

Table of contents

1 Introduction and Outline..... 1

2 3D-Modeling of Bridge- and Engineering Structures with NX: Introductory Examples 3

2.1 NX-terms..... 3

2.2 Introductory examples: Top-down modeling for bridge and engineering structures 8

Example 1: Bridge pier with base plate 8

Example 2: Bridge deck orientated on a spline..... 18

Example 3: Bridge deck along several guide curves 35

Example 4: Connect a sheet pile wall and a base to the construction with constraining conditions 49

Example 5: Drawing derivation of a bridge deck 58

2.3 Some important general features and notes about NX..... 69

3 Project example: Two-span bridge 71

3.0 Overview and objectives..... 71

3.1 Integrating the digital terrain model 74

3.2 Integrating existing infrastructure 77

3.3 Integrating 2.5-D Routing into the 3D Environment..... 81

3.4 Background knowledge: Create components object-oriented as a 3D model 88

3.5 Create site setup as simplified envelope geometry..... 91

3.6 3D design of the bridge superstructure along the alignment..... 92

3.7 3D design of substructures associative to superstructure and terrain..... 97

3.8 Background Knowledge: Level of Detail/Development, Level of Information..... 100

3.9 Integrate information into the 3D design..... 104

3.10 Reuse Parts, Part Library and Part Family 115

3.11 Collision checks and geometric testing on the model 120

3.12 Associative measurements and storage of important bridge parameters in the 3D model..... 122

3.13 Drawing derivation 125

3.14 Construction sequence as arrangements (static) and in sequences (dynamic)..... 128

3.15 Data exchange in neutral format with Industry Foundation classes IFC..... 131

4 BIM2FEM - Design Embedded Simulation in Concrete Bridge Construction 138

4.0 Overview and objectives..... 138

4.1 Construction of an isogeometric associative computational model..... 142

4.2 Mesh generation with volume elements 151

4.3 3D system, restraints and load input 154

4.4 Stress-based and internal forces-based evaluation and design..... 159

4.5 Example 2: Skew plate with post-tensioning 162

5 List of sources 167

6 List of Figures 169

7 Subject index 174
