1 Anatomy and Physiology	1	Characteristics of a Multifactorial :	
Development	1	Disease	42
Crown Development	2	Genetic Component	43
Root Development	2	Peri-implantitis	46
Cementogenesis	2		
Marginal Periodontium	3	4 Classification of Periodontal Diseases	47
Macroscopic and Microscopic Anatomy ..	4	Current Classification	47
Oral Mucosa	4	Plaque-Induced Gingival Diseases	47
Gingiva	4	Systemically Modified Gingival	
Peri-implant Mucosa	7	Diseases	47
Root Cementum	7	Drug-Influenced Gingival Diseases ...	49
Periodontal Ligament	8	Gingival Diseases Modified by	
Alveolar Bone Proper	9	Malnutrition	50
Physiology	9	Gingival Diseases Not Induced by Dental	
Turnover Rates	9	Plaque	50
Defense Mechanism	10	Gingival Diseases of Specific Bacterial	
Possibilities of Repair	10	Origin	50
		Gingival Diseases of Viral Origin	50
2 Periodontal Microbiology	11	Gingival Diseases of Fungal Origin ...	51
Ecology of the Mouth	11	Gingival Lesions of Genetic Origin ...	51
Biodiversity	11	Gingival Manifestations of	
The Oral Cavity as a Biotope	13	Mucocutaneous Diseases	51
Colonization Mechanisms	14	Allergic Reactions	53
Biofilm Dental Plaque	14	Traumatic Lesions	53
Formation of Supragingival Plaque ...	16	Foreign Body Reactions	53
Colonization of the Subgingival Region	17	Periodontitis	53
Dental Calculus	18	Chronic Periodontitis	53
Periodontitis: an Infectious Disease	18	Aggressive Periodontitis	53
Identification of Periodontal Pathogens	18	Periodontitis as Manifestation of	
Types of Infection	20	Systemic Disease	55
The Susceptible Host	20	Necrotizing Periodontal Diseases	56
Presence of Pathogens	21	Necrotizing Ulcerative Gingivitis	56
Absence of Beneficial Microorganisms	23	Necrotizing Ulcerative Periodontitis ..	56
Conductive Environment in the		Abscesses of the Periodontium	57
Periodontal Pocket	24	Gingival Abscess	57
Transmission	24	Periodontal Abscess	57
Peri-implantitis	27	Pericoronal Abscess	57
		Combined Periodontal–Endodontic	
3 Pathogenesis of Biofilm-Induced		Lesions	57
Periodontal Diseases	28	Developmental or Acquired Deformities	
Pathogenesis of Dental Biofilm-Induced		and Conditions	58
Gingivitis	28	Localized, Tooth-Related Factors that	
Initial Gingivitis	28	Modify or Promote Plaque-Induced	
Early Gingivitis	33	Gingival Diseases/Periodontitis	58
Established Gingivitis	34	Mucogingival Deformities and	
Peri-implant Mucositis	36	Conditions around Teeth and on	
Pathogenesis of Periodontitis	36	Edentulous Alveolar Ridges	58
Advanced Lesion	36	Occlusal Trauma	58
Formal Pathogenesis—Progression ...	40	Peri-implant Mucositis, Peri-implantitis ..	58

5 Epidemiology of Periodontal Diseases	59	7 Prevention of Periodontal Diseases	108
Epidemiological Terminology	59	Prevention-Oriented Dentistry	108
Periodontal Epidemiology	60	Karlstad Study	108
Examination Methods	60	Possibilities of Prevention	110
Assessment of Gingival Inflammation	60	Measures at the Population Level	112
Bacterial Deposits	61	Secondary and Tertiary Prevention	113
Combined Indices	61	Preferential Treatment of High-Risk Groups	113
Attachment Loss	62		
Case Definitions	62	8 General Medical Considerations	114
Epidemiology of Plaque-Induced Periodontal Diseases	65	Systemic Phase	114
Natural History	65	Infectious Patients	114
Periodontitis in the United States	67	Increased Risk of Infective Endocarditis	114
Europe	69	Further Indications for Antibiotic Prophylaxis	116
Global Trends	70	Bleeding Disorders, Anticoagulant Therapy	117
Early-Onset (Aggressive) Periodontitis	70	Atherosclerosis, Cardiovascular Diseases	117
Prevalence, Extent, and Severity of Gingival Recession	72	Associations between Periodontitis and Cardiovascular Diseases	117
Peri-implant Diseases	72	Pulmonary Diseases	119
6 Diagnosis of Periodontal Diseases	74	Diabetes Mellitus	120
Anamnesis	74	Obesity, Metabolic Syndrome	122
Medical History	74	Pregnancy	122
Dental History	74	Osteopenia, Osteoporosis	124
Clinical Examination	75	Smoking	124
Extraoral Examination	75	Alcohol Consumption	126
Intraoral Examination	75	Impact of Periodontal Therapy on General Health	127
Functional Examination	77		
Periodontal Examination	77	9 Emergency Treatment	128
Clinical Peri-implant Diagnosis	82	Periodontal Emergencies	128
Mucogingival Examination	82	Traumatic Injury	128
Oral Hygiene	84	Necrotizing Ulcerative Periodontal Diseases	128
Radiologic Examination	85	Herpetic Gingivostomatitis	129
Panoramic Radiographs	87	Periodontal Abscess	130
Full-Mouth Radiographic Survey	88	Combined Periodontal–Endodontic Lesions	130
Computed Tomography	90		
Intraoperative Diagnosis of Defect Morphology	91	10 Phase I—Cause-Related Treatment	133
Osseous Defects	91	Mechanical Plaque Control	133
Furcation Involvement	92	Toothbrushing Techniques	133
Advanced Diagnostic Techniques	92	Interdental Hygiene	136
Diagnostic Test Systems	93	Chemical Plaque Control	138
Microbiological Tests	96	Chlorhexidine	138
Markers of Specific and Nonspecific Host Response	102	Essential Oils	139
Saliva Diagnostics	104	Cetylpyridinium Chloride	141
Human Genetic Tests	104	Triclosan	141
Halitosis	105	Metal Salts	141
Diagnosis	105	Other Additives	141
General Diagnosis	105		
Tooth-Related Diagnosis	105		
Prognosis	105		
Treatment Planning	106		
Case Presentation	106		

