

Videos					xiii
Preface					xv
Acknowledgments					xvi
Contributors					xvii
1 Surgical Anatomy					1
<i>Norbert Peter Tesch, Axel Gänsslen, Friedrich Anderhuber, Wolfgang Grechenig, and Stephan Grechenig</i>					
1.1 Bones and Ligaments	1	1.6.2	Clinical Significance of Acetabular Arterial Supply		9
1.2 Capsular Anatomy	3	1.6.3	Vascular Supply of the Femoral Head		9
1.3 Ligamentum Teres (Ligamentum Capitis Femoris)	4	1.6.4	Corona Mortis		12
1.4 Bursae around the Hip	4	1.7 Nerves			13
1.5 Relevant Muscles around the Hip	4	1.7.1	Superior Gluteal Nerve		13
1.5.1 Posterior Muscle Group	4	1.7.2	Inferior Gluteal Nerve		13
1.5.2 Relevant Anatomy of the Anterior Wall	6	1.7.3	Sciatic Nerve		13
1.6 Vascular Anatomy	7	1.7.4	Lateral Cutaneous Femoral Nerve		13
1.6.1 Hemipelvic Vascularity	7	1.7.5	Femoral Nerve		14
		1.7.6	Obturator Nerve		14
			References		14
2 Biomechanics					19
<i>Axel Gänsslen, Michael Nerlich, and Stephan Grechenig</i>					
2.1 Biomechanics of the Hip Joint	19	2.6 Biomechanics of Osteosynthesis			20
2.2 Loads Under Physiological Movements	19	2.7 Biomechanical Consequences to the Femoral Head			20
2.3 Biomechanics of Acetabular Fractures	19	2.8 Fracture Mechanism			21
2.3.1 Posterior Wall Fractures	19	2.8.1	Force Transmission via the Greater Trochanter		21
2.3.2 Posterior Column Fractures	19	2.8.2	Force Transmission via the Knee in 90 degree Flexion		21
2.3.3 Anterior Wall Fractures	19	2.8.3	Force Transmission via the Foot in Knee Extension		22
2.3.4 Anterior Column Fractures	19	2.8.4	Force Transmission via the Posterior Pelvis		22
2.3.5 Transverse Fractures	20	2.9 Summary			22
2.3.6 Both-Column Fractures	20				
2.3.7 Other Fracture Types	20				
2.4 Biomechanical Consequence of Anatomical Joint Reconstructions	20	References			22
2.5 Biomechanical Consequence of Articular Gaps and Step-Offs	20				
3 Radiological Diagnostics					24
<i>Axel Gänsslen and Stephan Grechenig</i>					
3.1 Introduction	24	3.2.1	Anteroposterior View of the Pelvis		24
3.2 Conventional Diagnostics	24	3.2.2	Judet Views		26

3.3	Computed Tomography	30	3.5	Postoperative Radiological Imaging	36
3.3.1	Column Separation	30	3.6	Summary	36
3.3.2	Mediolateral Separation	31		References	37
3.3.3	Wall Fractures	32			
3.3.4	Summary of the Typical Fracture Lines	32			
3.4	Magnetic Resonance Imaging	35			
4	Classification of Acetabulum Fractures				39
	<i>Axel Gänsslen, Stephan Grechenig, and Michael Nerlich</i>				
4.1	Introduction	39	4.6.2	Associated Anterior Column Plus Posterior Hemitransverse Fractures	44
4.2	Historical Development	39	4.6.3	Associated Transverse Posterior Wall Fractures ...	44
4.3	Letournel Classification	40	4.7	Systematic Fracture Analysis	44
4.4	AO/OTA Classification	41	4.7.1	Analysis of the Iliopectineal and the Ilioischial Line	45
4.5	Reliability of Acetabulum Fracture Classification ..	42	4.7.2	Combined Analysis of Iliopectineal/Ilioischial Lines	45
4.5.1	Results	42	4.7.3	Analysis of a Typical Posterior Wall Fragment	47
4.6	Proposed Optimization of the Classification	43	4.8	Summary	48
4.6.1	T-Type Fractures	44		References	49
5	Epidemiology				50
	<i>Paul Schmitz, Axel Gänsslen, and Florian Baumann</i>				
5.1	Introduction	50	5.7	Postoperative Infections	54
5.2	Demographics	50	5.8	Thromboembolism	54
5.3	Fracture Classification	50	5.9	Rare Complications	54
5.4	Quality of Reduction	51	5.10	Changes in the Treatment of Acetabular Fractures .	54
5.5	Nerve Injuries	52	5.11	Long-Term Outcomes of Acetabular Fractures	54
5.5.1	Primary Nerve Injuries	52	5.12	Quality of Life after Operatively Treated Acetabular Fractures	55
5.5.2	Iatrogenic Nerve Lesions	53	5.13	Risk Factors: Body Weight and Age	56
5.5.3	Recovery after Nerve Lesions	53		References	56
5.6	Vascular Complications	53			
6	Indications and Planning				58
	<i>Michael Müller, Daniel Popp, Axel Gänsslen, and Matej Cimrman</i>				
6.1	Introduction	58	6.4	Preoperative Planning	61
6.2	Indications for Conservative Treatment	58		References	63
6.3	Indications for Operative Treatment	61			
7	Approaches				65
	<i>Axel Gänsslen, Stephan Grechenig, Norbert Peter Tesch, Friedrich Anderhuber, Wolfgang Grechenig, Hans-Gunther Clement, and Jan Lindahl</i>				
7.1	Historical Development	65	7.2	Choice of Approach	66

