

CONTENT

1. INTRODUCTION 1

2. STATE OF THE ART 4

2.1. Fundamentals of the friction stir welding processes 4

2.2. The modeling of friction stir welding 13

2.3. Objectives..... 21

3. DEVELOPMENT OF THE MODEL 23

3.1. Fundamentals of the heat generation, heat dissipation, and contact conditions in friction stir welding and impulse friction stir welding 23

3.2. Description of the modeling approach 33

3.3. Global numerical model for temperature distribution in the workpiece 35

3.4. Global numerical model for temperature distribution in the welding tool..... 39

3.5. Local numerical analytical model for heat generation 41

3.6. Contact condition model 45

3.7. Thermophysical properties of the workpiece material..... 48

3.8. Verification of the models 49

3.9. Summary 53

4. EXPERIMENTAL PROCEDURE AND VALIDATION OF THE MODEL 54

4.1. Experimental setup 54

4.2. Qualification of welding procedures..... 57

4.3. Validation of the model 59

4.4. Summary 69

5. INVESTIGATIONS WITH THE MODEL 70

5.1. Heat generation, temperature distribution, and contact condition in friction stir welding..... 70

5.2. Influence of the tool rotational speed and welding speed on the heat generation, temperature distribution, and contact condition in friction stir welding 79

5.3. Heat generation, temperature distribution and contact condition in impulse friction stir welding 89

5.4. Influence of the impulse force and frequency on the heat generation, temperature distribution, and contact condition in impulse friction stir welding 95

5.5. Temperature distribution in the welding tool 108

5.6. Summary	111
6. CONCLUSIONS AND FUTURE WORK	114