Local Anesthesia	142	Exclusion of Epithelium	173
Adverse Effects of Local Anesthetics ..	142	Wound Stabilization	173
Regional Infiltration and Block		Bone and Bone Substitutes	175
Anesthesia	143	Growth and Differentiation Factors ..	176
Supragingival and Subgingival Scaling and		Root Surface Conditioning with	
Root Planing, Subgingival Curettage	144	Enamel Matrix Proteins	177
Definitions	144	Guided Tissue Regeneration	179
Aims	144	Membranes	179
Indication	144	Indications	180
Contraindication	144	Contraindications	181
Instruments	144	Procedure	181
Procedure	148	Postoperative Care	184
Critical Assessment	150	Critical Assessment	184
One-Stage, Full-Mouth Disinfection ..	151	Minimally Invasive Surgical Techniques ..	187
Photodynamic Therapy, Laser	154	Treatment of Furcation-Involved Teeth ..	188
Re-evaluation	155	Fundamental Morphological Terms ..	188
Sharpening of Instruments	155	Structures within the Furcation	189
Sickle Scalers	155	Conservative Furcation Therapy	189
Universal Curettes	156	Root Amputation and Hemisection ..	190
Area-Specific Curettes	156	Premolarization	193
		Tunnel Preparation	193
11 Phase II—Corrective Procedures	157	Regenerative Procedures	195
Periodontal Surgery	157	Possible Treatment Strategies	198
Gingivectomy	157	Mucogingival Surgery	200
Aims	157	Widening of the Zone of Keratinized	
Indications	157	Tissue with a Free Gingival Graft	200
Contraindications	158	Gingival Recessions	202
Instruments	158	Lateral Sliding Flap	202
Procedure	158	Coronally Advanced Flap after	
Postoperative Care	160	Vestibular Extension with Free	
Critical Assessment	160	Gingival Graft	203
Gingivoplasty	162	Coronally Advanced Flap with	
Definition	162	Connective Tissue Graft	204
Aim	162	Semilunar Coronally Repositioned	
Indications	162	Flap	205
Contraindications	162	Envelope Technique	205
Instruments	162	Guided Tissue Regeneration	207
Electrosurgery	162	Critical Assessment	208
Procedure	162	Frenectomy	210
Critical Assessment	163	Occlusal Therapy	211
Flap Operations	163	Occlusal Splint	211
Aims	163	Occlusal Adjustment	212
Indications	163	Semipermanent Splinting	212
Contraindications	163	Perio-Prosthetic Aspects	213
Instruments	163	Treatment of Peri-implant Infections	218
Various Techniques	164		
Procedure for the Modified Widman		12 Phase III—Supportive Periodontal	
Technique	166	Therapy	220
Postoperative Care	168	Risk Assessment, Risk Communication,	
Critical Assessment	169	Risk Management	220
Periodontal Wound Healing	172	Risk Assessment	220
Presence of Progenitor Cells	172	Local Risk Factors	220
Re-establishment of a Biocompatible		Dentition-Related Risk Factors	221
Root Surface	173	General Risk Factors	222

Communication	222	Omega-3 Polyunsaturated Fatty Acids	233
Risk Management	223	Anti-inflammatory Drugs	233
13 Medication and Supplements	225	Nonsteroidal Anti-inflammatory Drugs	233
Antibiotic and Antimycotic Therapy	225	Local Glucocorticoids	234
Systemically Administered Antibiotics	225	Nutritional Supplements, Probiotics	234
Topical Administration of Antimicrobial		Vitamins	234
Substances	231	Calcium	236
Local Antimycotic Therapy	232	Probiotics	236
Modulation of the Host Response	233	14 References	237
Inhibitors of Tissue Collagenase	233	Index	250
Modulation of Bone Metabolism	233
