PREFACE	xi
CHAPTER ONE—PRELIMINARY CHARACTERIZATION OF THE PHILOSOPHY OF NATURE	
1. Introduction	1
Why the Problems of the Philosophy of Nature Need an Introduction, p. 1. Many Reject the Philosophy of Nature Entirely, p. 2. Different Conceptions of the Philosophy of Nature, p. 3. The Very Existence of the Philosophy of Nature Is a Problem, p. 5.	
2. The Insufficiency of Science	7
All Science Is Based Upon Presuppositions, p. 7. Science Cannot Discuss Its Presuppositions, p. 9. The Difference Between Fundamental and Other Presuppositions, p. 11. Conclusion, p. 11.	
3. The Possibility of a Philosophy of Nature	12
Primary and Primitive Pre-scientific Knowledge, p. 12. The Object of the Philosophy of Nature, p. 15. Science and the Philosophy of Nature Are Mutually Independent, p. 15. The Importance of the Philosophy of Nature for Science, p. 16. Epistemological Complications, p. 17.	
4. Some Epistemological Considerations	17
The Importance of Epistemology for the Philosophy of Nature, p. 17. The Importance of the Philosophy of Nature for Epistemology, p. 19. Justification of a Realistic Attitude, p. 21. The Species-Individual Structure Is an Ontological Structure, p. 22. Philosophy Is Unavoidable, p. 23. Philosophical Knowledge Has More Than Relative Value, p. 26. Conclusion, p. 27	
5. Recapitulation	28
Suggested Readings	30
CHAPTER TWO—A SURVEY OF THE HISTORY OF THE STUDY OF NATURE	
1. The Preparation of the Great Systems of the Philosophy of Nature	31
Heraclitus, p. 31. Parmenides, p. 32.	

	PAGE
2. Democritus	35
Philosophical Aspects of Democritus' Atomic Theory, p. 35. Physical Aspects of the Atomic Theory of Democritus, p. 38.	
3. Aristotle	38
Rejection of Democritus' Atomism, p. 38. Analysis of Parmenides' Concept of Being, p. 39. Analysis of Change, p. 41. Doctrine of Matter and Form, p. 43. Hylomorphism Is a Philosophic Theory, p. 45. Recapitulation of Aristotle's Philosophy of Nature, p. 46. Critical Remarks, p. 47. The Science of Aristotle, p. 48. The Principal Character of Aristotle's System, p. 51.	
4. The Explanation of Aristotle's Unchallenged Authority During Twenty Centuries	52
Introduction, p. 52. Problems to Be Considered, p. 54. Scientific Laws Are Not So Obvious, p. 55. The Necessarily Philosophic Character of Aristotle's System, p. 57. The Mixed Character of Aristotle's System, p. 59. The Development of Science in the Past Had to Be Slow, p. 61. The Position of Aristotle in the Middle Ages, p. 65.	
5. The Seventeenth Century	70
The True Character of "The New Science," p. 70. The Reason Why the Character of the New Science Was Not Properly Understood, p. 72. The Reason Why Aristotle Was Entirely Abandoned, p. 73. Realization of the Difference Between Science and Philosophy, p. 75.	
6. The Revival of the Aristotelian-Thomistic Philosophy	76
The Causes of the Revival, p. 76. The Aristotelian Philosophy of Nature Offered a Serious Difficulty, p. 76. Science Did Not Actually Confirm Democritus' Philosophy, p. 77. No Sharp Distinction Between Science and the Philosophy of Nature Was Made, p. 79.	
Suggested Readings	80

CHAPTER THREE—THE PROPER RELATIONSHIP BETWEEN SCIENCE AND THE PHILOSOPHY OF NATURE

1. The Reason for the Confusion Between Science and the Philosophy of Nature	81
Introduction, p. 81. The Importance of the Discovery of Positive Science, p. 82. The Fallacy of Misplaced Concreteness, p. 83. Science and the Philosophy of Nature Seem to Be Competitive Theories, p. 85. Both the Scientist and the Philosopher Are Responsible for the Confusion, p. 86. Conclusion, p. 87.	

