenerative Energy Systems	306
7.2.2.1	Wind Turbines	306
7.2.2.2	Hydroelectric Power Plants	308
7.2.3	Virtual Power Plants	311
7.3	Trading	314
7.4	Transport	317
7.4.1	Electricity	317
7.4.2	Gas	323
7.5	Distribution	326
7.5.1	Electricity	326
7.5.2	Gas	336
7.6	Customer Relationship Management	338
7.6.1	Marketing	338
7.6.2	Sales	340
7.6.3	Service	347
8	Legal Framework for the Energy Industry	349
8.1	National Laws and Regulations	349
8.1.1	Laws	350
8.1.2	Regulations	364
8.2	European Regulations and Directives	374
8.2.1	EU-Regulations	377
8.2.2	EU-Directives	380
PART II Innovations, Technologies and Digital Business Models in the Energy Industry		385
9	Technologies and Framework Conditions of the Digital Information Network	386
9.1	Big Data	386
9.2	Networking of Systems and Products	389
9.2.1	Cyber-Physical Systems	390
9.2.2	Internet of Things	392
9.3	Business Process Acceleration	401
9.3.1	Process Mining	402
9.3.2	Robotic Process Automation	406
9.3.3	Geoinformation Systems	409

9.4	Data Science	412
9.5	Data Governance	415
9.6	Databases.....	417
9.7	Cloud Computing.....	420
9.8	Digital Platforms	429
9.9	IoT Platforms.....	434
9.10	Data and IT Security.....	437
9.11	Data Protection	446
9.11.1	Personal Data	447
9.11.2	Non-personal Data	449
9.11.3	Cloud Services	450
9.11.4	Cyber-Physical Systems.....	453
9.11.5	Artificial Intelligence.....	455
10	Disruptive Technologies for new Business Processes	458
10.1	Development of Disruptive Technologies	458
10.2	Artificial Intelligence.....	459
10.3	AI-based self-learning Expert Systems	466
10.4	AI-supported Robot Systems.....	470
10.5	Unmanned Aircraft Systems	473
10.5.1	Terminology	474
10.5.2	Technology	477
10.5.3	DIN Standards and VDI Guidelines	491
10.5.4	Legal Framework	494
10.5.5	Air Traffic Management	499
10.5.6	Landscape	502
10.6	Distributed-Ledger-Technology – Blockchain	507
10.7	Extended Reality	512
10.7.1	Digital Twin	512
10.7.2	Virtual and Augmented Reality	515
10.8	3D-Print.....	518
11	Use Cases of Autonomous Systems in the Utility Value Chain	523
11.1	Production.....	524
11.1.1	Mining and Opencast Mining	524

11.1.2	Production Systems in the Oil Industry	527
11.1.3	Wind Turbines	529
11.2	Generation.....	533
11.2.1	Power Plants	534
11.2.2	Nuclear Power Plants.....	537
11.2.3	Wind Turbines	538
11.2.4	Photovoltaic Systems	544
11.2.5	Hydroelectric Power Plants	545
11.3	Transport.....	547
11.3.1	Overhead Power Lines.....	547
11.3.2	Gas routs	552
11.4	Distribution.....	553
11.4.1	Overhead Power Lines.....	554
11.4.2	Gas Infrastructure	556
11.5	Customers, Sales, Service in Future (Smart Cities)	557
12	Implementation of Disruptive Technologies in the Energy Industry.....	573
12.1	Fundamentals of Innovations and Technologies	573
12.1.1	Innovations and Service Innovations	573
12.1.2	Technologies und Disruptive Technologies	577
12.1.3	Business Models and Business Model Innovations	580
12.1.4	Data, Informations and Knowledge.....	584
12.2	Initial Situation of the Energy Industry.....	588
12.3	Innovation und digital Transformation	593
12.4	Corporate Governance	595
12.5	Corporate Strategy	599
12.5.1	Technology and Innovation Strategy	603
12.5.2	Knowledge Strategy	611
12.5.3	IT Strategy	617
12.5.4	Data Strategy	632
12.5.5	Data Security Strategy	643
12.5.6	Data Protection Strategy	648
13	Conclusion and Outlook	654
	Bibliography	669
