

Contents

Contributing authors — VII

Engui Zhao, Hui Li, Xinggui Gu, Ben Zhong Tang

Chapter 1

Introduction — 1

Jing-Jing Hu, Hao Wang, Fan Xia, Xiaoding Lou

Chapter 2

Modular nucleic acid-functionalized AIEgen probes for biosensing applications — 11

Jiao Liu, Xiao Zhang, Fang-ling Zhang, Yi-ting Wang,
Yuan-yuan Gao, Tong-yi Sun, Li-Li Li

Chapter 3

Peptide–AIEgen conjugates for biomedical diagnosis and bioimaging — 31

Marie-Claire Giel, Yuning Hong

Chapter 4

The application of click chemistry in the design of aggregation-induced emission luminogens for activity-based sensing — 53

Anh Tran Tam Pham, Youhong Tang

Chapter 5

Point-of-care in vitro diagnostics devices based on aggregation-induced emission biosensors: current situation and future prospective — 83

Na Zhao

Chapter 6

AIEgens for organelles imaging and biological process monitoring — 111

Yahui Zhang, Zhengxu Cai, Yuping Dong

Chapter 7

AIE-active 1,3-butadiene-based biosensors and bioimaging — 155

Minglun Liu, Yuncong Chen, Zijian Guo

Chapter 8

AIEgens for intracellular microenvironment analysis — 189

Jiaxin Wang, Chunlei Zhu

Chapter 9

Engineering the bioprobes with AIE properties to study tumor hypoxia — 217

Miaomiao Kang, Panpan Sun, Dong Wang, Ben Zhong Tang

Chapter 10

AIE probes for bacterial detection and antibacterial applications — 233

Jiangman Sun, Hui Li, Xinggui Gu, Ben Zhong Tang

Chapter 11

AIE-based systems for photoactivatable imaging, delivery, and therapy — 273

Index — 311
