

Contents

- 1 Introduction** 1
- 2 Energy Transition and Climate Change** 5
- 3 Risk Factors of the Power Supply** 9
 - 3.1 Extreme Natural Events and Climate Change 11
 - 3.2 Energy Transition and Digitization 13
 - 3.3 Technical and Human Failure 15
 - 3.4 Cybercrime 16
 - 3.5 Threat of Terrorism 18
- 4 Emergency Planning Power Failure** 21
 - 4.1 Stakeholder 22
 - 4.2 Risk Management Measures 27
 - 4.3 Communication Measures 35
 - 4.4 Conclusion 39
- 5 Resilience Measures** 41
 - 5.1 Sustainability 42
 - 5.2 Sustainable Energy Supply 44
 - 5.3 Climate Protection 46
 - 5.4 Energy Systems 50
 - 5.5 Structural and Infrastructural Adaptations to Climate Change 54
 - 5.6 Innovative Technologies 57
 - 5.6.1 Artificial Intelligence 58
 - 5.6.2 Unmanned Systems 60
 - 5.6.3 Warning Systems and Warning Apps 63

5.7	Central Platforms and Data Access	69
5.8	Data Protection	71
5.9	IT and Cyber Security	76
6	Resilience in Smart Cities	81
7	Conclusion and Outlook	87
	Bibliography	95