7.2.1	Kocher-Langenbeck Approach	66	7.2.6	Combined Approaches	91
7.2.2	Iliioinguinal Approach	73	7.2.7	Summary: Approach Selection	91
7.2.3	Intrapelvic Approach	78			
7.2.4	Pararectus Approach	86		References	94
7.2.5	Extended Iliofemoral Approach	88			
8	Posterior Wall Fractures				97
	<i>Axel Gänsslen, Arne Berner, Michael Nerlich, and Mario Staresinic</i>				
8.1	Fracture Characteristics	97	8.8.2	Approach	106
8.2	Radiological Criteria	97	8.8.3	Reduction Techniques	106
8.3	Pathobiomechanics	98	8.8.4	Technique of Osteosynthesis	108
8.3.1	Injury Mechanism	98	8.9	Postsurgical Treatment	109
8.3.2	Fracture Mechanism	99	8.10	Results	110
8.4	Concomitant Injuries	100	8.10.1	Fracture Type	111
8.5	Hip Joint Stability	100	8.10.2	Concomitant Injuries	111
8.6	Biomechanics of Posterior Wall Fractures	103	8.10.3	Approach/Technique of Osteosynthesis	111
8.7	Treatment Indications	104	8.10.4	Quality of Reduction	111
8.7.1	Conservative Treatment	104	8.10.5	Complications	112
8.7.2	Operative Treatment	104	8.10.6	Long-Term Results	112
8.8	Techniques of Osteosynthesis	105	8.10.7	Prognostic Factors	113
8.8.1	Biomechanics of Osteosynthesis	105	8.10.8	Results	113
9	Posterior Column Fractures		8.11	Delayed Reconstructions	116
	<i>Axel Gänsslen, Stephan Grechenig, Michael Nerlich, and Bore Bakota</i>				
9.1	Fracture Characteristics	120	8.12	Summary	116
9.2	Radiological Criteria	121		References	117
9.3	Pathobiomechanics	122	9.7.3	Reduction Techniques	124
9.4	Hip Joint Stability	123	9.7.4	Technique of Osteosynthesis	125
9.5	Biomechanics of Posterior Column Fractures	123	9.8	Results	127
9.6	Treatment Indications	123	9.8.1	Results of Zinghi et al	127
9.6.1	Conservative Treatment	123	9.8.2	Results of First German Multicenter Pelvis Study Group	128
9.6.2	Operative Treatment	123	9.8.3	Results of Letournel	128
9.7	Techniques of Osteosynthesis	123	9.8.4	Results of Mears et al	128
9.7.1	Biomechanics of Osteosynthesis	123	9.8.5	Results of Matta	128
9.7.2	Approach	123	9.8.6	Results from Briffa et al	128
10	Associated Posterior Column and Posterior Wall Fractures		9.8.7	Results of Tannast et al	128
	<i>Veronika Matzi, Axel Gänsslen, and Michael Nerlich</i>				
10.1	Fracture Characteristics	134	9.9	Summary	128
10.2	Radiological Criteria	134		References	133
			10.3	Pathobiomechanics	134
			10.4	Hip Joint Stability	134

