Abstract

Preface

Part I

1 Towards the fourth generation brickwork	3
1.1 AM for the built environment	5
1.2 Expectations of AM for bricks and brickwork	8
1.3 The research	9
2 Ceramics	13
2.1 Material categories	13
2.2 Ceramics materials	15
2.3 Processing methods for ceramics	18
3 State of the art	21
3.1 The application of brickwork	21
3.2 History and evolution of brickwork production	23
3.3 State of the art brickwork	25
3.4 Production processes	28
3.5 Extrusion processes	30
3.5.1 Rectangular extrusion	31
3.5.2 Honeycomb extrusion	32
3.5.3 Extrusion of special forms	33
3.5.4 Direct post-processing of extruded bricks	33
3.5.5 Additional processes after extrusion	34
3.6 Moulding	35
3.6.1 Punched brick production technology	36
3.6.2 Mechanical hand-formed bricks	37
3.6.3 Moulded brick	37
3.6.4 Further adaptation of the geometry of moulded bricks	38
3.7 Post-processing bricks	39
3.8 Production processes for fine silicate ceramics	41

3.8.1	Hand forming	41
3.8.2	Casting	41
3.8.3	Slip casting	41
3.8.4	Extrusion	41
3.9	Firing fine ceramics	42
4	Research framework	45
4.1	Motivation	45
4.2	Research questions	46
4.3	Methodology	49
5	Additive Manufacturing	53
5.1	AM materials and processes	55
5.1.1	Binder jetting	57
5.1.2	Powder bed fusion	58
5.1.3	Material jetting	60
5.1.4	Material extrusion	61
5.1.5	Direct energy deposition	62
5.1.6	Vat photopolymerisation	63
5.1.7	Sheet lamination	65
5.1.8	Post-processing and hybrid technologies	66
5.2	AM used in the built environment	66
5.3	AM of clay ceramics	68
5.4	Research projects	69
5.5	Preliminary research and potential of additive manufacturing of clay	73
5.5.1	The printer setup	74
5.5.2	Operating the printer	75
5.5.3	Challenges in the printing process	75
5.5.4	Process optimisation	78
5.6	Printing for the built environment	80

Part II

6	Application	85
6.1	Designs opportunities	86
6.1.1	Multi-material components	87
6.1.2	Density-optimised	87
6.1.3	Performance-optimised	87
6.1.4	Added functionality	88
6.2	Characteristics	88
6.3	Printed brick products	91
6.3.1	Ornaments	92

6.3.2 Bricks with added functions	96
6.3.3 Structural brickwork	98
7 Definition of process demands	103
7.1 Derived AM process demands	103
7.2 Final materials properties	105
7.3 Adequate application of material	106
7.4 Processing large clay components	106
7.5 Main process demands	106
8 Printing method	111
8.1 Print files software demands	111
8.2 Quality of clay building parts	112
8.3 Process methodology for AM of silicate ceramics	114
8.4 Post-processing	125
8.5 Robocasting technology	125
9 Printing material	129
9.1 Material for robocasting	129
9.2 Clay composition	131
9.3 Clay preparation for AM	131
9.4 Materials for multi-material printing	133
9.5 Recycling	133
10 Performance of the first additive manufactured samples	135
10.1 Aesthetic performance	139
10.2 Structural performance	141
10.2.1 Producing samples	143
10.2.2 Structural assessment	145
11 Printer design	153
11.1 Controller and file handling	153
11.2 Movement	155
11.3 Controller	158
11.4 Print bed	162
11.5 Sensor system and logging	162
11.6 Layout	164
12 Extrusion mechanism	169
12.1 Process demands for the extrusion mechanism	169
12.2 Tool layout	169
12.2.1 Material feeder	169
12.2.2 Batch size versus continues processes	170

12.3 Robocasting dosing mechanism	171
12.3.1 Time pressure extrusion	173
12.3.2 Piston displacement	175
12.3.3 Shutter valve-based dispensing	176
12.3.4 Auger pump dispensing	177
12.3.5 Progressive cavity pump	178
12.4 Material dispensing speed	179
12.4.1 Displacement-controlled extruders versus pressure controlled extruders	179
12.4.2 Positioning of the extrusion flow control	179
12.5 Flow mechanisms	182
12.6 Print nozzle	182
12.6.1 Material deposition alignment	182
12.6.2 Sensors	185
13 Realised AM process for bricks	187
13.1 The realised printer for the “3D Brick” project	189
13.2 AM Bricks	191
13.3 Process quality	193
13.4 Further testing of additively manufactured samples	196
Part III	
14 Evolution	201
14.1 State of the art redefined	202
14.2 Print technology	202
14.3 Material	204
14.4 Printed parts	204
14.5 Performance	205
15 Future vision	207
15.1 Future products	207
15.2 Roadmap	208
15.2.1 Certification	210
15.2.2 Future research topics	211
15.3 Expectations	216
