

Contents

- A note to students and instructors** 9
- Lesson One: The Preliminaries** 11
 - What is linguistics? 11
 - Prescriptivism and descriptivism 11
 - Parole vs. langue and performance vs. competence 11
 - The four core areas of linguistics 11
 - Other branches of linguistics 12
 - What are phonetics and phonology? 13
 - Phonetics 13
 - Phonology 15
 - Whose pronunciation are we describing? 16
 - The notion of a standard variety 16
 - Received Pronunciation: An accent 16
 - How do we write down spoken language? 17
 - Traditional spelling 17
 - Phonetic transcription 17
 - The International Phonetic Alphabet 18
- Lesson Two: The Description of Speech Sounds** 19
 - Mainly phonetic features 19
 - Loudness 19
 - Pitch 19
 - Tone of voice 20
 - Duration and length 20
 - Air-stream mechanism 21
 - Voicedness and voicelessness: The state of the glottis 22
 - Phonologically relevant features: Distinctive features 23
 - Intensity of articulation I: Lenis and fortis 23
 - Place of articulation I 23
 - Manner of articulation I 24
 - Exercises 25
- Lesson Three: Consonants** 29
 - The phoneme 29
 - The English consonant phonemes 30
 - Place of articulation II 30
 - Manner of articulation II 32

The consonant table	35
The problem cases	35
Of semi-vowels, contoids, and vocoids	35
... and more terminological confusion	36
Exercises	38
Lesson Four: Vowels	41
The description of vowels	41
Manner of articulation III	42
The vowel chart I	43
The cardinal vowels	43
The English vowel phonemes	45
Long vowels	45
Short vowels	46
The vowel chart II	47
Intensity of articulation II: Lax and tense	47
Diphthongs and triphthongs	48
The shortening of vowels, nasals, and the lateral	50
Exercises	51
Lesson Five: Allophonic Variation	53
The allo-/-eme relationship	53
Allophone vs. phoneme	53
The two allophone criteria	54
Allophones in free variation	55
Allophones in complementary distribution	55
Devoicing	56
Fronting and retraction	57
Two (or three) types of phonetic transcription	58
Phonetic transcription proper	59
Phonemic transcription	59
Broad phonetic transcription: An intermediate type	60
Unstressed <i>i</i> - and <i>u</i> -sounds	60
A brief excursion into morphophonology	61
The regular plural, the possessive case, and the third-person singular morphemes	62
The regular past tense and past participle morphemes	62
The pronunciation of the letter sequence <ng>	63
Exercises	64

Lesson Six: Connected Speech	67
Linking	67
Liaison	67
Linking <i>r</i> and intrusive <i>r</i> : Two cases of liaison	68
Non-rhotic and rhotic accents	69
Juncture	70
Exercises	73
Lesson Seven: The Syllable	75
A phonetic approach to the syllable	75
Phonotactics	77
A phonological approach to the syllable	77
Syllabic consonants	78
Stressed and unstressed syllables vs. strong and weak syllables	81
Stress patterns in polysyllabic words	83
Exercises	86
Lesson Eight: Strong and Weak Forms	89
What are strong and weak forms?	89
Grammatical words	89
The distribution of strong and weak forms	90
The forms	91
Exercises	95
Lesson Nine: Connected Speech, Contd.	97
Rhythm	97
What is rhythm?	97
Two types of rhythm	97
Assimilation	99
What is assimilation?	99
Various types of assimilation	100
The opposite of assimilation: Dissimilation	104
Elision	104
What is elision?	104
Various types of elision	105
The opposite of elision: Intrusion	107
Exercises	109

Lesson Ten: Allophonic Variation, Contd.	111
Aspiration	111
Secondary articulation	113
Main types of secondary articulation	114
Exercises	117
Lesson Eleven: More Allophones	119
<i>t</i> -sounds	119
<i>r</i> -sounds	122
<i>l</i> -sounds	125
Exercises	128
Lesson Twelve: Intonation	129
What is intonation?	129
Pitch	130
The tone unit	130
Intonation patterns	131
Tone unit structure	132
Functions of intonation	133
Exercises	135
Appendix I: Solutions to the exercises	137
Appendix II: Glossary of linguistic terms	161
