

Contents

1	Introduction	2
1.1	Anatomy of the Anterior Abdominal Wall	2
	<i>Andreas Prescher and Werner Lierse (†)</i>	
1.1.1	Muscles of the Abdominal Wall	2
	The Rectus Abdominis Muscle	2
	The External Oblique Muscle	4
	The Internal Oblique Muscle	6
	The Transversus Abdominis Muscle	7
1.1.2	Fasciae and Fascial Structures	8
	Subcutaneous (Camper) Fascia or Fatty Layer of the Abdomen	8
	Superficial Abdominal Fascia (Scarpa fascia) or Membranous Layer of the Abdomen	8
	The Rectus Sheath	9
	The Linea Alba	9
	The Transversalis Fascia	10
	Peritoneum	13
	Inguinal Ligament	14
	Inguinal Falx (Conjoint Tendon)	15
	Interfoveolar Ligament (of Hesselbach)	15
1.1.3	Anatomical Regions and Hernial Orifices	15
	Inguinal Canal with Superficial and Deep Inguinal Rings	15
	Muscular Lacuna	18
	Vascular Lacuna and Femoral Ring	18
	The Inguinofemoral Region	18
1.1.4	Laparoscopic Anatomy	23
1.2	Definition and Terminology	24
	<i>Volker Schumpelick</i>	
1.2.1	Hernia	24
1.2.2	Structure of a Hernia	24
1.2.3	Hernia Disease	24
1.2.4	Incarceration	26
1.2.5	Hernia Location	26
1.3	Diagnosis	30
	<i>Son Truong Ngoc and Marcel Binnebösel</i>	
1.3.1	History	30
1.3.2	Examination	30
1.3.3	Differential Diagnosis	31
1.3.4	Investigations	31
	Plain X-Ray of the Abdomen	31
	Gastrointestinal or Colon Imaging with Water-Soluble Contrast Agent	31
	Herniography (Peritoneography)	31
	Computed Tomography, Magnetic Resonance Imaging	31
1.3.5	Ultrasonography	32
	Equipment and Examination Technique	32
	Ultrasonographic Hernia Criteria	32
	Ultrasonographic Differential Diagnosis of Pathological Findings in the Abdominal Wall and Groin	35
1.3.6	Doppler Ultrasonography, Duplex Ultrasonography	36
1.4	The History of Hernia Surgery	37
	<i>Volker Schumpelick</i>	
1.4.1	Definition, Anatomy, and Pathogenesis	37
1.4.2	Conservative Treatment	39
1.4.3	Surgery	39
1.5	Repair Principles and Materials	46
	<i>Uwe Klinge and Matthias Pross</i>	
1.5.1	Choice of Procedure	46
	The Patient	46
	Hernia Type	46
	Operation Techniques	47
1.5.2	Principles for Choice of Procedure	47
1.5.3	Basic Hernia Repair Procedures	48
	Inguinal Hernias	48
	Abdominal Wall	48
1.5.4	Materials	52
	<i>Uwe Klinge and Bernd Klosterhalfen</i>	
1.6	Hernia Biomechanics	54
	<i>Christian Hollinsky</i>	
1.6.1	Introduction	54
	Muscle Forces in the Abdominal Wall	54
	Linea Alba	55
1.6.2	Mechanics of Hernia Surgery with Mesh Reinforcement	55
	Material Properties of Hernia Meshes	55
	Prosthesis Overlapping	55
	Bulging	57
	Fixation of Plastics	58

1.7	Biological Meshes	58	1.9	Pediatric Hernia	65
	<i>Dirk Weyhe</i>			<i>Gerhard Steinau</i>	
1.7.1	Introduction and Basic Principles	58	1.9.1	Indication.....	65
1.7.2	Biomechanical Principle of Mesh		1.9.2	Preparation for Operation	65
	Augmentation	58	1.9.3	Special Risks and Informed Consent.....	65
1.7.3	Biological Materials	58	1.9.4	Anesthesia.....	65
	Biological Cross-Linked and Non-Cross-Linked		1.9.5	Position.....	65
	Membranes (Collagenase Resistance)	58	1.9.6	Access	65
1.7.4	Indications and Complications of Biological		1.9.7	Relevant Anatomy, Dangers, and Tricks	65
	Membranes.....	59	1.9.8	Management of Special Complications	65
1.8	Anesthesia	60	1.9.9	Postoperative Care	65
	<i>Ekkehard Schippers</i>		1.9.10	Operation Techniques	65
1.8.1	General Anesthesia.....	60		Inguinal Hernia Operation in Boys	65
1.8.2	Epidural and Spinal Anesthesia	60		Hydrocele	70
1.8.3	Local Anesthesia	60		Inguinal Hernia Surgery in Girls	70
	Local Anesthesia Technique.....	61	1.9.11	Inguinal Testis	73
				Laparoscopy	77
2	Adult Inguinal Hernia	86			
2.1	Indications and Choice of Procedure ...	86		Lotheissen/McVay Repair.....	114
	<i>Volker Schumpelick</i>			<i>Karsten Junge</i>	
2.1.1	Indications.....	86	2.3	Open Mesh Techniques	117
	Choice of Procedure	86	2.3.1	Lichtenstein Repair.....	117
2.2	Open Suture Techniques	87		<i>Georg Arlt</i>	
2.2.1	Approach and Dissection	87		Repair Principle	117
	<i>Volker Schumpelick</i>			Indication	118
	Indication	87		Operation Techniques.....	118
	Operation Preparation	87	2.3.2	Transinguinal Preperitoneal Patch.....	121
	Special Risks, Informed Consent.....	87		<i>Volker Schumpelick, Ralph Lorenz, and</i>	
	Anesthesia	87		<i>Andreas Koch</i>	
	Position.....	87		Repair Principle	121
	Access	87		Indication	121
	Relevant Anatomy, Dangers, and Tricks	87		Operation Techniques.....	121
	Management of Special Complications	87	2.3.3	Nyhus Repair with Mesh	127
	Postoperative Management.....	87		<i>Georg Arlt</i>	
	Operation Techniques.....	87		Repair Principle	127
2.2.2	Hernia Repair	96		Indications	127
	Bassini Repair.....	96		Operation Techniques.....	127
	<i>Volker Schumpelick</i>		2.3.4	The Stoppa/Wantz Procedure	132
	The Zimmerman Repair	101		<i>Volker Schumpelick</i>	
	<i>Karsten Junge</i>			Indications	133
	Minimal Repair Technique.....	104		Contraindications	133
	<i>Ulrike Muschaweck and Christoph Peter</i>			Material.....	133
	<i>Schuhmacher</i>			Preparation.....	133
	Shouldice Repair	107		Anesthesia	133
	<i>Volker Schumpelick and Andreas Tittel</i>			Position.....	133

