Advances in project risk management — VII

Part I: Fundamentals

Antti-Pekka Tuovinen, François Christophe, Petri Kettunen, Tommi Mikkonen and Tomi Männistö

- 1 Managing risks and opportunities in cyber-physical systems with software architecture assessments — 3**

Mary Sánchez-Gordón and Ricardo Colomo-Palacios

- 2 Managing software development risk: Risks of introducing the role of agile coach – a multivocal literature review — 25**

Manuel Mora, Fen Wang, Gloria Phillips-Wren and Jorge Marx Gómez

- 3 The role of DMSS analytics tools in software project risk management — 49**

Torgeir Dingsøy and Yvan Petit

- 4 Managing layers of risk: Uncertainty in large development programs combining agile software development and traditional project management — 75**

Mirko Perkusich, Ademar Sousa Neto, Joao Nunes, Kyller Gorgônio, Hyggo Almeida and Angelo Perkusich

- 5 A knowledge-based risk management approach for Scrum software development projects — 97**

Holmes E. Miller and Kurt J. Engemann

- 6 Managing bias risk in algorithms and decision models — 117**

Part II: Applications

Subhajit Datta, Amrita Bhattacharjee and Subhashis Majumder

- 7 Interactional motifs: Leveraging risks in large and distributed software development teams — 137**

Christof Ebert

8 Risk-based security engineering — 161

Kristina Kozakevitch, John Collins, C. Christopher Lee
and Heechang Shin

9 Location-based access control enforcement — 183

Sungjin Yoo and He Li

**10 Information security management in the cloud computing
environment — 197**

Béatrix Barafort, Antonia Mas and Antoni-Lluís Mesquida

11 A process framework for integrated risk management in IT — 215

John Malara

12 Embracing risk to gain competitive advantage — 245
