

Contents

Part I Basics of Business Logistics

1	Logistics Conception	3
1.1	Logistics Systems in the System of Goods Transformation	3
1.2	Logistics Processes and Types of Goods Transformation	7
1.3	Origin and Definition of Logistics	10
1.4	Focus Levels and Scope of Logistics Systems	12
	References	18
2	Characterization of the Logistics Conception	21
2.1	Value- and Utility-Oriented Thinking	21
2.2	Systems Thinking	25
2.3	Overall or Total Cost Thinking	29
2.4	Service Thinking	32
2.5	Logistical Efficiency Thinking	38
2.6	Consequences of Logistics Thinking	40
	References	44
3	Importance of Logistics	47
3.1	Business Development Trends	47
3.2	Cost Pressure	50
3.3	Market Pressure	53
3.4	Position in the Company	57
	References	64

Part II Activity-Specific Subsystems of Logistics

4	Order Processing	69
4.1	Definition and Functions of Order Processing	69
4.2	Tasks of Order Processing	73
4.3	Types of Order Processing	76

4.4	Linking Logistical Information Systems	83
	References	86
5	Inventory Management (Stockkeeping)	89
5.1	Definition and Functions of Inventory Management	89
5.2	Tasks of Inventory Management	91
5.3	Stock Replenishment and Safety Stock	96
5.4	Selective Storage	106
	References	111
6	Warehouse	113
6.1	Definition and Functions of the Warehouse	113
6.2	Warehouse Tasks	117
6.3	Storage Bin Assignment	120
6.4	Technology in the Warehouse	123
	References	132
7	Packaging	135
7.1	Definition and Functions of Packaging	135
7.2	Packaging Tasks	138
7.3	Logistical Units	141
7.4	Modular Packaging	146
	References	149
8	Transport	151
8.1	Definition and Functions of the Transport	151
8.2	Transport Tasks	152
8.3	Means of Transport	155
8.4	Intermodal Transport	160
	References	165
 Part III Phase-Specific Subsystems of Logistics		
9	Procurement Logistics	169
9.1	Definition and Conception of Procurement Logistics	169
9.2	Procurement Logistics and Instruments of Procurement Policy	173
	References	178
10	Production Logistics	181
10.1	Definition and Conception of Production Logistics	181
10.2	Production Logistics for Different Types of Production	184
10.3	Activity-Specific Subsystems of Production Logistics	191
	References	198

11	Distribution Logistics	199
11.1	Definition and Conception of Distribution Logistics	199
11.2	Distribution Logistics and Marketing Policy Instruments	203
	References	210
12	Spare Parts Logistics	211
12.1	Definition and Conception of Spare Parts Logistics	211
12.2	Activity-Specific Subsystems of Spare Parts Logistics	215
12.3	Importance of Spare Parts Supply as a Competitive Instrument	217
	References	218
13	Disposal Logistics	221
13.1	Definition and Conception of Disposal Logistics	221
13.2	Activity-Specific Subsystems of Disposal Logistics	224
13.3	Technical Design of Disposal Logistics Processes	227
	References	230
 Part IV Institutional Aspects of Logistics Systems		
14	Intra-organizational Logistics Systems	233
14.1	Fragmentation of Logistics Tasks Versus Organizational Unit Logistics	233
14.2	Integration of Logistics Tasks into Different Organizational Structures	237
14.3	Structure of an Organizational Unit Logistics	247
14.4	Logistics in a Multidimensional Organizational Structure	248
	References	254
15	Service Functions of Logistics Companies	257
15.1	Sales Supporters of Industrial and Commercial Companies	257
15.2	Kinds of Services	261
15.3	Special Features of the Service Provision	264
	References	265
16	Institutions of the Freight Transport Industry	267
16.1	Transport Companies	268
16.2	Warehousing, Handling and Packaging Companies	272
16.3	Forwarders and Intercessors	273
16.4	Logistics Centers	275
16.5	Legal and Organizational Forms	278
	References	281

17	Inter-organizational Logistics Systems	285
17.1	Logistical Interfaces and Inter-organizational Relationships	285
17.2	Cooperation at Different Levels	290
17.3	Willingness to Cooperate and Extent of Cooperation	294
17.4	Effects of Cooperation in the Logistics Channel	302
	References	306
 Part V Macroeconomic and International Aspects of Logistics Systems		
18	Requirements for the Macrologistical System of Goods Distribution	311
18.1	Requirements Due to the Division of Labor	311
18.2	Requirements Due to the Type of Goods	312
18.3	Requirements Based on Macroeconomic Objectives	315
	References	319
19	Macrologistical Infrastructure	321
19.1	Infrastructure of the Flow of Goods	321
19.2	Infrastructure of the Flow of Information	330
19.3	Transport Policy	338
	References	341
20	International Logistics Systems	345
20.1	Special Features of International Logistics	345
20.2	Design of International Logistics Systems	351
20.3	Financial Aspects of International Logistics	364
	References	369
	Index	371
