

Foreword	ix
Preface	x
Acknowledgments	xii
Contributors	xiii
 Section I Principles	 1
1 Patient Safety in Plastic Surgery	3
<i>Brent B. Pickrell, Andrew P. Trussler</i>	
1.1 Introduction	3
1.2 Practice-Based Safety	3
1.3 Patient Risk Stratification	4
1.4 Intraoperative Risk	4
1.5 Conclusions	10
1.6 Key Points	10
2 Wound Healing	13
<i>Matthew G. Kaufman, Matthew R. Louis, Shan Shan Qiu, Edward P. Buchanan</i>	
2.1 Introduction	13
2.2 Basic Science	13
2.3 Factors Affecting Wound Healing	17
2.4 Wound Care Management	21
2.5 Scar Management	23
2.6 Conclusions	27
2.7 Key Points	27
3 Wound Management and Pressure Sores	31
<i>Ricardo Roa, Cristián Taladriz, Daniel Calderón, Wilfredo Calderón</i>	
3.1 Introduction	31
3.2 Basic Science	31
3.3 Wound Assessment	32
3.4 Wound Debridement	33
3.5 Skin Substitutes	38
3.6 Clinical Applications	40
3.7 Pressure Sores	41
3.8 Basic Science	42
3.9 Classification	44
3.10 Treatment	44
3.11 Conclusions	47
3.12 Key Points	47
4 Negative Pressure Wound Therapy	51
<i>Javier Buendia, Diego Marré, Marcus Castro Ferreira</i>	
4.1 Introduction	51
4.2 Basic Science	52
4.3 Dressings and Parameters	55
4.4 Parameters	56
4.5 Indications and Contraindications	57
4.6 Tips and Tricks	59
4.7 Clinical Applications	60
4.8 Conclusions	62
4.9 Key Points	62
5 Local Anesthetics and Common Nerve Blocks	65
<i>Pablo Monedero, Ismael González, Jesús Olivas</i>	
5.1 Introduction	65
5.2 Basic Science	65
5.3 Classification of Local Anesthetics	66
5.4 Pharmacology	66
5.5 Toxicity and Complications of Local Anesthetics	67
5.6 Allergic Reactions	68
5.7 Adjuvants	69

5.8	Essential Regional Blocks for Plastic Surgery	69	5.10	Conclusions	75
5.9	Median Nerve Block	73	5.11	Key Points	76
6	Soft Tissue Infections and Antibiotics in Plastic Surgery	77			
	<i>Cristina Aubá, José L. del Pozo</i>				
6.1	Introduction	77	6.4	Antimicrobials for Skin and Soft Tissue Infections	91
6.2	Skin and Soft Tissue Infections	77	6.5	Conclusions	96
6.3	Alloplastic Infections	88	6.6	Key Points	96
7	Implants and Biomaterials	99			
	<i>Marco Romeo, Chiara Distefano</i>				
7.1	Introduction	99	7.4	Clinical Applications	109
7.2	Materials	100	7.5	Conclusions	110
7.3	Implantation Tips and Pitfalls	108	7.6	Key Points	110
8	Principles of Osteosynthesis	113			
	<i>Pedro Bolado, Jorge Bonastre, Luis Landin</i>				
8.1	Basic Science	113	8.4	Distraction Osteogenesis	123
8.2	Fracture Repair	116	8.5	Conclusions	124
8.3	Complications	121	8.6	Key Points	124
9	Essentials of Dermatology for Plastic Surgeons	127			
	<i>Isabel Irarrazaval, Pedro Redondo</i>				
9.1	Structure and Function of the Skin ...	127	9.7	Miscellaneous	135
9.2	Basic Lesions of the Skin	128	9.8	Premalignant Lesions	136
9.3	Skin Biopsies	129	9.9	Nonmelanoma Skin Cancers	137
9.4	Nonsurgical Treatment Modalities ...	129	9.10	Conclusions	147
9.5	Benign Skin Tumors	131	9.11	Key Points	147
9.6	Fibrous Tumors	134			
10	Laser Therapy: Principles and Applications in Skin Diseases	151			
	<i>Maidel Pretel, Ester Moreno-Artero</i>				
10.1	Introduction	151	10.6	Pigmentation Disorders	161
10.2	Basic Science	151	10.7	Laser Hair Removal	163
10.3	Therapeutic Parameters	153	10.8	Skin Resurfacing	164
10.4	Types of Laser	154	10.9	Conclusions	165
10.5	Clinical Applications	154	10.10	Key Points	166
11	How to Set Up a Research Protocol in Plastic Surgery	169			
	<i>Stefan Danilla, Ekaterina Troncoso Olchevskaia</i>				
11.1	Introduction	169	11.4	Measuring the Accuracy of a Diagnostic Test	172
11.2	Clinical Question and Types of Study ..	169	11.5	Determining the Prognosis of a Disease	173
11.3	Basic Components of a Research Protocol	171			

