Foreword, <i>Timothy P. Whalen</i>	ix
Foreword to the French Edition, <i>Françoise Flieder</i>	x
Acknowledgments	xiii
Introduction	I

Chapter 1 The Lumière Family Enterprise

Antoine Lumière: The Launch of a Photographic Enterprise	4
Louis and Auguste Lumière: From Craft to Industry	10
HISTORICAL TESTIMONY: MANUFACTURE OF PHOTOGRAPHIC PLATES IN THE LUMIÈRE FACTORY	16
A Slowdown in Growth	24
Negotiations with the Eastman Kodak Company	31
A Trans-European Industry	34
HISTORICAL TESTIMONY: A CHEMIST IN THE EMPLOY OF LOUIS LUMIÈRE	36
Archives of the Planet Portfolio I: Auguste Léon, Paris	42

Chapter 2 Solutions to the Problem of Color in Photography

Color Photography in the Nineteenth Century	52
Direct Color Photographs	54
Pioneers	54
Gabriel Lippmann's Interference Process of Color Photography	56
Making Lippmann Photography Work	57
Indirect Color Photographs	59
The First Attempts	59
The Three-Color Photographs of Charles Cros and Louis Ducos du Hauron	64
The Lumière Brothers' First Efforts to Commercialize a Color Photographic Process	66
1891–1894: The Lippmann Process	66
1894–1900: The Three-Color Transparency Process	68
1900–1907: The Invention of the Autochrome	70
Perfecting the Process	70
Competition in the Market of Additive Screen Processes	72

Color Screen Plates: Technical Aspects	76
Scale of the Screen	81
Spectral Parameters	84
The Photosensitive Emulsion	85
Industrial Protection of the Autochrome	88
Patents for Color Screen Plates	88
Patents on the Autochrome	94
Archives of the Planet Portfolio II: Marguerite Mespoulet, Ireland	100

Chapter 3 Technical Challenges in the Manufacture of Autochrome Plates

First Challenge: Choosing a Material for the Microparticles.	114
Why Potato Starch?	114
Granule Size	117
HISTORICAL TESTIMONY: PRODUCING STARCH MICROGRANULES AT JURÉ	122
Sorting the Starch Granules to Isolate the 12- to 16-Micron Particles.	134
Second Challenge: Dyeing the Starch Granules.	138
The Autochrome Dyes.	138
Mixing the Three Lots of Colored Starch Granules	140
Adhering the Starch Granules to the Plate	142
Third Challenge: Compressing the Screen Elements	143
The Autochrome Press.	143
Fourth Challenge: The Varnish and Photosensitive Layers	150
Protection for the Screen Layer	150
The Photosensitive Layer	151
HISTORICAL TESTIMONY: A SOCIAL CHRONICLE OF AUTOCHROME PLATE MANUFACTURE	154
The Manufacture of Autochrome Plates, 1907–1930.	162
Selection of Starch Granules in the Correct Size Range	163
Dyeing the Starch Granules	163
Mixing the Dyed Granules	164
Applying the First Varnish	164
Dusting-on of the Starch Granules	165
Compressing the Screen	165
Applying the Second Varnish	166
Applying the Emulsion	166
Exposing the Plate	168
Hypersensitization Applied to Autochrome Plates	169
Processing	173
Applying the Final Varnish and Mounting	178
HISTORICAL TESTIMONY: AUTOCHROME PROCESSING AWAY FROM HOME	180
Archives of the Planet Portfolio III: Paul Castelnau, Arabia	184

Chapter 4 The Preservation of Autochromes

The Stability of Autochromes	194
The Conservation of Autochromes	198
Environment	198
Physical Protection	199
Display and Projection	200
The Conservation Treatment of Autochromes	201
A Guide to Autochrome Plate Characteristics: Condition, Inherent Flaws, Deterioration	202
Reprography of Autochromes	223
Viewing Autochrome Images	223
Reproducing the Rendition of Autochrome Images Using Modern Materials	225
Digitization of Autochromes at the Musée départemental Albert-Kahn	226
Experiments in Industrial Archaeology: Making Autochromes a Century Later	231
 Archives of the Planet Portfolio IV: Stéphane Passet, Mongolia	 238

Chapter 5 The Rise and Fall of the Autochrome

Color for Everyone	248
An Inevitable Decline	253
World War II: A Decisive Turning Point	258
Homage to Louis and Auguste Lumière	266
 Archives of the Planet Portfolio V: Léon Busy, Indochina	 268

Appendix I: The Lumière Notebooks

Louis Lumière's Notes from the Early Years of Autochrome Plate Manufacture	280
Workshop Notebook Describing Autochrome Plate Manufacture, ca. 1910	288
Workshop Notebook Describing Autochrome Plate Manufacture, 1929	321

Appendix II: Patent Documents

French Patent No. 245,948. 22 March 1895. A Photographic Process Using Bichromated Colloids That Gives, without Transfer, Continuous Tone Images, and Its Application to Color Photography	338
French Patent No. 305,784. 27 November 1900. A New Type of Color	345
French Patent No. 339,223. 17 December 1903. Color Photography Process	350
First Addition, No. 3,891. 13 January 1904	353
Second Addition, No. 4,290. 9 November 1904	354
Third Addition, No. 7,230. 5 April 1906	357
U.S. Patent No. 822,532. 5 June 1906. Photographic Plate for Color Photography	360

Notes	363
Bibliography	367
Illustration Credits	380
Index	381