	PAGE
2. The Nature of Abstraction	87
General Meaning of Abstraction, p. 87. The Meaning of the Term "Abstraction" in Philosophy, p. 88. Abstraction and Schematization, p. 88.	
3. The Three Levels of Abstraction	90
The Various Expositions of St. Thomas, p. 90. An Example of a Scientific Theory, p. 93. An Example of a Philosophic Theory, p. 95. Seeming Inconsistency Between the Two Expositions of St. Thomas, p. 96. The Position of Mathematics, p. 97. Science and the Philosophy of Nature Do Not Belong on the Same Level of Abstraction, p. 98. Science Belongs to the First Degree of Abstraction, p. 99. Philosophy of Nature Belongs to the Third Degree of Abstraction, p. 100. The Solution of the Seeming Inconsistency, p. 101.	
4. Science and the Philosophy of Nature	103
Suggested Readings	106

CHAPTER FOUR—THE ESSENCE OF MATERIAL BEING

1. Introduction	107
2. Substantial Change as a Starting-Point for the Philosophy of Nature	107
Our Problem Differs From That of Aristotle, p. 107. The Concept of Substantial Change Needs a Profound Examination, p. 109. Substantial Changes Between Living and Non-Living Matter, p. 111. Conclusion, p. 113.	
3. The Requirements for a Good Philosophical Starting-Point	113
It Must Be a Fact Beyond Any Possible Doubt, p. 113. A Starting-Point for the Philosophy of Nature Must Say Something About All Matter, p. 115.	
4. The Species-Individual Structure of Matter as a Starting-Point for the Philosophy of Nature	115
Introductory Remarks, p. 115. Analysis of the Species-Individual Structure, p. 118. Species-Individual Structure and Hylomorphism, p. 124. Species-Individual Structure Indicates the Possibility of Substantial Change, p. 125.	
5. Substantial Change in Matter	126
The Analogy of Substance, p. 126. Two kinds of Substantial Change, p. 129.	

	PAGE
6. What Are the Individual Substances in Matter?	130
The Standards Are Set With Respect to Human Individuals, p. 130. Natural Coherence in Space and Time, p. 133. The Whole Universe as One Substance, p. 136. The Mechanistic Conception, p. 137. The Analogy of the Matter-Form Schema, p. 141. Science and the Use of a Mechanistic Schema, p. 142. The Relativity of the Concept "Individual," p. 144. Individuals in non-solids, p. 148.	
7. Recapitulation	151
Suggested Readings	153

CHAPTER FIVE—QUANTITY

1. Quantity in General	154
Discrete and Continuous Quantity, p. 154. The object of Mathematics is Quantity, p. 155.	
2. Space	159
Different Opinions About Space, p. 159. Space as Reality in Itself, p. 160. Space as " <i>Anschauungsform a Priori</i> ," p. 161. Place, p. 163.	
3. Motion	165
Importance of Motion, p. 165. Aristotle's Definition of Motion, p. 166. The Concept of Finality, p. 168. Aristotle's Physical Conception of Motion, p. 171. The Modern Physical Conception of Motion, p. 172. Aristotle's Analysis of Motion Is Not Based Upon His Faulty Physics, p. 173. Hylomorphism and Motion, p. 176.	
4. Time	176
Similarity Between Time and Space, p. 176. Time and Motion, p. 178. Topological and Metric Structure, p. 179. The Measurement of Time, p. 180.	
5. The Theory of Relativity About Simultaneity	181
No Universal Time, p. 181. The Principle of Relativity, p. 183. Galileo- and Lorentz-transformation, p. 184. Theory of Relativity Deals with Measurement of Time, p. 185. The Theory of Relativity Alone Has No Philosophical Consequence, p. 186. The Theory of Relativity Does Provoke Philosophical Problems, p. 187. The Meaning of "In Principle," p. 188. The Theory of Relativity Presupposes Simultaneity, p. 190. The Presupposition of Simultaneity Does Not Imply the Possibility of Objective Measurement, p. 192.	

