Numbers refer to Plates

I. INTRODUCTION

	Plate
Origin of Tissues	1
Differentiation. Closed and Wide-Meshed Cell Unions . . .	2
Four Tissue Groups	3
Growth, Regeneration, Hyperplasia, Hypertrophy, Atrophy, Involution, Degeneration, and Necrosis	4
Metaplasia	5
Transplantation, Implantation, and Explantation	6

II. EPITHELIAL TISSUE

Surface Epithelia

Classification of Surface Epithelia	7
Localization of Various Surface Epithelia	8
Simple Squamous Epithelium	9
Simple Cuboidal Epithelium	11
Simple Columnar Epithelium	14
Pseudostratified Columnar Epithelium	17
Transitional Epithelium	19
Stratified Columnar Epithelium	21
Nonkeratinized Stratified Squamous Epithelium	22
Keratinized Stratified Squamous Epithelium (Epidermis)	23

Secretory Surface Epithelia

Amniotic Epithelium	25
Vascularized Secretory Epithelium	26
Atypical Epithelia	27
Enamel Organ	28
Thymus	29
Changes in Form of Epithelial Cells	30
Functions of Surface Epithelia	31

Glandular Epithelia

Exocrine Glands

Development of Exocrine and Endocrine Glands . . .	32
Classification of Exocrine Glands	33
Form of Exocrine Glands	34
Unicellular Glands	35
Endoepithelial Multicellular Gland	36
Tubular Gland	37

XIII

	Plate
Tubuloacinar Gland	38
Tubuloalveolar Gland	39
Apocrine Alveolar Gland	40
Holocrine Alveolar Gland	41
Scheme of a Compound Tubuloacinar Gland	42
Endocrine Glands	43
Regeneration and Transplantation of Epithelial Tissue .	47

III. CONNECTIVE AND SUPPORTING TISSUES

Origin of Connecting and Supporting Tissues	48
Classification of Connective and Supporting Tissues	49
Mesenchyme	50
Gelatinous or Mucous Connective Tissue	52
Reticular Connective Tissue	53
White Adipose Tissue	56
White Adipose Tissue Cell	58
Brown Adipose Tissue	59
Brown Adipose Tissue Cell	61
Loose Connective Tissue	62
Fixed Cells: Fibroblast and Fibrocyte	64
Formed and Amorphous Components of the Inter-cellular Substance	65
Wandering Cells	
Histiocyte	66
Reticulohistiocytic or Reticuloendothelial System . .	68
Mast Cell	69
Lymphocytes	70
Monocyte	71
Plasma Cell	72
Eosinophilic Granulocyte	73
Special Forms	
Pigment Connective Tissue	74
Pigment Cell	75
"Cellular" Connective Tissue	76
Retiform Connective Tissue	77
Irregular Dense Connective Tissue	78
Regular Dense Connective Tissue	
Tendon	79
Aponeurosis	81
Elastic Connective Tissue	82
Cartilaginous Tissue	
Hyaline Cartilage	83
Elastic Cartilage	86
Chondrocyte	88
Fibrous Cartilage	89
Notochordal Tissue	90

Bony Tissue	
Direct Bone Formation	91
Osteoblasts	94
Indirect Bone Formation	95
Secondary Bone Formation	105
Structure of Bone	106
Osteon	107
Osteocyte	110
Osteoclast	111
Regeneration of Bone	112
Dentin and Cementum	113
Possibilities of Transplanting Connective and Supporting Tissues	114
Graft Rejection. Role of Free Connective Tissue Cells	115

IV. MUSCULAR TISSUE

Three Types of Muscular Tissue	116
Occurrence of Smooth Musculature	117
Smooth Muscle Cells	118
Hypothetical Model of Contraction Mechanism of Smooth Muscle Cells	122
Myoepithelial Cells	123
Skeletal Musculature	
Histogenesis of Skeletal Musculature	124
Structure of a Muscle	125
Structure of a Muscle Fascicle	126
White Muscle Fiber and Satellite Cell	127
Red Muscle Fiber	128
Structure of a Muscle Fiber	129
Scheme of a Relaxed and a Contracted Myofibril	130
Interaction Between Actin and Myosin Myofilaments	131
Myotendinal Junction	132
Regeneration of Skeletal Muscle Fibers	133
Cardiac Musculature	
Light-Microscopic Appearance	134
Cardiac Muscle Fibers	135
Electron-Microscopic Appearance	136
Cardiac Muscle Cell	137
Vascularization, Necrosis, Transplantation	139
Impulse-Conducting System	140
Purkinje Fibers	141
Cell of the Impulse-Conducting System	142

V. NERVOUS TISSUE

Central Nervous System	
Histogenesis of Nervous Tissue	143

Cells Originating from Neural Tube and Neural Crest	144
Central and Peripheral Nervous System	145
Relationship Between Neurons and Glia Cells in Central and Peripheral Nervous System	146
Glia of Central Nervous System	
Ependymal Cells	147
Astrocytes	148
Membrana Limitans Gliae Superficialis and Perivascularis	153
Blood-Brain Barrier	154
Oligodendrocytes	155
Microglia	156
Nerve Cells	
Form of Nerve Cells	157
Types of Nerve Cell	158
Arrangement of Nerve Cells	159
Nerve Cells and Neuropil	160
Neurosecretory Cells	162
Mode of Action of Polypeptide Hormones	163
Nerve Fibers and Schwann's Cells	164
Node of Ranvier	165
Schmidt-Lanterman Incisure	166
Regeneration of Nerve Fibers	167
Synapses	168
Components of Peripheral Nervous System	170
Spinal Ganglion	171
Pseudounipolar Nerve Cell	172
Bipolar Nerve Cell	173
Peripheral or Spinal Nerve	174
Perineurium	176
Endings of Efferent Nerve Fibers	
Motor End Plate	178
Endings of Autonomic Nerves in the Smooth Musculature	180
Endings of Afferent Nerve Fibers	
Neuromuscular Spindle	181
Golgi Tendon Organ	184
Endings of Afferent Nerve Fibers in Epithelial and Connective Tissues	185
Endings of Afferent Nerve Fibers Around Hair Follicle	186
Meissner's Corpuscle	187
Vater-Pacini Corpuscle	188
Sympathetic Trunk	189
Multipolar Autonomic Nerve Cell	190
GENERAL READING	391
INDEX	393
