

Neutrinos

Edited by H.V. Klapdor

With Contributions by

F. T. Avignone, III, R. L. Brodzinski, P. Depommier,
F. von Feilitzsch, G. Gelmini, W. Hillebrandt, H. V. Klapdor,
P. Langacker, S. P. Mikheyev, R. N. Mohapatra, K. Muto,
A. Y. Smirnov, K. Winter

With 164 Figures

Springer-Verlag Berlin Heidelberg New York
London Paris Tokyo

Contents

Neutrino Properties
By F. von Feilitzsch 1

Neutrino Reactions and the Structure of the Neutral Weak Current
By K. Winter 35

Massive Neutrinos in Gauge Theories
By P. Langacker 71

Neutrinos in Left-Right Symmetric, SO(10) and Superstring Inspired Models
By R.N. Mohapatra 117

Double Beta Decay Experiments and Searches for Dark Matter Candidates and Solar Axions
By F.T. Avignone, III and R.L. Brodzinski 147

Double Beta Decay, Neutrino Mass and Nuclear Structure
By K. Muto and H.V. Klapdor 183

Neutrino Oscillations in Vacuum and Matter
By S.P. Mikheyev and A.Yu. Smirnov 239

Searches for Lepton-Flavour Violation
By P. Depommier 265

Neutrino Physics and Supernovae: What have we learned from SN 1987A?
By W. Hillebrandt 285

Neutrinos in Cosmology
By G. Gelmini 309

Index of Contributors 339