11.6	Analyzing the Effectiveness of a Treatment	175	11.8	What about the Analysis?	179
11.7	In Search of the Cause of Your Patient's Disease	177	11.9	Key Points	179
Section II Techniques			183		
12	Basic Surgical Techniques, Sutures, and Wound Closure	185			
	<i>Diego Marré, Tomas Gantz, Alex Eulufi</i>				
12.1	Introduction	185	12.5	The Unfavorable Scar: Prevention and Treatment	198
12.2	Sutures	185	12.6	Common Surgical Procedures	205
12.3	Wound Closure	190	12.7	Conclusions	206
12.4	Suturing Techniques	196	12.8	Key Points	206
13	Grafts: Skin, Fascia, Nerve, Tendon, Cartilage, and Bone	207			
	<i>Álvaro Cabello, Aránzazu Menéndez, Diego Marré, Bernardo Hontanilla</i>				
13.1	Introduction	207	13.6	Cartilage Grafts	221
13.2	Skin Grafts	207	13.7	Bone Grafts	223
13.3	Fascia Grafts	214	13.8	Conclusions	225
13.4	Tendon Grafts	215	13.9	Key Points	225
13.5	Nerve Repair and Grafting	217			
14	Fat Grafting	229			
	<i>Stefan Danilla, Ekaterina Troncoso Olchevskaia</i>				
14.1	Introduction	229	14.4	Clinical Applications	231
14.2	Basic Science	229	14.5	Conclusions	232
14.3	Surgical Technique	230	14.6	Key Points	233
15	Vascular Anatomy of the Skin and Muscles	235			
	<i>Diego Marré, Michael Tecce, Alejandro Conejero</i>				
15.1	Introduction	235	15.4	Regional Blood Supply	246
15.2	Basic Science	236	15.5	Conclusions	258
15.3	Blood Supply to the Muscles	243	15.6	Key Points	259
16	Flaps	261			
	<i>Diego Marré, Leigh Jansen, Sandhya Deo</i>				
16.1	Introduction	261	16.6	Fasciocutaneous Flaps	274
16.2	Basic Science	262	16.7	Flap Modifications	276
16.3	Principles of Flap Surgery	264	16.8	Perforator Flaps	281
16.4	Flap Classification	264	16.9	Propeller Flaps	285
16.5	Putting It All Together: Examples of Commonly Used Local Flaps	270	16.10	Conclusions	287
			16.11	Key Points	288
17	Tissue Expansion	291			
	<i>Alvaro Cuadra, Bruno Dagnino</i>				
17.1	Introduction	291	17.3	Types of Expanders	294
17.2	Basic Science	292			

17.4	Preoperative Planning and Surgical Technique	296	17.7	Reexpansion	303
17.5	Complications	298	17.8	Preexpanded Free Flaps	303
17.6	Clinical Applications	299	17.9	Conclusions	303
	17.10		Key Points	304	
18	Burns	309			
	<i>José Manuel Collado Delfa</i>				
18.1	Introduction	309	18.5	Chemical Injuries	331
18.2	Epidemiology	309	18.6	Cold Injuries	335
18.3	Thermal Injury	310	18.7	Key Points	336
18.4	Electrical Injuries	327			
19	Microsurgery	341			
	<i>Diego Marré, Pablo Zancolli, Gustavo Pérez-Abadía, Héctor Roco</i>				
19.1	Introduction	341	19.6	Postoperative Pharmacological Therapy in Microsurgery	361
19.2	Training in Microsurgery	342	19.7	Clinical Applications	363
19.3	Basic Science of Free Flap Failure	351	19.8	Conclusions	365
19.4	Factors Influencing Flap Failure	354	19.9	Key Points	365
19.5	Free Flap Monitoring and Salvage	358			
20	Facial Trauma	369			
	<i>Nicolás Pereira, Patricio Andrades</i>				
20.1	Introduction	369	20.5	Clinical Cases	387
20.2	Relevant Anatomy	369	20.6	Conclusions	387
20.3	Soft Tissue Trauma	370	20.7	Key Points	389
20.4	Maxillofacial Trauma	373			
21	Hand Trauma	393			
	<i>S. Raja Sabapathy, R. Raja Shanmugakrishnan</i>				
21.1	Introduction	393	21.5	Management of Hand Injuries	400
21.2	Relevant Anatomy	393	21.6	Clinical Cases	405
21.3	Assessment of an Injured Hand	395	21.7	Conclusions	408
21.4	Identification of the Injured Structures	396	21.8	Key Points	408
	Index	411
