Preface 10

General Basics 11

1 General 12

1.1 How to Use This Book 12

1.2 Examination Technique and Equipment ... 13

Who do you examine first when learning to scan? 13

2 Basic Physical and Technical Principles 22

2.1 Ultrasound 22

Definitions 22

Propagation of sound 22

Production and detection of ultrasound waves: the pulse-echo principle 23

Diagnostic ultrasound: propagation of ultrasound in biological tissue 23

2.2 Producing an Image 24

A-Mode 24

B-Mode 24

M-Mode 25

2.3 Artifacts 26

Noise 26

Acoustic shadowing 26

Posterior acoustic enhancement 26

Reverberations 26

Beam-width artifact 27

Side-lobe artifact 28

Mirror-image artifact 29

Lateral edge shadow 30

Abdominal Ultrasound 31

3 Blood Vessels: The Aorta and Its Branches, the Vena Cava and Its Tributaries 32

3.1 Preliminary Remarks 32

3.2 Locating the Aorta and Vena Cava 32

3.3 Imaging the Aorta and Vena Cava in Their Entirety 33

Demonstrating the aorta and vena cava in transverse section 33

Demonstrating the aorta and vena cava in longitudinal section 33

Abnormalities in the course of the aorta 34

3.4 Organ Details 35

Demonstrating arterial and venous pulsations 35

Evaluating the vessel walls and lumina 35

Identifying and defining the branches of the aorta and vena cava 37

3.5 Anatomical Relationships 41

Relationship of the aorta and vena cava to the diaphragm, liver, and cardia 41

Area surrounding the celiac trunk and the course of the hepatic artery, splenic artery, and left gastric artery 42

Superior mesenteric artery, splenic vein, and renal vessels 46

Iliac vessels 51

Lymph nodes near the retroperitoneal vessels 53

4	Liver	56
4.1	Preliminary Remarks	56
4.2	Locating the Liver	57
4.3	Imaging the Liver in Its Entirety	58
	Outlines of the liver	58
	Systematic survey of liver volume	64
4.4	Organ Details	67
	Shape	67
	Size	67
	Parenchymal pattern	67
	Vessels of the liver	74
	Division of the liver into lobes, segments, and subsegments	76
	The portal vein and its branches	96
4.5	Anatomical Relationships	101
	Relationship of the left portion of the liver	102
	Relationship of the central portion of the liver	104
	Relationships of the right portion of the liver	107
	Ascites	109
5	Porta Hepatis	110
5.1	Preliminary Remarks	110
5.2	Locating the Porta Hepatis	111
5.3	Systematic Definition of the Porta Hepatis in Transverse and Longitudinal Sections	113
	Defining the porta hepatis in transverse sections	113
5.4	Organ Details: Details of the Vessels in the Porta Hepatis	116
	Portal vein	116
	Bile duct	119
5.5	Anatomical Relationships	139
	Relationship of the gallbladder to the liver	140
	Relationship of the gallbladder to the portal vein	143
	Relationship of the gallbladder to the antrum, bulb, and duodenum	146
6	Gallbladder	120
6.1	Preliminary Remarks	120
6.2	Locating the Gallbladder	121
6.3	Imaging the Entire Gallbladder	122
	Defining the gallbladder in upper abdominal transverse scans	122
	Defining the gallbladder in upper abdominal longitudinal scans	123
	Locating and defining the gallbladder with intercostal flank scans	124
	Variable position of the gallbladder	124
	Nonvisualization of the gallbladder	126
6.4	Organ Details	128
	Regions of the gallbladder	128
	Size of the gallbladder	128
	Variable shape of the gallbladder	130
	Gallbladder wall	131
	Gallbladder contents	133
	Special acoustic phenomena in gallbladder scanning	137

