Nomenclature	ix
Greek	ix
Latin	ix
Acronyms	xi
1 Introduction	1
1.1 Research Review	2
1.2 Outline of the Thesis	4
1.3 Research Concept	5
2 Medium Voltage Drives	7
2.1 Test Bench Requirements for Medium Voltage Drives	8
2.2 Measurement System Setup	9
2.3 Multilevel Converters	11
2.3.1 Converter Topology and Waveform	13
2.3.2 Converter Topology of Modular Multi-Point Converter	17
3 Consideration on the Uncertainty in Measurement	19
3.1 Model of the Measurement	20
3.2 Determination of Measurement Uncertainty	23
3.3 Specification of Measurement Uncertainty	24
3.4 Statistical Analysis of Measurement Series	25
4 Data Acquisition and Processing	27
4.1 Data Acquisition and Signal Conditioning	27
4.1.1 Analog Digital Converter	28
4.1.2 Measurement Uncertainty of Analog Digital Converter (ADC)	29
4.2 Data Processing	30
4.2.1 Discrete Integration Method and its Uncertainty	30
4.2.2 Harmonic Active Power Determination and its Uncertainty	32
4.3 Active Power Determination and Uncertainty	36
4.4 Comparison of Active Power Processing Methods	40
5 Power Measurements: Equipment and Characterisation	43
5.1 Voltage Measurement	43
5.1.1 Voltage Measuring Devices	43
5.1.2 Determination of Transfer Behaviour	50
5.1.3 Investigations on Transfer Behaviour of Voltage Measurement Devices	53
5.1.4 Transfer Behaviour of Voltage Measurement Devices	57

5.1.5	Comparison of Voltage Measurement Devices	58
5.2	Current Measurement	61
5.2.1	Current Measurement Devices	61
5.2.2	Investigations on Transfer Behaviour of Current Transformers	66
5.2.3	Transfer Behaviour of Current Transformers	67
5.2.4	Comparison of Current Measurement Devices	69
6	Measurements on Medium Voltage Drives	71
6.1	Test and Measurement Setups	71
6.2	Comparison of Active Power Measurement Setups	72
6.3	Measurement of DC Components	77
6.4	Phase Angle Uncertainty	78
6.5	Fundamental and Harmonics Ratio of Active Power	80
6.6	Results of Comparison	81
7	Uncertainty Limits of Power Measurement	85
7.1	Determination of Efficiency	85
7.1.1	Induction Motors	86
7.1.2	Synchronous Machines	87
7.1.3	Back-To-Back - 2-1-1D & 2-1-2D	88
7.1.4	Uncertainty Comparison of Methods for the Determination of Efficiency	89
7.2	Limits of Measurement Transformers, Dividers and Power Analysers	91
7.3	Limits for Medium Voltage Drives and Tests	92
7.4	Guideline of Measurement Setup Selection	93
8	Conclusion	95
9	Appendix	97
9.1	Uncertainty of Harmonics	97
9.1.1	Alternating Component	97
9.1.2	DC Component	98
9.1.3	Uncertainty of the Phase	98
9.2	Sample Frequency for Higher Frequency Signals	101
9.3	Determination of Measurement Device Transfer Behaviour	102
9.4	Measurement Applications and Motors	103
9.4.1	Voltages, Currents and Uncertainties of the Test Setup2	104
9.5	Uncertainty Type B - Direct Method for Determination of Efficiency	107
9.6	Uncertainty Type B - Back to Back	108
9.7	Uncertainty Type B - Indirect Method for Determination of Induction Motor Efficiency	110
10	Bibliography	113
