

Table of Contents

Preface 1

PROCESSES IN NATURAL AND TECHNICAL PARTICLE-FLUID-SYSTEMS (PFS)

Investigation of unsaturated granular soil behavior by means of in situ CT experiments 3
Marius Milatz

Complex multiscale solid-fluid interactions in drying porous media 15
Nima Shokri

DRY AND UNSATURATED PFS

Investigations for the development of a new test method to prevent the alkali-silica reaction . 19
Gyde Hartmut

New findings on alkali-silica-reaction of concrete 33
Andreas Leemann

Numerical investigation of the breakage and crash absorbing behavior of granular materials in ship collisions 37
Sonja Rotter

Virtual elements and their use as deformable particles in DEM 53
Peter Wriggers

Molecular Dynamic studies of liquid / solid interfaces in aqueous and ionic liquid systems . 65
Johannes Gädling

Optimizing liquid solid slip in nanofluidic systems	79
<i>Laurent Joly</i>	
xDEM Simulation of Frozen Particle Fluid System subjected to shearing	81
<i>Tsz Tung Chan</i>	
Application of discrete element method to analyze micromechanics of granular materials ..	95
<i>Sergiy Antonyuk</i>	
Experimental investigation of capillary collapse of partially saturated granular media	109
<i>Nicole Hüsener</i>	
Micromechanical insights into the capillary collapse of granular materials	123
<i>Jean-Michel Pereira</i>	

SATURATED PFS

Imbibition and Wetting Front Broadening in Mesoporous Silica Glass	127
<i>Juan Sánchez Calzado</i>	
Condensation-Induced Restructuring of Atmospheric Soot Aggregates	143
<i>Gennady Gor</i>	

FUNCTIONALIZED PFS

Influence of coating solution concentration on particle surface structure during fluidized bed spray granulation	155
<i>Maike Orth</i>	
About modeling rheology and agglomeration of wet particle systems	169
<i>Stefan Luding</i>	
Retention Characteristics of Biopolymer Materials Studied by Inverse Supercritical Fluid Chromatography	177
<i>Isabella Jung</i>	
Recent Advances and Uses of Aerogels for Biomedical Applications	189
<i>Carlos Alberto Garcia Gonzalez</i>
