Invited Papers

ICT Application on the Management of Intelligent Transportation Systems	3
<i>Maria Pia Fanti</i>	
Abstractions of Hybrid Systems for Verification	15
<i>Hervé Guéguen, Janan Zaytoon</i>	
Meeting the World Challenges with Advanced System Organizations	29
<i>Peter Simon Sapaty</i>	

Part I: Intelligent Control Systems and Optimization

An Improved Mean-shift Tracking Algorithm Based on Adaptive Multiple Feature Fusion	49
<i>Hongpeng Yin, Yi Chai, Simon X. Yang, David K.Y. Chiu</i>	
Modelling and Performance Enhancement of a Linear Actuation Mechanism Using Conducting Polymers	63
<i>Elise T. Burriss, Gursel Alici, Geoffrey M. Spinks, Scott McGovern</i>	
Grasping Spatial Integrity in Distributed Unmanned Systems	79
<i>Peter Simon Sapaty</i>	
Convergent Iterative Feedback Tuning of State Feedback-Controlled Servo Systems	99
<i>Mircea-Bogdan Rădac, Radu-Emil Precup, Emil M. Petriu, Stefan Preitl, Claudia-Adina Dragoş</i>	

Multimodel Gain Scheduled Quadratic Controller for Variable-Speed Wind Turbines Performances Improvement	113
<i>Nadhira Khezami, Xavier Guillaud, Naceur Benhadj Braiek</i>	
Conformance Testing of Soft-Core Can Controllers: A Low-Cost and Practical Approach	129
<i>Imran Sheikh, Michael Short</i>	
Design Parametrization for Dynamically Similar Delayed Teleoperation Systems	143
<i>Ernesto Olguín-Díaz, Vicente Parra-Vega, Luis G. García-Valdovinos, Vicente de Paul García-Alvizu</i>	
 Part II: Robotics and Automation	
Planning Image Trajectories for Visual Servoing via LMI-Based Optimization	159
<i>Graziano Chesi</i>	
Evolutionnary Autonomous VGSTV Staircase Climbing	173
<i>Jean-Luc Paillat, Phillipe Lucidarme, Laurent Hardouin</i>	
Dynamic Walking on Uneven Terrains with Passivity-Based Bipedal Robots	187
<i>Qining Wang, Yan Huang, Jinying Zhu, Baojun Chen, Long Wang</i>	
Decentralized Robust Collision Avoidance Based on Receding Horizon Planning and Potential Field for Multi-Robots Systems	201
<i>Michael Defoort, Arnaud Doniec, Noury Bouraqadi</i>	
Task Partitioning in Swarms of Robots: Reducing Performance Losses Due to Interference at Shared Resources	217
<i>Giovanni Pini, Arne Brutschy, Mauro Birattari, Marco Dorigo</i>	
Exploiting Hierarchical Probabilistic Motion Planning for Robot Reachable Workspace Estimation	229
<i>Jing Yang, Patrick Dymond, Michael Jenkin</i>	
Defocus-Based Threedimensional Tracking in SEM Images	243
<i>Christian Dahmen</i>	
Real Time Environment Representation in Driving Scenarios Based on Object Delimiters Extraction	255
<i>Andrei Vatavu, Sergiu Nedevschi, Florin Oniga</i>	

Vision-Based Automatic Approach and Landing of Fixed-Wing Aircraft Using a Dense Visual Tracking	269
<i>Tiago F. Gonçalves, José R. Azinheira, Patrick Rives</i>	

Part III: Signal Processing, Systems Modeling and Control

Studies on the Convergence of Information Theory and Control Theory	285
<i>Prateep Roy</i>	
VAR Based State-space Structures: Realization, Statistics and Spectral Analysis	301
<i>Vasilis K. Dertimanis, Dimitris V. Koulocheris</i>	
Strain Analysis of the Sciara del Fuoco (Stromboli Volcano)	317
<i>G. Nunnari, A. Spata, G. Puglisi, A. Bonforte, F. Guglielmino</i>	
Improving Performance of Generalised Conditioning Technique Anti-windup Compensator	325
<i>Dariusz Horla</i>	
Interdisciplinary Modeling of Autonomous Systems Deployed in Uncertain Dynamic Environments	337
<i>Manuela L. Bujorianu, Marius C. Bujorianu</i>	
Author Index	351
