## Practical Part

| <b>FVS: FORM-BASED</b>  |  |
|---|--|
| Construction of Components and Assets ..... 56                    | How to Develop Your Components and Assets ..... 57               |
| Using the Assets ..... 58   | How to Use Your Assets? ..... 59                                 |
| Regular Application on Different Formats ..... 60                 | How to Apply the Assets to Different Formats? ..... 61           |
| Irregular Application on Different Formats ..... 62               |  |
| Same Principle, Different Aesthetics ..... 63                     |  |
| Identification through Composition, Color and / or Fonts ..... 64 | Working without Assets ..... 65                                  |
| The Colors of This Book ..... 66                                  | What about Color? ..... 67                                       |
| Identification through Rules and Tools ..... 68                   | Working without Grids ..... 69                                   |
| The Advantages of a Grid ..... 70                                 | Which Advantages Does Using a Grid Have? ..... 71                |
| Create Grids with Geometric Shapes ..... 72                       | How to Create a Grid with Different Geometric Forms? ..... 73    |
| Using Grids ..... 74  | How to Use Grids? ..... 75                                       |
| Font Construction ..... 76  | What Kind of Grids Do I Need to Design Modular Letters? ..... 77 |
| Font Construction ..... 78  |  |
| Font Construction with Custom Components ..... 79                 |  |
| Font Construction ..... 80  |  |
| Font Construction with Custom Components ..... 81                 |  |
| Form-Based FVS ..... 84   | Form-Based Flexible Visual Systems ..... 85                      |
| Circle 87   Right Triangle 105   Acute Triangle 123               |  |
| Square 141   Pentagon 159   Hexagon (Right Triangle) 177          | Object-Based Flexible Visual Systems ..... 215                   |
| Hexagon (Acute Triangle) 195                                      | Interaction-Based Flexible Visual Systems ..... 221              |
| <b>FVS: TRANSFORMATION-BASED</b>                                  |  |
| Transformation-Based FVS ..... 232                                | Transformation-Based Flexible Visual Systems ..... 233           |
| Circle: Gradation 236, Rotation 242, Repetition 248, Mirror 253   | 3D-Transformation-Based Flexible Visual Systems ..... 306        |
| Triangle: Gradation 260, Skew 266, Shift 272, Mirror 278          | Transformation: Objects ..... 310                                |
| Square: Gradation 284, Skew 290, Shift 296, Mirror 302            | Transformation: Reproduction and Recording ..... 311             |

## Epilog

|                                    |                        |
