Introduction — 1

Intro 1: Decomposing urban materiality — 4

Intro 2: Historicizing and 'geographizing' — 8

Part One: Spatializing and historicizing materiality — 13

- I.1 A historicization based on the decomposition of space into production units: the planned developments and the construction-units — 13
 - I.1.1 The production units and their scale — 13
 - I.1.2 What is a construction-unit? — 14
 - I.1.3 Dating issues — 18
- I.2 Dating, use-lengths, inertia: analyses of the urban space of Lyons — 22
 - I.2.1 Dating planned developments (Level 1 and 2 production units) — 22
 - I.2.2 Dating the plot pattern — 26
 - I.2.3 Dating construction-units (Level 3, 4 and 5 production units) — 28
 - I.2.4 Dating public space — 35
 - I.2.5 Coherence between buildings and planned developments — 39
- I.3 From materiality to remanence: the nature of the transmitted facts — 45
 - I.3.1 Traces and remanence: transmission, multiple substitutions — 46
 - I.3.2 Time and lines: the origin of 'lines' and of property limits — 51
 - I.3.3 On the history of land property and material limits — 54
 - I.3.4 On the development of by-laws with respect to the built-up fabric and urban space — 60
 - I.3.5 Substitution and reconstitution: the particular temporality of the historical monuments — 62
 - I.3.6 The omnipresence of the new — 65
- I.4 Conclusion — 66

Part Two: Demography and building typology — 68

- II.1 The 'cells' of urban space: thinking building typology — 68
 - II.1.1 Building the historical Geographic Information System — 73

II.2	The building typology of Lyons from the fifteenth to the nineteenth century — 81
II.2.1	The Middle Ages — 82
II.2.2	The Renaissance: from the mono-familial house to the multi-familial — 85
II.2.3	The relationship between occupation mode and form of the building — 91
II.2.4	Seventeenth century: the invention of a new building type of multi-familial housing (or apartment-building) — 102
II.2.5	Typological variations and evolutions — 108
II.2.6	The new type and its assemblage properties — 112
II.2.7	The typological adaptation of older buildings — 115
II.2.8	The origins of the building types present at Lyons — 120
 Part Three: Temporalities of urban fabric production — 125	
III.1	Temporalities and urban morphology — 125
III.1.1	A 'film' of the building production over three centuries — 126
III.1.2	Space, time and social scales — 128
III.1.2.1	The year scale — 129
III.1.2.2	The several year cycle and the grouped rebuilding of neighboring houses — 135
III.1.2.3	Long duration periodicity — 138
III.1.2.4	Long-term trends and demography — 144
III.2	The social agents of change: who builds, for whom — 150
III.2.1	From the late fifteenth century to the mid-sixteenth — 152
III.2.1.1	The group of five houses under construction in Rue Grenette: an example of renewal — 158
III.2.1.2	The subdivision of Chanu's garden, illustrating the extension of urbanization — 158
III.2.1.3	The investment logics of major proprietors in the late fifteenth century — 161
III.2.2	The seventeenth and eighteenth centuries — 166
III.2.2.1	The series in seventeenth- and eighteenth-century production — 173
III.2.2.2	The production of buildings in the late eighteenth century — 175
III.2.2.3	For whom were new buildings produced at the end of the eighteenth century? — 181
III.2.3	Elements of building production in the nineteenth century — 188
III.2.3.1	Rue Pierre-Blanc: a singular development of 1820 — 193

III.2.4	The growing distance between the dwellings of proprietors and their properties — 199
---------	--

Conclusion and discussion — 205

Conclusion 1: Temporalities and spatialities of the production of urban space — 205

Conclusion 2: Temporalities of urban space production compared to temporalities in other scientific domains — 211

Appendix: 27 images from the film of building activity at Lyons from 1620 to 1830, one image per 10 years — 217