10.5	Biomechanics of Posterior Wall Fractures	134	10.8.1	Results of Zinghi et al	140
10.6	Treatment Indications	135	10.8.2	Results of First German Multicenter Pelvis Study Group	143
10.6.1	Conservative Treatment	135	10.8.3	Results of Letournel	143
10.6.2	Operative Treatment	135	10.8.4	Results of Mears	143
10.7	Techniques of Osteosynthesis	136	10.8.5	Results of Matta	143
10.7.1	Biomechanics of Osteosynthesis	136	10.8.6	Results from Yu et al	143
10.7.2	Approach	136	10.8.7	Results from Briffa	144
10.7.3	Reduction and Stabilization Techniques	136	10.8.8	Results of Tannast	144
10.8	Results	140	10.9	Summary	144
				References	146
11	Anterior Wall Fractures	147			
	<i>Gloria Hohenberger, Axel Gänsslen, Paul Schmitz, Daniel Popp, and Jan Lindahl</i>				
11.1	Fracture Characteristics	147	11.8.3	Reduction Techniques	149
11.2	Radiological–Anatomical Criteria	147	11.8.4	Technique of Osteosynthesis	151
11.3	Pathobiomechanics	148	11.9	Results	153
11.4	Hip Joint Stability	148	11.9.1	Results of the First German Multicenter Pelvis Study Group	153
11.5	Biomechanics of Anterior Wall Fractures	148	11.9.2	Results of Letournel	153
11.6	Treatment Indications	149	11.9.3	Results of Mears	154
11.7	Conservative Treatment	149	11.9.4	Results from Matta	154
11.7.1	Operative Treatment	149	11.9.5	Results of Lenarz	154
11.8	Techniques of Osteosynthesis	149	11.9.6	Results of Giannoudis	154
11.8.1	Biomechanics of Osteosynthesis	149	11.9.7	Results of Tannast	154
11.8.2	Approach	149	11.9.8	Further Results of the Literature	154
11.10	Summary	155			
				References	158
12	Anterior Column Fractures	159			
	<i>Axel Gänsslen, Paul Schmitz, and Michael Nerlich</i>				
12.1	Fracture Characteristics	159	12.7.4	Technique of Osteosynthesis	166
12.2	Radiological–Anatomical Criteria	159	12.8	Results	172
12.3	Pathobiomechanics	160	12.8.1	Results of the First German Multicenter Pelvis Study Group	172
12.4	Hip Joint Stability	160	12.8.2	Results of Letournel	172
12.5	Biomechanics of Anterior Column Fractures	160	12.8.3	Results of Mears	173
12.6	Treatment Indications	160	12.8.4	Results of Matta	173
12.6.1	Conservative Treatment	160	12.8.5	Results of Heeg et al	173
12.6.2	Operative Treatment	161	12.8.6	Results of Hessmann	173
12.7	Techniques of Osteosynthesis	161	12.8.7	Results of Giannoudis	174
12.7.1	Biomechanics of Osteosynthesis	161	12.8.8	Results of Briffa	174
12.7.2	Approach	162	12.8.9	Results of Tannast	174
12.7.3	Reduction Techniques	162	12.9	Summary	176
				References	178

13	Associated Anterior Column Plus Posterior Hemitransverse Fractures	179			
	<i>Michael Müller, Axel Gänsslen, and Michael Nerlich</i>				
13.1	Fracture Characteristics	179	13.7.2	Approach	181
13.2	Radiological–Anatomical Criteria	179	13.7.3	Reduction Techniques	182
13.3	Pathobiomechanics	179	13.8	Results	188
13.4	Hip Joint Stability	181	13.8.1	Results of the First German Multicenter Pelvis Study Group	188
13.5	Biomechanics of Anterior Column Fractures	181	13.8.2	Results of Letournel	188
13.6	Treatment Indications	181	13.8.3	Results of Mears	189
13.6.1	Conservative Treatment	181	13.8.4	Results of Matta	189
13.6.2	Operative Treatment	181	13.8.5	Results of Briffa	189
13.7	Techniques of Osteosynthesis	181	13.8.6	Results of Tannast	190
13.7.1	Biomechanics of Osteosynthesis	181	13.9	Summary	190
				References	193
14	Pure Transverse Fractures	194			
	<i>Axel Gänsslen, Michael Müller, and Michael Nerlich</i>				
14.1	Fracture Characteristics	194	14.8	Results	204
14.2	Radiological–Anatomical Criteria	194	14.8.1	Results of the First German Multicenter Pelvis Study Group	204
14.3	Pathobiomechanics	195	14.8.2	Results of Letournel	204
14.4	Hip Joint Stability	196	14.8.3	Results of Mears	206
14.5	Biomechanics of Pure Transverse Fractures	197	14.8.4	Results of Matta	206
14.6	Treatment Indications	197	14.8.5	Results of Zhangi et al	206
14.6.1	Conservative Treatment	197	14.8.6	Results from Leunig	206
14.6.2	Operative Treatment	197	14.8.7	Results of Oh	206
14.7	Techniques of Osteosynthesis	197	14.8.8	Results of Li	209
14.7.1	Biomechanics of Osteosynthesis	197	14.8.9	Results of Negrin	209
14.7.2	Approach	198	14.8.10	Results of Briffa	209
14.7.3	Reduction and Stabilization Concept	198	14.8.11	Results of Tannast	209
			14.8.12	Results of Sen	209
15	Transverse plus Posterior Wall Fractures	213	14.9	Summary	209