	Postoperative Care	133		Informed Consent, Preoperative Preparation,	
	Operation Techniques	133		Perioperative Management	151
2.3.5	Three-dimensional Mesh Procedures	144		Anesthesia	152
	<i>Tim Tollens and Ralph Lorenz</i>			Patient and Operator Position	152
	Introduction and History: The Gilbert			Trocar Choice and Position	152
	Technique with the Prolene Hernia System/			Pneumoperitoneum Creation	152
	Ultrapro Hernia System	144		Operation Techniques	153
	Operation Techniques	144		Learning Curve Results with Simple and	
	Summary	146		Difficult Hernias	156
2.3.6	Plug and Patch	147	2.4.2	Comparison of TAPP with TEP	157
	<i>Friedrich-Eckart Isemer</i>			Totally Extraperitoneal Mesh	
	Indications	147		Repair (TEP)	157
	Equipment	148		<i>Andreas Kuthe</i>	
	Operative Principle	148		Introduction	157
	Operation Techniques	148		Operation Techniques	157
2.4	Laparoscopic Techniques	150		Special Aspects	161
2.4.1	Transabdominal Preperitoneal Mesh	150	2.4.3	Results	163
	<i>Reinhard Bittner and Jochen Schwarz</i>			TEP: Indications and Contraindications	164
	Historical Development	150		Minitecture	165
	Indications	151		<i>Henning Niebuhr</i>	
				Introduction	165
				Instruments	165
				Operation techniques	165
3	Special Hernias	172			
3.1	Female Hernias	172	3.4.3	Forms and Location	181
	<i>Georg Arlt</i>		3.4.4	Choice of Procedure	184
3.1.1	Operation Tactics	172	3.4.5	Preparation	185
3.1.2	Operation Techniques	172	3.4.6	Dissection and Repair	186
3.2	Sportsman's Groin	174	3.4.7	Complications	186
	<i>Ulrike Muschaweck and Christoph Peter</i>		3.5	Umbilical Hernia	187
	<i>Schuhmacher</i>			<i>Ulla Volmer and Georg Arlt</i>	
3.2.1	History	174	3.5.1	Epidemiology and Pathogenesis	187
3.2.2	Diagnosis	175	3.5.2	Diagnosis and Classification	187
	Clinical Examination	175	3.5.3	Indications	187
	Ultrasonography	175	3.5.4	Complications	187
	Magnetic Resonance Imaging and Computed		3.5.5	Operation Technique	187
	Tomography	175		Spitzzy Repair	189
	Herniography	176		Preperitoneal Umbilical Mesh	
3.2.3	Treatment	176		Plasty	189
3.2.4	Summary	176	3.6	Femoral Hernia	192
3.3	Sliding Hernia	177		<i>Volker Schumpelick</i>	
	<i>Volker Schumpelick</i>		3.6.1	Basic Principles	192
3.4	Recurrent Hernia	180		General Remarks	192
	<i>Karsten Junge</i>			The Hernial Orifice	192
3.4.1	General Remarks/Epidemiology	180		Pathogenesis	192
3.4.2	Risk Factors	180		Diagnosis	193
			3.6.2	Indications	193

3.6.3	Preparation, Anesthesia, and Positioning. . .	193	3.7.5	Perineal Hernia	213
3.6.4	Operation Tactics.	193		Location	213
3.6.5	Forms of Repair	194		Symptoms	213
	Crural Access	194		Operation Techniques	215
	Inguinal Access	194	3.7.6	Interparietal Hernias	215
	Preperitoneal Access.	197		Location	215
3.6.6	Operation Techniques	197		Symptoms	215
	Crural Access	197		Operation Techniques	215
	Inguinal Access	201	3.8	Spigelian Hernia.	217
