List of Symbols	IX
Abstract	XV
Kurzfassung	XVII
1 Introduction	1
2 State-of-the-art	5
2.1 Optical quantities	5
2.2 Human vision	7
2.3 Optical terminologies	11
2.4 Optical aberrations	16
2.5 Headlamp systems	20
3 Techniques for high-resolution headlamps	25
3.1 Laser diode as light source	25
3.1.1 Laser diode basics	25
3.1.2 Laser diode properties	26
3.1.3 Laser application problems	30
3.2 White light generation	31
3.3 Headlamp functionalities	32
3.3.1 AFS and ADB systems	32
3.3.2 High resolution	35
3.3.3 Color temperature steerable white light	37
3.3.4 Chromatic on-road projection	39
3.4 Technologies for high-resolution headlamps	40
3.4.1 LED-Array/Micropixel LED	42

3.4.2	Scanning technologies	45
3.4.3	DMD	48
3.4.4	LCD	50
3.4.5	LCoS	52
4	Optical requirements and scientific challenges for headlamp systems	55
4.1	Overall optical requirements for headlamp systems	55
4.2	Scientific challenges discussion	59
5	Concept development of laser LCoS headlamp systems	67
5.1	LCoS headlamp Concept	67
5.2	Concept further development	71
5.2.1	System concept of the headlamp	71
5.2.2	Headlamp light distribution regarding the optical system	73
5.3	Evolution of illumination strategies	74
5.3.1	Primary optics pre-shaping	74
5.3.2	Design schemes based on the LCoS section	75
5.3.3	Secondary optics projection	77
5.3.4	Illumination strategies conclusion	78
5.4	Discussion on the design of optical systems	82
5.4.1	Primary optics	82
5.4.2	Secondary optics discussion	89
5.5	Design validation	90
5.5.1	MLA as primary optics	91
5.5.2	Optical system design and validation	95
6	Prototype realization and validation	109
6.1	Requirement review	109
6.2	Prototype realization	111
6.2.1	Laser emission module	111
6.2.2	Complete prototype	114
6.2.3	Emission of white light	115
6.3	Prototype validation	117
6.4	Headlamp optimization potentialities	121

7 Summary and outlook	131
7.1 Summary	131
7.2 Critical appraisal	133
7.3 Outlook	134
Bibliography	137
Own publications and patents	149
Appendix	153
A Simulation results	153
B Supervised student projects	157
