

Table of contents

Acknowledgments	11
Introduction	13
Chapter 1 Two views on language and perception	23
1.1 Language and individual representationalism	23
1.1.1 The first consequence of individual representationalism	24
1.1.2 The second consequence of individual representationalism	27
1.1.3 Perception, cognition and grammar	28
1.1.4 Representing the world in language and perception	33
1.2 Language and the ‘propositional’ view of perception	40
1.3 Where we stand now: A look behind and a (puzzling) look forward	49
Chapter 2 A philosophical interlude on perceptual content: Percepts, concepts, representations, and propositions	51
2.1 On the relation between perceptual experience and conceptual knowledge	51
2.2 Cognitive penetration	59
2.3 Modularity	64
2.4 Perception, concepts, and categorization	67
2.5 Perception, reference, and language	69
2.6 Only a modest role for content? No, that’s individualism!	72
2.7 Some conclusions on perceptual content	81

Chapter 3 The labyrinths of reference: Mirror effects in language and vision	85
3.1 Introduction	85
3.2 Reference in language and perception	87
3.3 The conundrums around first-person reference	95
3.4 Direct reference in the visual system	103
 Chapter 4 What does grammar tell us about seeing?	 113
4.1 Syntax and ways of seeing	113
4.2 Knowing facts (by seeing) and seeing events	118
4.3 Events and experiences	123
4.4 On experiencing, perceiving, and knowing	128
Appendix A. A note on language and non-conceptual seeing	135
Appendix B. Simple seeing, perceptual content, and transparency	137
 Chapter 5 Does syntax tell us what propositions are?	 143
5.1 Silent nouns and relative clauses	143
5.2 Facts and events as silent nouns	147
5.3 Harmony and some of its effects	154
 Epilogue Language as a looking-glass and grammar as a rabbit-hole	 157
 References	 165
 Index of Names	 175