7	Pancreas	149
7.1	Preliminary Remarks	149
7.2	Locating the Pancreas Anteriorly	149
7.3	Imaging the Entire Pancreas	152
	Defining the pancreas in upper abdominal transverse scans	152
	Defining the pancreas in upper abdominal longitudinal scans	153
	Scanning the tail of the pancreas through the spleen	154
	Variable shape of the pancreas	154
7.4	Organ Details	155
	Pancreatic parenchyma	155
	Pancreatic duct	159
	Common bile duct	160
	Measuring the pancreatic diameter	162
7.5	Anatomical Relationships	163
	Relationships of the tail of the pancreas	163
	Relationships of the body of the pancreas	166
	Relationships of the head of the pancreas	170
8	Stomach, Duodenum, and Diaphragm	178
8.1	Preliminary Remarks	178
8.2	Locating the Stomach, Duodenum, and Diaphragm	179
8.3	Organ Details	180
	Stomach wall	180
	Changes in the stomach wall	180
8.4	Organ Boundaries and Relationships	181
	Esophagus and cardia	181
	Body of the stomach	185
	Antrum and duodenum	187
	Diaphragm	191
9	Spleen	193
9.1	Preliminary Remarks	193
9.2	Locating the spleen	193
9.3	Imaging the Spleen in Its Entirety	195
	Defining the spleen in longitudinal sections	195
	Defining the spleen in transverse sections	196
9.4	Organ Details	197
	Shape of the spleen	197
	Determining the size of the spleen	198
	Echo pattern	199
9.5	Anatomical Relationships	202
	Relationship of the spleen to the pancreas, kidney, colic flexure, and stomach	203
	Relationship of the spleen to the pleura	205
	Abnormalities associated with the spleen	206
10	Kidneys	207
10.1	Preliminary Remarks	207
10.2	Locating the Kidneys	210
10.3	Imaging the Kidneys in Their Entirety	212
	Longitudinal flank scan of the right kidney	212
	Transverse flank scan of the right kidney	213
	Longitudinal flank scan of the left kidney	214
	Transverse flank scan of the left kidney	215
	Abnormalities in locating the kidneys	215
10.4	Organ Details	216
	Size and shape of the kidneys	216
	Renal parenchyma and renal sinus	220
10.5	Anatomical Relationships of the Right Kidney	230
	Relationship of the right kidney to the liver	231
	Relationship of the right kidney to the psoas and quadratus lumborum muscles	234
	Relationship of the right kidney to the colon	237
	Relationship of the right kidney to the gallbladder	239

10.6	Anatomical Relationships of the Left Kidney	242	Relationship of the left kidney to the psoas and quadratus lumborum muscles	245
	Relationship of the left kidney to the spleen	243	Relationship of the left kidney to the colon	245
11	Adrenal Glands	246		
11.1	Preliminary Remarks	246	11.3	Imaging the Adrenal Glands
11.2	Locating the Adrenal Glands	247		Right adrenal gland
				Left adrenal gland
			11.4	Organ Details
				Abnormalities of the adrenal glands
12	Bladder, Prostate, and Uterus	252		
12.1	Preliminary Remarks	252		Demonstrating the bladder and prostate in longitudinal section
12.2	Locating the Bladder, Prostate, and Uterus	252		Demonstrating the bladder and uterus in transverse section
12.3	Imaging the Bladder and Prostate or Uterus in Their Entirety	254		Demonstrating the bladder and uterus in longitudinal section
	Demonstrating the bladder and prostate in transverse section	254	12.4	Organ Details
				Bladder and prostate
				Uterus
	Brief Instructions and Documentation	259		
13	Quick Guide	260		
13.1	Vessels	260	13.3	Porta Hepatis
	Examination targets	260		Examination targets
	Assessment of	260		Locating
	Locating	260		Standard slices
	Standard slices	260		Assessment
	Assessment	261		Normal values
	Normal values	262		Abnormalities
	Abnormalities and variants, pitfalls	262	13.4	Gallbladder
13.2	Liver	263		Examination targets
	Examination targets	263		Locating
	Locating	263		Standard slices
	Standard slices	263		Assessment
	Assessment	264		Normal values
	Normal values	267		Abnormalities and variants, pitfalls
	Abnormalities and variants, pitfalls	267		

13.5	Pancreas	275	13.8	Kidneys	282
	Examination targets	275		Examination targets	282
	Locating	275		Locating	282
	Standard slices	275		Standard slices	282
	Assessment	276		Assessment	283
	Normal values	277		Normal values	284
				Abnormalities and variants, pitfalls	284
13.6	Stomach, Duodenum, and Diaphragm	278	13.9	Adrenal Glands	285
	Examination targets	278		Examination targets	285
	Locating	278		Locating	285
	Standard slices	278		Standard slices	285
	Assessment	278		Assessment	285
13.7	Spleen	279	13.10	Bladder, Prostate, and Uterus	286
	Examination targets	279		Examination targets	286
	Locating	279		Locating	286
	Standard slices	279		Standard slices	286
	Assessment	279		Assessment	287
	Normal values	281		Normal values	287
	Abnormalities and variants, pitfalls	281			
14	The Sono Consultant	288			
14.1	Ultrasound Findings	289	14.2	Clinical Presentation	318
15	Documentation	335			
15.1	Guidelines	335		Nomenclature	336
15.2	Practical Application	336		Aid to formulating organ-related findings	337
	Written report	336		Image documentation	339
	Index	343			
	Normal Ultrasound Measurement Values	350
