

Contents

Foreword — V

Xinfeng Wu, Der-Chen Chang, and Yongsheng Han

Hardy spaces associated to the Kohn Laplacian on a family of model domains in $\mathbb{C}^{n+1}$ — 1

Julian Haddad and Jie Xiao

Affine mixed Rayleigh quotients — 29

Liguang Liu and Suqing Wu

Riesz potentials and Hardy–Morrey spaces — 49

Laurent Saloff-Coste

A conjecture regarding compact Lie groups and its consequences — 79

Sheng-Ya Feng and Der-Chen Chang

The singular Fredholm integral operators and related integral equations of Chandrasekhar type — 89

Lijia Zhang and Wengu Chen

Extended multichannel weighted Schatten p -norm minimization for color image denoising — 105

Guoliang Li and Junfeng Li

The boundedness of a bilinear oscillatory integral — 123

Sergey G. Bobkov and Cyril Roberto

On sharp Sobolev-type inequalities for multidimensional Cauchy measures — 135

Guixiang Hong

Banach lattice-valued q -variation and convexity — 153

Yanping Chen and Xueting Han

Weighted boundedness of Marcinkiewicz integral operators and related singular integral operators — 167

Alina Stancu

A spectral comparison note — 195

VIII — Contents

Yuhua Sun and Fanheng Xu

On existence and nonexistence of nonnegative solutions to heat equation on Riemannian manifolds — 207

Dorina Mitrea, Irina Mitrea, and Marius Mitrea

The Neumann problem for the Laplacian in half-spaces — 219

Chunyan Liu and Ning Zhang

An inequality on the mass of image of rectifiable chain under Lipschitz map — 253

Eduard Navas, Ebner Pineda, and Wilfredo O. Urbina

Boundedness of general alternative Gaussian singular integrals on Gaussian variable Lebesgue spaces — 261

Yang Li and Ewelina Zatorska

Remarks on weak–strong uniqueness for two-fluid model — 281

Esther Bou Dagher, Yifu Wang, and Bogusław Zegarliński

Coercive inequalities on Carnot groups and applications — 291

Shihshu Walter Wei

On exponential Yang–Mills fields and p -Yang–Mills fields — 317

Index — 359