	PAGE
6. Space-Time Continuum	194
The Objective Distance in Space-Time, p. 194. The Fundamental Difference Between Space and Time, p. 195. Temporal and Spatial Distances Cannot Be Measured Independently, p. 196.	
7. Summary	197
Suggested Readings	198

CHAPTER SIX—QUALITY

1. The Reality of Qualities.....	199
Introduction, p. 199. Are Material Qualities Properties of Matter?, p. 199. The Reduction of Quality to Quantity Is Never a Total Reduction, p. 200. Empirical Science Presupposes Quality, p. 201.	
2. Extension and Intensity	202
Science Presupposes That All Material Phenomena Are Subject to Mathematical Methods, p. 202. Quality Has Extension and Intensity, p. 203. The Difference Between Intensity and Extension, p. 203.	
3. Quality and Quantity in the Light of Hylomorphism....	204
4. The Reduction of One Quality to Another.....	205
Historical Importance of the Problem, p. 205. Aristotle's Idea of Qualitative Differences, p. 206. Aristotle Knew Reduction of Qualities, p. 207. A Specific Set of Qualities Characterizes a Substance, p. 208. The Supposed Difference Between a Substance and an Aggregate, p. 208. Science Is Justified in Reducing Qualities, p. 209. The Attitude of Nineteenth Century Science Towards Elementary Qualities, p. 211. The Attitude of Twentieth Century Science, p. 212. The Real Difference Between a Substance and an Aggregate, p. 213. The Twofold Mutual Relationship of Matter, p. 213.	
5. Concluding Remarks	215
Suggested Readings	215

CHAPTER SEVEN—ACTIVITY IN MATTER

1. General Outline of Problems.....	216
Interaction, Determinism and Specificity, p. 216. Determinism and Free Will, p. 216.	
2. The Classical Idea of Determinism in Matter.....	218
Scientific Laws Presuppose Determinism and Specificity in Material Activity, p. 218. The Nineteenth Century	

	PAGE
Conception of Determinism and Causality, p. 219. The Narrow Concept of Causality Is Not Tenable, p. 220. The Rejection of Free Will, p. 221. An Exact Knowledge of a Physical Situation Is Not Possible, p. 222. The Older Quantum Theory, p. 223.	
3. Quantum Mechanics	224
The Uncertainty Principle, p. 224. Quantum Mechanics and Corpuscle Models, p. 225. Quantum Mechanics and the Objectivity of Human Knowledge, p. 225.	
4. Quantum Mechanics and Determinism	227
Identification of Causality and Determinism, p. 227. Identification of the Causality and the Possibility of Prediction, p. 228. Mechanical Models and the Possibility of Exact Prediction, p. 229. Difference Between Classical and Quantum Statistics, p. 229. Different Use of the Term "Determinism," p. 231. The Laws of Probability Presuppose Determinism, p. 232. Chance, p. 233. Probability, p. 234. Random, p. 235. Classical Science and Random-Distribution, 237. Quantum Mechanics and Random-Distribution, p. 238. The Reason for the Confusion Lies in Erroneous Philosophical Concepts, p. 241.	
5. Determinism and Free Will	241
Quantum Mechanics and Arguments for Free Will, p. 241. The Psychological Effect of Quantum Mechanics, p. 243. The Philosophical Problem of Free Will, p. 244. Determinism, p. 245. Determinism and Interaction, p. 245. The Essence of Free Will, p. 245. Limitation of Free Will, p. 246. Determinism Alone Does Not Exclude Free Will, p. 247. The Universe Is Not a Substantial Unity, p. 248. Free Will and Determinism in One Being, p. 249. Free Will and Conservation of Energy, p. 251.	
6. Conclusion	252
Suggested Readings	253
CHAPTER EIGHT—EPILOGUE	254
INDEX OF NAMES	259
INDEX OF SUBJECT MATTER	260
